Divorce Statistics.

THE Bureau of the Census issued in 1910 a report of the results of a compilation of statistics of divorces of married people granted by the courts in the United States for a period of twenty years; being from 1887 to 1906, both years inclusive, and which are shown in 1912 ALMANAC, pages 197-199.

COMPARISON WITH FOREIGN COUNTRIES.

The following table shows how the divorce rate in the United States compares with that in certain foreign countries.

It should, perhaps, be stated that this comparison is affected slightly by the fact that the figures for foreign countries include as a rule only absolute divorces, while those for the United States include both absolute and limited divorces. This difference is, however, of almost no practical importance, for in the United States less than 1 divorce in 100 is a limited divorce. If it is assumed that exactly 1 divorce in 100 is a limited divorce the ratio of the United States would become 72 per 100,000 population instead of 73, an immaterial difference.

The National Temperance Society.

President—Rev. David S. Dodge. Editor and Lecturer—Rev. C. H. Mead. Treasurer—John W. Cummings.

The National Temperance Society and Publication House was organized in 1865 for the special work of creating and circulating sound temperance literature to promote the cause of total abstinence from all intoxicants, and to unify and concentrate the temperance and Christian sentiment of the nation against the drink habit and the drink traffic. The headquarters of the society is at 373 Fourth Avenue, New York City.

Statistics of Homicide.

Josiah Strong's "Social Progress" for 1906 gives the following table of homicides and the annual average:

	Tripled.	Con- victed.		Tripled.	Con- victed.		Tripled.	Con- victed.
Italy	3,606	2,805	England	318	151	Hungary	625
Austria	689	499	Ireland	129	54	Holland	35	28
France	847	580	Scotland	60	21	Germany	567	476
Belgium	132	101	Spain	1,584	1,085			

The average number of murders in the United States annually during the twenty years, from 1885 to 1904, was 6,597. In 1896 the murders reached high-water mark, 10,662, and in 1895 there were 10,500. For 1908 the Census Bureau reported the number of homicides in the registration area of the United States—55.3 per cent. of the total population—as 3,003, and in 1909 as 2,854.

According to Frederick L. Hoffman the average homicide rates per 100,000 of population for 30 representative American cities were as follows: For the years 1882-1891, 5.9; for 1892-1901, 4.9; and for 1902-1911, 7.2. The homicide rates for thirteen years ending with 1910 were as follows: For 9 Southern cities, 14.7; for 3 Western cities, 9.7; for 7 Central cities, 7.8; and for 11 Eastern cities, 4.3. The homicide rate for Memphis, Tenn., was 47.1; for New Orleans, La., 22.2; for Louisville, Ky., 16.5; for San Francisco, Cal., 11.2; for Chicago, Ill., 8.4; for Manhattan and The Bronx, 5.1; for Boston, Mass., 4.6; for Philadelphia, Pa., 3.7, and for Milwaukee, Wis., 1.7.

The excessive mortality from homicide among the colored race is indicated by the following data: In New Orleans, La., for the five-year period ending 1910, the colored death rate from homicide was 66.6 per 100,000 population, as against 13.2 for the whites; in Savannah, Ga., the comparative rates were 30.9, as against 17.0; and in Charleston, S. C., 45.2 as against 11.1

Embezzlements.

The fidelity department of the Fidelity and Casualty Company of New York keeps a record of embezzlements reported in the United States. The following are the figures for five calendar years:

The total amount of embezzlements reported by the same authority for each year from 1896 to 1910, inclusive, was as follows: 1896, \$9,113,030; 1897, \$11,154,530; 1898, \$9,236,351; 1899, \$5,873,086; 1900, \$8,090,878; 1901, \$7,734,250; 1902, \$6,933,516; 1903, \$10,312,793; 1904, \$10,068,971; 1905, \$12,623,536; 1906, \$18,883,709; 1907, \$9,367,964; 1908, \$11,565,679; 1909, \$10,652,060; 1910, \$10,731,965; 1911, \$11,482,051; total, \$163,824,369.

THE WORLD of July 31, 1910, said: Amount stolen from banks in past five years, \$28,000,000. Banker convicts in Federal Penitentiary, Leavenworth, Kan., exceeded every other class of prisoners except burglars and mail robbers. Records show that a majority of embezzlers stole money to gamble in Wall Street. Total thefts of \$28,000,000 do not represent complete record of losses, because banks conceal them whenever possible. Temptation to try and repeat performances of the few men who have made quick fortunes in Wall Street is held responsible for increasing embezzlements among bank employes.

COMPILED FROM THE CODES OR REVISED STATUTES OF THE

WITHIN the limits of the subjoined table showing the penalties prescribed by the respective States for the offences enumerated it is impossible to attain complete accuracy in comparing the several penalties, for the reason that the provisions of the several States defining these very familiar crimes are not identical. Especially is this true in regard to crimes classified in degrees, some States making but little attempt in that direction, leaving it to the discretion of the trial court to adapt the severity of the punishment to the gravity of the offence, while other States provide a minute classification into degrees, depending on the several possible circumstances attending the commission of the crime.

Murder in the First Degree—In the table below—may be generally defined to be the unlawful intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes such as arson, burglary, rape or robbery.

Murder in the Second Degree is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

Manslaughter may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character, or intentionally, in the heat of passion and without premeditation.

Arson—where classified in degrees—though the number and exact definition of degrees varies greatly—is in general classified with reference to two conditions. First, the character of the building burned, whether a dwelling house or structure likely to or containing a human being; and second, whether the crime is perpetrated by day or night. Thus the most serious offence is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. Often intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night.

Burglary—The classification of burglary or house breaking depends on substantially the same

elements as that of arson, namely the building entered, whether a dwelling or other building, and whether the offence was committed by day or night.

Robbery may be generally defined as the theft of property from the person or immediate presence of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury.

Grand Larceny is simple theft, of property above a fixed value, generally \$25 to \$50—most States also classify as grand larceny theft of property from the person of the victim irrespective of value, though of course, accomplished without the force or fear which constitute the crime of robbery. Assault with intent to kill, bigamy, forgery, perjury and rape, are not subdivided into degrees in the subjoined table.

Where crimes are divided into several degrees it is generally within the province of the jury in convicting, to fix the degree of the crime, and in almost every case in which a crime is punishable by death or imprisonment, it is the province of the jury to determine the punishment, except upon a plea of guilty, when the duty devolves upon the court.

Where the classification of a crime in a particular State does not approximately agree with the definitions given above, note is made of the fact.

The District of Columbia has no distinct penal code, but in general the provisions given in the table for Alaska would apply.

NOTE—In the table below, after the figures given, "years" is understood, unless otherwise stated. Where two figures are given, separated by a dash, as 1-7, the provision should be understood as "not less than one year nor more than seven," where a sum of money is given in the table the provision should be understood as meaning a fine of not exceeding the sum mentioned.

Wills.

A **WILL OR TESTAMENT** is a final disposition of a person's property to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made orally by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the presence of the testator. The form of wording a will is immaterial as long as its intent is clear.

AGE at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Hawaiian Islands, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years and in Louisiana any one over 16 years is competent to make a will. In Colorado persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. **WITNESSES**—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

National Probation Association.

ORGANIZED in 1906 as the National Probation Officers' Association; title changed to present one in 1911.

The purposes of the Association are to promote the more extensive and wise use of the probation and parole systems of dealing with both juvenile and adult offenders; also to encourage the adoption of the most approved methods of conducting children's courts. The Association holds an annual conference each Spring at the time and place of the meetings of the National Conference of Charities and Correction. It publishes an annual directory of probation officers in the United States, the proceedings of its annual conferences, and other literature. From time to time it appoints special committees to study and report on particular phases of probation, parole, and juvenile court work. Supported by membership fees and voluntary contributions.

President—Bernard Flexner, Louisville, Ky. **Vice-Presidents**—Charles A. DeCourcy, and Mrs. Joseph T. Bowen, Chicago, Ill. **Secretary-Treasurer**—Arthur W. Towne, the Capitol, Albany, N. Y.

State Legislation in 1912.

The following summary of legislation by States in 1912, up to Oct. 1, is compiled by permission from the appendix to the annual address of President Stephen S. Gregory, of the American Bar Association, delivered at Milwaukee, Wis., Aug. 27, 1912. Only the principal new legislation of current interest is covered by this summary. Much of the legislation in the States consists of amendments of existing laws:

Arizona—At the first session of the Legislature, after Arizona was admitted, the following, among other statutes, were adopted:

Acts to prohibit foreign corporations from removing causes to the Federal Courts; limiting the number of cars in a railroad train; requiring experienced engineers and conductors for trains; making void contracts in advance between employer and employee for the settlement of damage suits; prohibiting blacklisting; regulating child labor; providing for the punishment of desertion of wife or child; providing for indeterminate sentences; prohibiting the employment of teachers in the public schools suffering with tuberculosis; a so-called White Slave act; denying corporations the right to contribute to political campaigns; denying State officials the right to use and the railroads to issue passes; regulating the transportation of passengers by common carriers; providing that corporations shall pay their employees semi-monthly; a Compulsory Workmen's Compensation act; providing for an Inheritance Tax; prescribing the terms upon which licenses shall be issued to foreign corporations seeking to do business in that State; a Pure Food act; providing for publicity of campaign contributions and expenditures before and after election; a general Registration act and Primary law for elections.

California—At an extra session of the Legislature acts were passed: Providing for the registration of voters; providing for the confinement and care of persons addicted to the intemperate use of narcotics or stimulants, so as to have lost the power of self-control; providing for the organization of the Railroad Commission, and defining its powers, duties, etc., called the "Public Utilities Act"; amending the law as to primary elections, so as to permit each candidate to have his name at the head of the list on equal terms with all the others; a Presidential Primary act; regulating reciprocal or inter-insurance contracts; providing for the recall of elective officers of counties and subdivisions thereof; providing for the initiative and referendum; providing for the recall of officers of cities and towns; imposing additional duties and conferring additional powers upon the Industrial Accident Board; providing for submitting to the electors of every city and county or town the question whether such city, county or town should retain the powers of control vested therein respecting public utilities, or surrender the same to the Railroad Commission.

Illinois—At a special session in 1912 the Legislature passed acts providing for Presidential primaries; regulating fraternal benefit societies; providing for mutual insurance against liability in consequence of accident or casualty of employees or other persons; revising the laws of the State relating to charities.

Kentucky—The following acts of general interest were passed at the 1912 session: Creating a department of banking; providing for the nomination of candidates at primary elections and for placing the names of candidates on the ballots to be voted for at general elections; creating a department of public roads, and the office of State Commissioner of Public Roads; providing for the investigation of fires and for the appointment of a fire marshal and assistants; amending the school law of the State; proposing to amend the Constitution by allowing the employment of convict labor upon public roads and bridges; providing for the protection of game and fish; permitting women to vote for the election of school trustees and some other school officers, and upon school questions, and to hold common school offices; amending the law as to liability insurance companies; prohibiting the use of public drinking cups; making an appropriation to secure the birthplace of Jefferson Davis and to erect thereon a suitable memorial to his memory; regulating the employment of females in order to safeguard their health, which provides, among other things, that no female under twenty-one years of age shall be employed or permitted to work at any gainful occupation, except domestic service and nursing, more than sixty hours in any one week, or ten hours in any one day; regulating the sale of opium, or its alkaloids, or their derivatives or any mixture thereof; regulating the practice of dentistry in the State; providing for compulsory attendance in the common schools and graded common schools; regulating telephone companies; promoting the building of good roads, as to the acquisition of toll roads by counties; permitting husband and wife to testify for or against each other; providing for the creation of a parental home for the care and protection of unfortunate, dependent, neglected or orphan children; providing for the creation of a commission known as the Kentucky Board of Tuberculosis Commissioners; providing annuities for aged, infirm, disabled or retired teachers in cities of the first class; providing for the drainage of lands; establishing a State Board of Forestry; creating a State Fire Insurance Rating Board; providing for the organization of the militia, which establishes an elaborate military code for this State.

Legislation of New York in 1912.

THE Legislature of New York in 1912, in addition to passing laws, also approved of a proposition to be submitted to the people at the polls at the Fall election later bonding the State to the amount of \$50,000,000 for the purpose of constructing and improving State and county highways. The Legislature also passed for the first time (which must also be passed by a Legislature containing another Senate before they can be voted upon by the people at the polls) several amendments to the State's Constitution. One of these amendments to the Constitution is intended to authorize the passing of a Working-man's Compensation act. It says that nothing contained in the Constitution shall be construed to limit the power of the Legislature to enact laws for the protection of the lives, health or safety of employes; or for the payment, either by employers or by employers and employes or otherwise, either directly or through a State or other system of insurance or otherwise, of compensation for injuries to employes or for death of employes resulting from such injuries without regard to fault as a cause thereof, except where the injury is occasioned by the wilful intention of the injured employe to bring about the injury or death of himself or of another.

Another proposed amendment to the Constitution increases the number of County Judges in Kings County from two to four; and also provides that the number of County Judges in any county of the State may be increased from time to time by the Legislature to such number that the total number of County Judges in any one county shall not exceed one for every two hundred thousand, or major fraction thereof, of the population of such county.

A third proposed amendment to the Constitution declares that the Legislature may authorize cities to take more land and property than is needed for actual construction in laying out parks, highways or streets; provided that the additional land and property so authorized to be taken shall be no more than sufficient to form suitable building sites abutting on such park, public place, highway or street.

A fourth proposed amendment to the Constitution provides that the Legislature may by general laws provide for the use of not exceeding three per centum of the lands of the State constituting the forest preserve for the construction and maintenance of reservoirs for municipal water supply, for the canals of the State and to regulate the flow of streams.

A fifth proposed amendment to the Constitution guarantees to cities and incorporated villages the right of municipal self-government; restricting the power of the Legislature to the enactment of general laws in reference thereto. The amendment says that the Legislature shall not pass any special or local bill affecting the municipal government of a city or incorporated village; and the statement is added: "Nor shall the Legislature provide for the filling of any municipal office now existing or hereafter to be created other than by an election by the electors within such municipality or by appointment by a duly elected officer of such municipality. The people of every city and incorporated village shall have the power to organize their own municipal government and to administer the same for municipal purposes, subject only to such general laws as the Legislature may enact."

A direct tax of 1 mill was imposed, which will raise \$11,000,000.

The Legislature, in the General Appropriation bill, appropriated \$28,113,000; in the Supply bill, \$3,565,000; for charitable institutions, prisons, and the care of the insane, \$4,294,000; in special appropriation acts, \$9,754,000; making the total appropriations for the year 1912 the sum of \$45,726,000, as contrasted with \$38,934,000 in 1911, or an increase of \$6,792,000. There was also an increase of appropriations due to sinking fund requirements from \$4,140,000 in 1911 to \$6,657,000 in 1912, or an increase of \$2,517,000, making the total increase in appropriations by the Legislature in 1912 as contrasted with 1911 the sum of \$9,309,000. There were the following specific increases: Capitol reconstruction and power plant, \$255,000; Educational Building and equipment, \$688,000; highway repairs, \$1,407,000; State aid to towns in the construction of highways, \$38,000; charitable institutions, \$2,344,000; compensating owners of diseased animals, \$130,000; publishing session laws and concurrent resolutions, \$247,000; factory investigation, \$50,000; expenses of Legislature, \$96,000; Panama-Pacific Exposition, \$25,000; Court of Appeals Building, \$100,000; to settle Philip Philipse claims, \$225,000.

The gain in New York State is due largely to the fact that the State has bonded itself for \$50,000,000, and that \$5,000,000 a year is being expended by the State, in addition to an equal sum by the counties, in building State highways.

The gain in Georgia is largely attributed to the use of 4,500 prisoners on the public roads of the State.

The gain in South Carolina, Alabama and Florida is due largely to the fact that sand-clay roads are being built and that this is a very cheap and satisfactory type of road building.

Automobile Industry.

In round figures, a quarter of a million automobiles were built in the United States during 1912, and practically all of this enormous output found a ready market either at home or abroad. Although September marks the end of the automobile year, some of the factories producing popular-priced cars found their output sold as early as July, an unusual situation and one significant of the prosperous state of this remarkable industry. By September 1 the factories, with few exceptions, were either producing, or on the point of beginning the production of cars, intended for the 1913 market. To a greater extent than ever before the United States during 1912 left its impress on the world's automobile market. From importing the bulk of cars required in this country ten or a dozen years ago, the situation has been reversed, and the United States is in a fair way to supply the world before many years pass. In 1901 the exports amounted to only \$367,000; by 1906 they had jumped to \$4,500,000. In 1911 the total was well over \$21,000,000. The figures for the current year have not been compiled, but they will probably reach \$25,000,000.

IMPORTS DECREASING ANNUALLY.

Imports of automobiles to the United States reached the crest in 1906, when the value of cars brought in was approximately \$5,000,000. For 1912 the total will hardly be \$2,000,000. The explanation of this enormous decrease in imports lies in the fact that American manufacturers have learned to build quite as high-class cars as those turned out of the best French, German, Italian and English plants, and those who want the best find the home industry equal to filling the demand.

What has been termed the "American invasion" of Great Britain caused a great deal of comment and apprehension in that country in the year just ending. While the bulk of exports were of low-priced cars, these proved good enough to seriously affect the British market, and methods of meeting the situation are being considered at the present time. Canada remains the best outside customer of the American automobile manufacturer, taking up to September 1 more than \$6,000,000 worth of cars, while the total for the United Kingdom on that date was about \$4,000,000. Germany is also proving an appreciative customer, buying more American cars in the first six months of 1912 than in all of 1911.

PRODUCTION GREATLY INCREASED.

The output of 250,000 cars, which does not include motor trucks, represented an increase of about 50,000 over the previous season, a growth that surprised even the most optimistic. The limit of yearly demand had been supposed to be 200,000, but the lowering of price of small, light cars brought great accessions to the list of owners. By October 1 further reductions had been announced, or were contemplated, thus bringing the motor car within reach of a still greater portion of the population.

Carefully compiled figures indicate that the number of automobiles in use in the United States on September 1, 1912, was more than 860,000, an average of one car to every 110 persons. In New York State alone more than 100,000 cars had been registered in the Secretary of State's office, producing a revenue, in registration fees, of \$1,000,000. California stands second in the number of registrations with more than 80,000; Ohio third with 56,000; Pennsylvania fourth with 53,000, which includes licenses taken out by non-residents; Illinois fifth with 47,000; Indiana sixth with 46,000, and New Jersey seventh with 43,000, showing a slight lead over Massachusetts.

SELF-STARTING DEVICE POPULAR.

Mechanically, in the automobile field, the year just ending will go down in history as the year of the self-starter. While this useful, if not always dependable, adjunct to the motor-driven vehicle was by no means new in the industry, its value as an attraction to the car buyer became thoroughly recognized at the time of the shows throughout the country in January and February. The self-starter appeared in many forms, actuated in various ways, principally by acetylene gas, electricity, compressed air or by springs. Several manufacturers who had given the self-starter only slight consideration found themselves compelled by popular demand to adopt the device in some form in order to meet competition. It is probable that more than 90 per cent. of cars built for 1913 will be equipped with a self-starter, the electrically actuated type appearing to be most popular.

AUTOMOBILES AND GOOD ROADS.

To a greater extent than in any previous year the growing popularity of the automobile brought a country-wide demand for highway improvement, and particularly for the building of roads capable of withstanding this form of traffic. Every State vastly increased its outlay in this respect. While New York led in the amount of money spent on its roads, the main arteries of traffic leading out of New York City were in execrable condition during the greater part of the year, and some of the principal roads on Long Island became deplorably bad. At various times during the year road congresses were arranged by leading automobile bodies, and the question of Federal aid for highways was brought before Congress with such force that a committee was appointed to look into the matter and instructed to report at the next session. California continued to increase its admirable boulevard system during the year, and is destined to prove the strongest competitor of Massachusetts as the "motorist's paradise."

Due to various causes, the motor-propelled vehicle for business uses failed in the last twelve months to make the progress that had been hoped for, although a considerable increase was shown. The number in use throughout the country is estimated at 33,000, as compared with 25,000 in December, 1911, New York leading by a wide margin in their utilization. A notable feat in motor trucking was a transcontinental journey from Philadelphia, via New York to San Francisco, by a fully loaded vehicle of three tons capacity, the run occupying about sixty days and furnishing a spectacular proof of the growing dependability of the commercial motor vehicle.

RACING DURING THE YEAR.

Racing in the United States was at a low ebb during 1912, especially in the Eastern States. Memorial Day brought the decision of a 500-mile race on the Indianapolis Motor Speedway, an American-built car winning from a large field at an average speed of 78.6 miles an hour. The Vanderbilt Cup and Grand Prix races, previously run on Long Island and at Savannah, Ga., were transferred to Milwaukee, Wis., and run over an inferior course. The Vanderbilt Cup was won by a German car piloted by De Palma and the Grand Prix by an Italian car in the hands of Bragg. The average speed in the Vanderbilt Cup race was 69 miles an hour and in the Grand Prix race 69.3 miles an hour. A regrettable feature of the Milwaukee race carnival was the death of David Bruce-Brown, a famous young American driver, following an injury in practice.

Aboard the Automobile Club of France revived the classic Grand Prix race, which was won by a French car in a two days' race. Several other important road races were held in Europe during the year, in strong contrast with previous seasons, and confirmative of the belief that road racing is not only in favor with the public but a distinct help to the makers of automobiles.

Distribution of the money—Of the players' share, \$147,571.70, the Red Sox as winners take 60 per cent., or \$88,543.02, and the Glants as losers take 40 per cent., or \$59,028.68. The money is divided equally among the players. The Red Sox had twenty-two eligible players, and each received \$4,024.68. The Glants had twenty-three eligible players, and each received \$2,566.46.

The New York and Boston clubs each received \$147,088.85. Of the Boston club's share 25 per cent., or \$36,772.21, will be turned into the treasury of the American League for equal distribution among the other seven clubs, each of which will receive \$5,253.17. This 25 per cent. distribution to the clubs was a new arrangement, adopted by the American League at its annual meeting last year. The plan was suggested at the last annual meeting of the National League, but was not adopted then.

Archery.

The National Archery Association of the United States held its thirty-fourth annual tournament on August 13-16 on Soldier's Field, Boston, Mass. One of the noteworthy incidents of the meet was the presence of three of the veterans who shot in the first national tournament in 1879, Dr. Edward B. Weston of Chicago, W. H. Clark of Wyoming, Ohio, and the Rev. W. B. D. Gray of Cheyenne, Wyo. Another noteworthy incident was the showing of the new comers who had never shot in any tournament before, Miss Mary A. Brownell of Wellesley College, winning the 40-yard range medal and the wand shoot; Mrs. G. P. Bryant winning the flight and Ellis Spear, Jr., winning the Duff Arrow.

Rowing.

YALE VS. HARVARD—VARSITY EIGHTS.

YALE and Harvard eights have rowed forty-six races, beginning in 1852 on Lake Winnipisseegeog at two miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to three miles. Lake Quinsigamond was the scene for nine years, and Lake Saltonall for 1869. After an interval of seven years the crews in 1876-77 went to Springfield, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Ct. The records:

Sunday World Athletic Meets.

(From Official Report of P. S. A. L.)

Sixth Annual Field Days for elementary school boys, financed by the NEW YORK SUNDAY WORLD, under the auspices of the Public Schools Athletic League, were by all odds the most successful series of athletic meets that has ever been held. One hundred and fifty-three New York public schools held SUNDAY WORLD Field Day meets—45 in Manhattan, 56 in Brooklyn, 16 in the Bronx, 27 in Queens and 9 in Staten Island.

From these 153 schools, 47,000 boys were entered as qualified competitors in the games. This is nearly 11,000 more than competed in these field days in 1910, when all records as to number of contestants in any one series of athletic events in this city or in any other city of the world were broken. Three thousand four hundred and twenty boys won SUNDAY WORLD medals in these 153 separate field days, and 157 banners were awarded to the school classes that won the greatest number of points in the games. Not less than a quarter of a million school children attended these meets and their enthusiastic applause stimulated their classmates to their best work on the track or in the field events. Twelve hundred teachers acted as officials of the games or aided in training the boys for the athletic contests. How completely these field days have become an institution of the schools, enlisting general interest in every classroom, is shown by the high percentage of the enrollment of boys in the games, as compared with a total membership of the school. In many cases it has, last year, exceeded 80 per cent. One instance is that of School No. 43, Brooklyn, in which 943 boys entered the field day games out of a total of 1,070 boys in the school. Meets in which as many as 500 boys competed were no exception last year, and there were more than fifty meets in which the entry list numbered more than 300. Following are some of the schools that had the largest number of boys in their games, the figures given being the actual numbers of competitors.

The grand final meet of the sixth season of SUNDAY WORLD Field Days was held at Curtis Field, on October 14, 1911. Fifteen hundred entries were received from the 153 elementary schools that held field days during the Spring of 1911, financed by the SUNDAY WORLD.

The final Sunday World's games for the seventh season were held at Curtis Field, New Brighton, Staten Island, October 13, 1912. More than 1,500 schoolboy athletes representing 157 schools of Greater New York competed, bringing the total for the seven years up to 235,000 competitors, of whom more than 23,000 have received Sunday World medals. The summaries of the meet follow:

Olympic Games of 1912.

The fifth revival of the Olympic games was held at Stockholm, July 6 to 15. In the track and field department—the real feature of the meet—the United States scored a splendid triumph, winning the games with 85 points, more than double that scored by any other country. The United States team scored 16 firsts; 12 seconds and 13 thirds in the Stadium games, and established eight of the thirteen new records made at the meet. There were a number of other contests held both in and outside the Stadium in some of which the American team had entries, including swimming, fencing, bicycle racing, wrestling, revolver and rifle shooting, yachting, tennis and football. The American team consisting principally of track and field athletes, sailed from New York City in the specially chartered Steamer Finland, on Friday, June 14, arriving at Stockholm some ten days later. With the exception of the Marathon runners the athletes lived aboard the steamer during the games, training in the Stadium before and during the meet. The American Olympic team of 1912 was considered by athletic experts to be the greatest aggregation of athletes ever gathered for an athletic meet in the history of an amateur track and field sport.

New York State Probation Commission.

The State Probation Commission, created by Chapter 430, Laws of 1907, consists of seven members. Four are appointed by the Governor for terms of four years each; one is appointed by the State Board of Charities from among its members; one is appointed by the State Commission of Prisons from among its members; and the State Commissioner of Education is a member *ex-officio*. Commissioners serve without compensation, but are entitled to necessary travelling expenses.

The general duties of the Commission are to exercise general supervision over the work of probation officers and to keep informed as to their work; to collect and publish statistical and other information as to the operations of the probation system; to inquire from time to time into the conduct and efficiency of probation officers, and when advisable to conduct a formal investigation of the work of any probation officer; to make recommendations and to secure the effective application of the probation system and the enforcement of the probation law in all parts of the State. The Commission makes an annual report to the Legislature showing its proceedings and the results of the probation system as administered in the various localities in the State, and making suggestions and recommendations. The Commission in the discharge of its duties has access to all offices and records of probation officers, and may direct formal investigation of the work of any probation officer.

President, Homer Folks, New York; Secretary, Arthur W. Towne. The Commission has its office in the Capitol, at Albany.

Travelers' Aid Society.

President—John Wanamaker. Vice-Presidents—Cardinal Farley, Dr. Francis Brown, Dr. Samuel Schulman. Treasurer—Samuel M. Taylor. General Secretary—Prin C. Baker. Headquarters, 328 East Forty-eighth Street, New York City.

The Travelers' Aid Society is a non-sectarian, protective organization incorporated under the laws of the State of New York to safeguard travelers, particularly women and girls, who by reason of inexperience, ignorance, illness, infirmity or other disability, are in need of assistance. It provides information, advice, guidance and protection to all travelers irrespective of age, race, creed, class or sex. It thereby relieves suffering and anxiety, and prevents error, wrong, extortion and crime at a time when the desired victim is most accessible. This service is free. The agents are not allowed to receive gratuities or fees.

Women agents of the society who speak the different languages, meet trains and steamers to aid and conduct inexperienced or confused travelers any hour of the day or night to their destination within the city, or to trains or steamers for other points. This protection is continued by co-operation with other societies or friends at terminal points until the traveler is known to have safely reached the proper destination. When necessary the society provides temporarily for the traveler at headquarters. Travelers' Aid agents are known by the official badge of the society.

The work is supported entirely by voluntary contributions and subscriptions from philanthropic persons and organizations who recognize the great work done by reaching the individual before there is need of rescue.

Pugilistic Champions and Receipts.

ALL attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that few such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at all unusual for a pugilist to be forced from one class into the next higher by growth and increased weight. The following list, dating from 1890, is generally accepted by critics and boxers as being the correct classification, although holders did not always win title from previous champions:

HEAVYWEIGHTS (over 158 lbs.)—1890-1892, John L. Sullivan; 1892-1897, James J. Corbett; 1897-1899, Robert Fitzsimmons; 1899-1906, James J. Jeffries; 1906-1908, Tommy Burns; 1908-1912, Jack Johnson.

MIDDLEWEIGHTS (158 lbs.)—1890-1897, Robert Fitzsimmons; 1897-1907, Tommy Ryan; 1907-1908, Stanley Ketchel; 1908, Bill Papke and Stanley Ketchel; 1908-1910, Stanley Ketchel; 1911-1912, claimed by Frank Klaus, Mike Gibbons and Ed. McGoorty.

WELTERWEIGHTS (145 lbs.)—1890-1892, no recognized champion; 1894-1896, Tommy Ryan; 1896-1897, "Kid" McCoy; 1898-1900, Billy Smith; 1900, "Rube" Ferns; 1901, "Matty" Matthews and "Rube" Ferns; 1901-1904, Joe Walcott; 1904-1908, "Dixie Kid"; 1908-1912, no legitimate claimants.

LIGHTWEIGHTS (133 lbs.)—1890-1894, Jack McAuliffe; 1894-1899, "Kid" Lavigne; 1899-1902, Frank Erne; 1902-1908, Joe Gans; 1908-1910, Battling Nelson; 1910-1911, Ad. Wolgast; 1912, Ad. Wolgast and Willie Ritchie.*

FEATHERWEIGHTS (122 lbs.)—1890-1892, no recognized champion; 1892-1897, George Dixon; 1897, Solly Smith; 1898, Solly Smith and Dave Sullivan; 1898-1900, George Dixon; 1900-1901, Terry McGovern; 1901-1904, "Young" Corbett; 1904-1908, Tommy Sullivan; 1908-1911, Abe Attell; 1911-1912, Johnny Kilbane.

BANTAMWEIGHTS (116 lbs.)—1890-1892, George Dixon; 1892-1894, no recognized champion; 1894-1898, Jimmy Barry; 1898-1901, no recognized champion; 1901-1903, Harry Forbes; 1903-1905, Frankie Nell; 1905-1907, no recognized champion; 1907-1912, Johnny Coulon.

* Ad. Wolgast lost lightweight title to Willie Ritchie at Daly City (near San Francisco), Cal., on November 28, 1912, by a foul in the sixteenth round.

Chess.

THE year 1912 was the most prolific in respect of international gatherings of the masters recorded in the annals of chess. Abbazia, where the play was restricted to the King's Gambit, San Sebastian, Breslau, Poestyen, Stockholm and Wilna followed each other in quick succession. It was a year of triumph for A. K. Rubenstein of Warsaw, the Russian champion, who carried off the first prize at San Sebastian, Poestyen and Wilna, and in addition shared the chief honors with O. S. Duras of Prague at Breslau. These were the only competitions Rubenstein took part in, and his transcendent successes have placed that master upon a pinnacle barely looked at occupied by Dr. Emanuel Lasker, World's champion. A match for the title may be below for with confidence in the year 1913. Rudolph Spielmann of Munich was the winner at Abbazia and Alexander A. Alechine of St. Petersburg was placed first at Stockholm. In view of this extraordinary series of contests, held abroad, which were in a way to have been crowned by the proposed New York-Havana Congress, announced to start in New York on November 30, and to conclude at Havana in January, it is the more deplorable that mismanagement caused it to end in a fiasco. With no cable matches or national tournaments to occupy the attention of American players, interest naturally centred in the doings of the foreign masters, among whom, however, one of the most active was F. J. Marshall, the United States champion. Columbia University won the twentieth intercollegiate tournament against Yale, Harvard and Princeton. The 13th tournament of the Triangular College League resulted in a tie between Cornell and the University of Pennsylvania. A King's Gambit Correspondence Tournament, with over 100 players and open to players in the United States and Canada, arranged by the American Chess Bulletin, for Professor Isaac L. Rice, donor of the prize fund, was begun in November and will last until May, when the final round will be started. Records for the year as follows:

C. H. Y. P. Tournament—Won by Columbia with 10½ to 1½. J. B. Beadle, 1½; S. H. Childs, H. A. Wise, and E. L. Gluck, each 3; second, Harvard, 8½ to 3½; third, Princeton, 3 to 9; fourth, Yale, 2 to 10. The record: Harvard, 9; Columbia, 8; Yale and Princeton each 1; tie, Harvard and Yale in 1909.

Triangular College League—Tie for first, Cornell and Pennsylvania, each 6 to 2; third, Brown, 0 to 3; Cornell—F. K. Perkins and A. C. Ehrlich, each 3 to 1. Pennsylvania—R. Sze, 3½ to ½, and M. J. Tettelbaum, 2½ to 1½. The record: Pennsylvania, 6; Cornell, 5; tie, Pennsylvania and Brown in 1906; Pennsylvania and Cornell in 1911.

The Confederate Veteran Camp of New York.

THE Confederate Veteran Camp of New York was organized April 11, 1890, incorporated December 5, 1911. Its object shall be to perpetuate the memories of our fallen comrades, to bury our dead and minister to the wants of the living who are needy and worthy Confederate soldiers and sailors, avoiding everything partaking of partisanship in religion or politics, and to lend our aid to the maintenance of law and order.

Commander—Gen. H. T. Douglas. Lieut.-Commander—Col. Powhatan Weisger. Adjutant—Capt. Clarence R. Hutton. Paymaster—Geo. C. Atkinson. Meetings held last Thursday of each month. Headquarters, Hotel Astor, New York City.

IMPORTANT CYCLING EVENTS.

At the world's championship meet at Newark, N. J., August 25-September 2, 1912, George Wiley, of Syracuse, N. Y., won the 100 kilometres motor-paced professional event; Frank L. Kramer, of East Orange, N. J., won the 1-mile professional sprint championship. The amateur motor-paced 100 kilometre championship was not run, and the 1-mile amateur sprint championship went to Donald McDougall of Newark. Paul Guignard holds the 100 kilometre paced record, made at Munich, September 15, 1909, in the time of 59m. 1s. Guignard also holds the 1-hour professional paced record, made the same time and place, of 63 miles 189.8 yards. At Munich, Guignard on July 23, 1909, rode 31 miles 1,198 yards in the half-hour (a record).

The amateur 1-hour motor-paced record is 56 miles, 1,128 yards, and was made by Francois Cuzin at Munich, September 30, 1909. Cuzin completed 100-kilometres in 1h. 5m. 45 2-5s. Oscar Egg, at Velodrome Buffalo, Paris, August 22, 1912, rode 26 31-100 miles unpaired in the hour. His time for 50 kilometres (31 1/4 miles), was 1h. 14m. 47 2-5s.

Arthur Van der Stuyt made 2-hour paced record at Leipzig, Germany, October 11, 1908, at 106 miles 1,498 yards. Joe Noe, of the Wheel Club of America, reduced the record from New York to Philadelphia and return to 13h. 58m. on August 22, 1910.

Six-day race, Toronto, Ont., October 22-27, 1912, eight hours a day. Final score—Root-Hehr, 970 miles 3 laps; Moran-Perchicot, 970 miles 3 laps; Mitten-Wells, 970 miles 3 laps; Grenda-Pye, 970 miles 3 laps; Cameron-Magin, 970 miles 3 laps; Ryan-Thomas, 970 miles 3 laps; Diefenbacher-Gardellin, 970 miles 2 laps; Drobach-Lawrence, 970 miles 2 laps.

Metropolitan District Cricket League defeated New York and New Jersey Cricket Association July 4, at Staten Island, 222 to 145.

Tour of Germantown C. C. of Philadelphia in Canada: Defeated Ottawa, Rosedale and Toronto, lost to Montreal.

Cambridge University defeated Oxford University at Lords, London, July 8-10, by 3 wickets.

Eton defeated Harrow at Lords by 6 wickets, July 12-13.

Philadelphia Cricket Club's tour in England: They won against Reigate Priory, August 5; against Royal Artillery, August 7-8; against Stoke Poges, August 9; drew with Mitcham, August 10; lost to Mr. J. R. Tildens XI., August 12-13; won against The Mote, August 14-15; lost to Folkestone, August 16-17; lost to Satton, August 21; won against Blackheath, August 22.

University of Pennsylvania won the Intercollegiate Championship.

The triangular tournament between England, Australia and South Africa resulted in a victory for England.

The Australian tour in the United States, Canada and Bermuda, was as follows: September 27-28 30, Gentlemen of Philadelphia 185-74, Australia 122-135, lost by 2 runs; October 1-2, New York, XV., 53-167, Australia 157-255 for 8 wickets declared, Australia won by 192 runs; October 4-6, Gentlemen of Philadelphia 237-81, Australia 101-262, Australia won by 45 runs; October 7-8, Philadelphia Colts, XXII., 187-130, 5 wickets, Australia 241, draw; October 12-14, All-Bermuda 66-91, Australia 112-102, won by 21 runs; October 21-22, Winnipeg, XV., 102-132, Australia 151-108 for 6 wickets, won by 4 wickets; October 26-28-29, British Columbia, XV., 110-94, Australia 395-253, Australia won by 444 runs.

BEST SCORES IN CRICKET.

H. Livingstone, of the Pittsburgh Field Club, established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago during August, 1907. A similar feat was performed by H. N. R. Corbett in Canada in a tournament held in Vancouver, British Columbia, in August, 1906.

H. V. Hordern, of the University of Pennsylvania, established a record for the United States and Canada by securing 213 wickets during 1907.

A. C. Maclaren scored 424 for Lancashire vs. Somerset at Taunton, Eng., July, 1895, the record in a first-class match. A. E. J. Collins, playing at Clifton, June, 1899, for Clarke's House vs. North Town, scored 628 not out, the record in any match. Melbourne University scored 1,094 against Essendon at Melbourne, 1898, the highest authenticated record. In a match between A. E. Stottart's English team and New South Wales 1,739 runs were scored, a record in first-class cricket. The longest partnership on record was 623 by Captain Oates and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service Corps at Cunnagh, 1895. In a small match in Australia in 1881, F. R. Spofforth bowled down all ten wickets of his opponents in each inning, a feat without parallel.

Best records in the United States and Canada are: G. S. Patterson's eleven, playing against A. M. Wood's eleven at Philadelphia, scored 689. J. B. King scored 344 not out for Belmont vs. Merion Team B in 1906. W. Robertson, 206 not out and A. G. Sheath, 118 not out, scored 340 runs in partnership without the loss of a wicket at San Francisco in 1894. Smallest score was Americans, 0, vs. Roseville at Guttenberg, N. J., in 1897. Largest score in the Metropolitan District Cricket League Championship, New Jersey Athletic Club, 385 for five wickets, vs. Manhattan, at Bayonne, N. J., 1897. Smallest score in the same series, Crescent Athletic Club, 4, against the New Jersey Athletic Club, 1896. J. Wisden, bowling for George Parr's English eleven vs. United States and Canada's twenty-two, in 1859, at Rochester, secured six wickets in six consecutive balls. F. J. Higgins, of Los Angeles C. C., scored seven centuries in 1912, a record for the United States and Canada.—Compiled by F. F. Kelly

Aviation.

CONTINUED progress in the science of aviation marked the year of 1912. The advancement, however, was along new and more useful lines than at any time since the Wright Brothers first flew in a motor-driven aeroplane in 1903. The heavier-than-air flier became an important factor in warfare and war equipment and to-day there is not a country or nation that does not include the monoplane and biplane as well as the dirigible balloon in its military and naval equipment.

Valuable service was rendered the armies engaged in the Italian-Turkish and the Greek-Turkish wars. Aeroplanes flew at great height over forts and encampments while sketches of positions were made and information conveyed to headquarters by wireless. Aviators of various nationalities were engaged by the rival armies and rendered services of a character never before attempted in warfare. A Russian aviator, Efimoff, flew over the besieged city of Adrianople dropping circulars printed in the Turkish language, demanding the surrender of the city. Later the Bulgars employed aviators and aeroplanes to drop fire bombs of Pyroxylin into the Turkish forts and quarters of Adrianople. Several of the aeroplanes were struck by bullets and shells and one aviator, Popoff by name, was reported as having been shot by the besieged marksmen.

Although the number of aeroplanes and licensed aviators was more than doubled during 1912 as against 1911, more attention was paid to the serious aspects of aviation than to the competitive or sporting side of flying. There were few long city to city races such as marked the preceding year abroad, and but one race of any importance in the United States. Military competitive tests, bomb dropping contests and cup flights opening for competition for a given period of weeks or months, were the principal features in this department of aviation. The secretary of the Aero Club of France, in his annual report for 1911, placed some startling figures in evidence regarding the progress made by one country alone last year. He stated that the distance flown was approximately 1,600,000 miles, while the fatal accidents were 26. He reports that 1,350 aeroplanes, totalling 80,000 horsepower, were constructed in France. The number of passengers carried was 12,000; time spent in the air, 30,000 hours; 1,400 motors were made and 8,000 propellers. It is reported that these figures were exceeded in 1912.

The hydroaeroplane continued to be developed and used for various on and over water flights. There were a number of race meets for this type of racing plane both in America and abroad. The hydro proved its value as an adjunct to the naval service, alighting on or alongside battleships and departing from the same in many instances. In France several prizes were offered for successful flights in human power driven aeroplanes. The accepted types were a combination of bicycle and plane. Two prize winning flights over hurdles 1 centimetre high and 1 metre apart were recorded. A cyclo-plane was used in both cases.

The annual aero exhibitions held in Paris, London and New York attracted thousands of interested spectators and manufacturers reported many sales. In the death of Wilbur Wright from natural causes, at Dayton, Ohio, on May 30, 1912, aviation lost one of its pioneers and greatest students. With his brother, Orville Wright, he was the first to fly in a heavier-than-air motor-driven plane and carried on his studies, inventions and progress in the science of aviation until a few weeks of his demise. A history of the Wrights' early flights, together with chronological data regarding the development of Aviation will be found in the 1909 and 1910 issues of THE WORLD ALMANAC. Owing to the condensed space of a book of this type, only the principal features and records are touched on for the year 1912.

MILITARY AVIATION.

Great progress has been made in the development of military and naval aviation, it having been demonstrated that the practical use of air machines in actual warfare is entirely feasible, and it is the general opinion that a nation not possessing this important auxiliary would be at a great disadvantage in war. The principal powers of the world are expending large sums for flying machines and air ships and their management. Less attention is paid to dirigible balloons than to flying machines of the various types on account of the greater cost and risk of the former.

The following are the estimated expenditures during the present year for military and naval aviation by the countries named: England, \$1,561,700; France, \$6,208,000; Germany, \$1,455,000; Russia, \$4,850,000; United States, \$140,000.

The following table gives the number of air machines owned and in use by the principal governments according to the latest reports available:

	Great Britain.	France.	Germany.	Russia.	Italy.	Japan.	United States.

* The United States will have 10 additional flying machines by July 1, 1913.

AEROPLANE-HYDROAEROPLANE-BALLOON RACES 1912.

INTERNATIONAL SPEED RACE.

The fourth annual International James Gordon Bennett Speed Cup race was held at Chicago, September 9, 1912, and was won by J. Vedrines, representing France. The distance was 124.8 miles, consisting of 30 laps of 4.14 miles each. Vedrines flew at the rate of 105.5 miles per hour. His fastest lap was done in 2m. 17.95s. The first race was held in 1909 and was won by Glenn Curtiss, who flew the twenty kilometres (12.4 miles) in 15m. 50 2-5s. at an average speed of 47 miles per hour. In 1910 the winner was Grahame-White, who covered 100 kilometres (62 miles) at Belmont Park, L.I., in 60m. 47 3-5s., an average speed of 61.3 miles per hour. In 1911 the winner was C. T. Weymann, who covered 94 miles at Eastchurch, England, in 1h. 11m. 36 1-5s., an average of 78.77 miles per hour. There were 13 entries for the 1912 race, but only the French team consisting of Vedrines, Prevost and Frey started. The result of the race was as follows:

Protection of the Army and Navy Uniform.

AN act of Congress approved March 1, 1911, entitled "An act to protect the dignity and honor of the uniform of the United States," provides: "That hereafter no proprietor, manager or employe of a theatre or other public place of entertainment or amusement in the District of Columbia or in any Territory, the District of Alaska or Insular possessions of the United States, shall make or cause to be made any discrimination against any person lawfully wearing the uniform of the Army, Navy, Revenue Cutter Service or Marine Corps of the United States, because of that uniform, and any person making or causing to be made such discrimination shall be guilty of a misdemeanor, punishable by a fine not exceeding five hundred dollars."

Principal Battleships of Naval Powers.

(Compiled from the latest authentic sources of official information. Only the principal and more modern battleships are given. Most of the principal powers possess powerful armored cruisers equal to or in greater number than battleships, and in addition many vessels of smaller and older types.)

Following Great Britain, the first naval power, Germany now ranks second, the United States third, France fourth, Japan fifth, Russia sixth, Italy seventh, and Austria eighth.

Military Order of the Serpent.

THE Military Order of the Serpent is a secret social organization founded upon facts and is of historical interest. "A corporation not for profit" founded at Cleveland, Ohio, January 1, 1904, by Fred Manning and Walter Scott MacAaron and incorporated under the laws of Ohio, August 6, 1907. It consists of the Supreme Lalr of the United States and a number of Grand Lalrs with Local Lalrs owing allegiance to them. Having spread with great rapidity it now maintains flourishing Grand Lalr organizations in the following States and Territories: Ohio, New York, Colorado, Massachusetts, Pennsylvania, New Mexico, Missouri, Minnesota, Montana, New Jersey, Washington, Illinois, Vermont, California, Rhode Island, Wyoming and the Philippines.

Its objects and purposes are: "To maintain a secret social society to perpetuate the memories of the war with Spain, the incident struggle in the Philippines, the China Relief Expedition; for literary purposes connected with these wars, as well as to more firmly establish good fellowship among the comrades of the United Spanish War Veterans. No person not a member of that body in good standing is eligible to its membership.

COST OF THE BRITISH ROYAL FAMILY.

The annuities paid by the British people to the royal family for its support are as follows: The King and Queen, \$2,350,000; Queen Alexandra, \$350,000; Princess Christian, \$30,000; Princess Louise (Duchess of Argyll) \$30,000; Duke of Connaught, \$125,000; Duchess of Edinburgh, \$30,000; Princess Beatrice, \$30,000; Duchess of Albany, \$30,000; Duchess of Mecklenburg-Strelitz, \$15,000; Trustees for King Edward VII's Daughters, \$90,000; Total, \$2,790,000. The King also receives the revenues of the Duchy of Lancaster. During recent years these have amounted to about \$350,000 per annum. The Prince of Wales has an income also from the revenues of the Duchy of Cornwall, amounting to about \$500,000 per annum. When the royal children marry dowries are usually provided for them. The last of the children of the late Queen Victoria to marry, Princess Beatrice, received \$150,000 as dowry from the British people by Parliamentary grant.

Reigning Families OF THE PRINCIPAL EUROPEAN COUNTRIES.

AUSTRIA-HUNGARY.

Francis Joseph I., the Emperor of Austria and King of Hungary, was born August 18, 1830, and was proclaimed Emperor of Austria after the abdication of his uncle, Ferdinand I., on December 2, 1848. He was crowned King of Hungary June 8, 1867. He married, in 1854, Elizabeth, a daughter of Duke Maximilian of Bavaria. She died by the hand of an Anarchist in Geneva, September 10, 1898. They had issue:

1. Archduchess Gisela, born 1856; married to Leopold, son of the Regent Luitpold of Bavaria. Issue, two daughters and two sons.

2. Archduke Rudolph, late heir-apparent, born 1858; died by suicide, 1889. He married, 1881, Stephanie, daughter of the late King of the Belgians, and had issue one daughter, the Archduchess Elizabeth, born 1883; married, 1902, Prince Otto Windisch Grätz. The widowed Crown Princess Stephanie married, March, 1900, Count Elemér Lonyay.

3. Archduchess Marie Valerie, born 1868; married, 1890, Archduke Francis-Salvator of Tuscany. The Emperor's eldest brother was Archduke Ferdinand (Maximilian), Emperor of Mexico, from 1864 to 1867, when he was shot at Queretaro. His widow, Charlotte, survives him.

On the death of the Crown Prince, in 1889, the right of succession to the throne passed to the Emperor's second brother, the Archduke Charles Louis, who was born 1833, and died 1896; he married, 1862 (second marriage), the Princess Annunziata, daughter of King Ferdinand II. of Naples, and had issue the Archduke Francis Ferdinand, born 1863, who is the heir-presumptive to the throne (married,morganatically, 1900, Countess Sophie Chotek, who had title Duchess of Hohenberg conferred upon her October, 1909, and renounced the claim of his issue by her to the throne); the Archduke Otto, born 1865, died 1906, married to the Princess Marie Josefa of Saxony, had two sons (Archdukes Charles, born 1887, married, 1911, Princess Zita of Parma, and Maximilian, born 1895); the Archduke Ferdinand, born 1868, renounced his rights in 1911 to marry Berta Czuber, and the Archduchess Margaret Sophia, born 1870, died 1902; she married in 1893 Albert, Duke of Württemberg. By a third marriage, the Archduke Charles Louis had two daughters.

The Emperor has a third brother, the Archduke Louis Victor, born 1842, who is unmarried. There are over eighty other archdukes and archduchesses of Austria, cousins of the Emperor, collateral relatives of the reigning house and members of the formerly reigning branches of Tuscany and Modena.

BAVARIA.

Otto, King of Bavaria, was born April 27, 1848, and succeeded his brother, Ludwig II., June 13, 1886, when that mad monarch committed suicide by drowning himself in the Starnberg Lake. Otto is also crazy, is shut up in one of his châteaux, and the kingdom is governed by Prince Luitpold, his uncle, as regent. The latter is also the heir apparent to the throne; was born in 1821; married, 1844, the Austrian Archduchess Augusta of Tuscany, who is dead, and has four children:

1. Prince Louis, born 1845; married the Austrian Archduchess Maria Theresa, and has six daughters and four sons, the eldest of the latter being Prince Rupert, born 1869, and married, 1900, his cousin, Duchess Marie Gabrielle of Bavaria; has three sons, Luitpold, Albrecht and Rudolf, and a daughter.

2. Prince Leopold, born 1846; married to the Austrian Archduchess Gisela, daughter of the Emperor Francis Joseph I. There are two daughters and two sons.

3. Princess Theresa, born 1850; prioress of a convent in Munich.

4. Prince Arnulf, 1852, married the Princess Theresia of Lichtenstein, and died 1907, leaving a son, Prince Henry.

King Otto has five cousins who bear princely titles, children of his dead uncle, A. Dalbert.

The royal house of Bavaria comes from the Counts of Wittelsbach of the twelfth century, one of whose descendants was elevated to the rank of Elector, and a later one made King by Napoleon I.

BELGIUM.

Albert I., King of the Belgians, was born April 8, 1875, and was the nephew of the late King Leopold II., who died December 17, 1909. King Albert married, October 11, 1900, Duchess Elizabeth of Bavaria, and has two sons, Prince Leopold, born 1901, and Prince Charles, born 1903, and a daughter, Princess Marie José, born 1906.

The last surviving granduncle of the Emperor, Grand Duke Michael, born 1832, died in 1910. He married, 1857, Princess Cecilia of Baden, and had issue six children, the eldest daughter, Anastasia, born 1860, being the widow of the Grand Duke of Mecklenburg-Schwerin and mother of the German Crown Princess Cecilia.

The Russian reigning family is descended in the female line from Michael Romanoff, elected Czar in 1613. The members of the family for over two centuries, however, have married so generally into the German royal houses that the present Romanoffs are practically, by blood, Germans; as much so as their kinsman, the head of the German Empire.

SPAIN.

Alphonso XIII., King of Spain, born May 17, 1886, nearly six months after the death of his father, Alphonso XII. His mother is Maria Christina, an Austrian princess. He married in 1906 the English Princess Victoria Eugenie, daughter of Princess Henry of Battenberg, youngest sister of King Edward VII. He has two sons, Alphonso, Prince of the Asturias, heir to the Spanish throne, born the 10th of May, 1907, and Prince Jaime, born at La Granja Palace, near Madrid, on the 22d of July, 1908, and two daughters, Princess Beatrice, born the 21st of July, 1909, and Princess Maria Cristina, born in Madrid December, 1911.

The King's only sister, the Infanta Maria Teresa, born in 1882, and married to the Infante Ferdinand of Bavaria, her cousin, son of Prince Louis of Bavaria, died on September 23, 1912, suddenly from the after effects of childbirth, leaving two sons and two daughters, the Infante Alfonso Luis Fernando, born in 1906, the Infante José Carlos, born in 1909, and the Infanta Maria de las Mercedes, born in 1911, and the Infanta Paz Cristina Teresa, born in 1912, when her mother died.

The King's aunts are the Infantas Isabella, widow of the Count de Argenti; Paz, wife of Prince Louis of Bavaria, and Eulalie, wife of Prince Antonio of Orleans (separated from him by deed of separation), who visited the United States and the World's Fair in 1893.

The King's grandmother, ex-Queen Isabella, born in 1830, crowned 1833, abdicated 1870, died April 9, 1904. Her husband, the Infante Francis d'Assisi, born 1822, died in 1902.

The King's grandaunt, the Infanta Louisa, widow of the Duke of Montpensier (son of King Louis Philippe of France), now dead, was the mother of a son and three daughters: 1. The wife of the late Count of Paris and mother of the French pretender, the Duke of Orleans; 2. The late Queen Mercedes, wife of Alphonso XII., deceased; 3. The Infanta Cristina, also deceased.

A second cousin of the King was Don Carlos, born 1848, the pretender to the Spanish throne, who died July 18, 1909, leaving a son, Prince Jaime, born 1870, the present pretender, and four daughters.

The Spanish reigning family are Bourbons, descendants of King Louis XIV. of France.

SAXONY.

Frederick August. King of Saxony, born May 25, 1865, succeeded his father, King George, October 15, 1904. He married in 1891 Archduchess Louise of Austria (from whom he was separated in 1903). The King has three daughters and three sons, the Crown Prince being George, born 1893.

The King has two sisters, Mathilde, born 1863, unmarried, and Maria Josepha, born 1867, married first to Duchess Isabella of Württemberg (died 1904), and in 1906 to Princess Maria Immaculata of Bourbon, and Max, born 1870, a priest in Holy orders.

The royal house of Saxony is one of the oldest in Europe, having given an emperor to Germany as early as the beginning of the tenth century. The Elector of Saxony assumed the title of King in 1806; and was confirmed therein in 1815.

SERVIA.

Peter I., King of Servia, born in Belgrade, 1846, son of Alexander Karageorgjevic, Prince of Servia from 1842 to 1858. Was proclaimed King on the night of June 10-11, 1903, by the officers of the Servian Army after they had murdered King Alexander and Queen Draga, and was crowned in October, 1904. King Peter I. was married in 1883 to Princess Zorka of Montenegro, who died in 1890. He has two sons and a daughter—George (who renounced his right to the throne in 1909), Alexander and Helen, who married, 1911, Grand Duke Ivan of Russia.

King Peter is descended from Karageorg, a peasant, who was the leader of the insurrection against Turkey in 1804. He reigned as Prince of Servia from 1804 to 1813, when he was supplanted by the Obrenovic during a second insurrection.

SWEDEN.

Gustaf V., King of Sweden, born June 16, 1858; son of Oscar II., and great-grandson of Marshal Bernadotte. He married, 1881, the Princess Victoria of Baden, and has had three sons, the eldest of whom is the Crown Prince Gustav Adolph, who married, in 1905, Princess Margaret of Connaught, and has three sons, born 1906, 1907 and 1912, and a daughter, born in 1910. The King's other sons are: Prince Wilhelm, born 1884, and married, 1908, the Grand Duchess Maria Pavlovna of Russia, and Prince Eric, born 1889. The King has three brothers: Prince Oscar, born 1859, married Lady Ebba Munck, one of his mother's maids of honor, and relinquished his rights to the throne; Prince Carl, born 1861, and married, 1897, Princess Ingeborg, eldest sister of the late King of Denmark, and Prince Eugene, born 1865. The King has a cousin, Louise, married to the late King Frederick VIII. of Denmark. The royal family comes from Napoleon's Marshal Bernadotte, a Frenchman, who was elected heir-apparent to the crown of Sweden in 1810 and became King in 1818.

WÜRTTEMBERG.

William II., King of Württemberg, born February 25, 1848, succeeded his uncle, King Charles I., October 6, 1891. He married, 1877, Princess Marie of Waldeck, who died leaving a daughter, Pauline, born 1877, and married, 1898, Prince Frederick of Wied. The King married, second, Princess Charlotte of Schaumburg-Lippe, by whom he has no children. As the King has no male descendants, the heir-presumptive is his distant kinsman, Duke Albert, born 1865, married to the Archduchess Margareta, niece of the Emperor of Austria, who died in 1902, and has three sons and three daughters.

The French Pretenders.

BONAPARTIST.

Or the Emperor Napoleon I. and his brothers Joseph and Louis, male issue is now extinct. The Emperor's brothers Lucien and Jerome are represented by the following living descendants, and they constitute the present Imperialist house of France:

Prince Victor Napoleon (of the house of Jérôme), born July 18, 1862, is the son of the late Prince Napoleon (who died March 18, 1891) and the Princess Clotilde, who died June 25, 1911, sister of the late King Humbert of Italy. The Prince has been recognized by his party as the undisputed head of the Bonaparte family. He lives in Brussels and in 1910 married Clementine, third daughter of Leopold I., King of Belgium. His only brother, Prince Louis Napoleon, born 1864, is a General in the Russian Army, and is unmarried. His sister, Princess Letitia, born 1866, is the widow of Prince Amadeus of Italy, her own uncle, by whom she had a son, Prince Humbert, born 1889.

The late aunt of Prince Victor Napoleon, the Princess Mathilde, born 1820; married, 1840, Prince Demidoff of Russia; died in 1904 without children.

Prince Charles Napoleon, brother of the late Cardinal Bonaparte, who died February 12, 1899, was the last representative of the eldest son of Napoleon's brother Lucien, in the male line. He was born 1839; was married and had two daughters—Marie, wife of Lieutenant Gottl, of the Italian Army, and Eugénie, unmarried. He had three sisters, married respectively to the Marquis of Roccagiovina, Count Primoli and Prince Gabrelli, who have descendants.

Prince Roland Bonaparte is the only living male cousin of Prince Charles Napoleon. He is a son of the late Prince Pierre Napoleon Bonaparte; was born 1858; married, 1880, the daughter of Blanc, one of the proprietors of the Monte Carlo gambling-hell. His wife died in 1882, leaving him a daughter, who is married to Prince George of Greece. He has one sister, Jeanne, born 1861, and married to the Marquis de Villeneuve, who died in 1910.

Ex-Empress Eugénie, widow of Emperor Napoleon III., was a daughter of Count Cyprien de Montijo, a Spanish grandee, and was born May 5, 1826. She married 1853. Became a widow, 1873. Her only son, Prince Louis Napoleon, was killed in Zululand in 1879.

BOURBON-ORLEANIST.

Philippe, Duke of Orleans, born 1869, succeeded his father, the late Count of Paris, in 1894, as the head of the royal family of France. He married, in 1896, the Archduchess Marie-Dorothea, daughter of the Archduke Joseph, cousin of the Emperor of Austria. His mother (still living) was the Spanish Infanta Louise of Montpensier, and he has one brother, the Duke of Montpensier, and four sisters—Princess Amélie, married the late King Charles of Portugal; Helena, married to the Duke of Aosta, nephew of the late King Humbert of Italy; Isabel, married to the Duke of Guise, son of the Duke of Chartres, and Louise, married to Prince Charles of Bourbon, grandson of King Ferdinand II., of Naples.

The only uncle of the Duke of Orleans is the Duke of Chartres, born 1840, and married to a daughter of the Prince of Joinville. The issue are two daughters and two sons, the eldest son being Prince Henry, born 1867 (died at Saigon, Cochinchina, in 1901); the second, the Duke of Guise; the eldest daughter, Princess Marie, being married to Prince Waldemar of Denmark, and the second daughter, Princess Marguerite, being married (in 1896) to Patrice MacMahon, Duke of Magenta.

The granduncles of the Duke of Orleans (who were the sons of King Louis Philippe) are all dead. They were the Prince of Joinville, born 1818, died 1900, married to a daughter of Pedro I. of Brazil, and had one daughter who married the Duke of Chartres, and had one son, the Duke of Penthièvre, born 1845; Henry, Duke of Aniane, born 1822, died (childless) 1897; Anthony, Duke of Montpensier, born 1824, died 1890 (married, 1852, a sister of Queen Isabella of Spain, and had a daughter, the wife of the Count of Paris, and a son, Prince Anthony, born 1866, who married, 1888, his cousin, the Infanta Eulalie of Spain), and Louis, Duke of Nemours, born 1814, died 1896. He was the father of two daughters, the Princess Cratortorska, deceased, and Princess Blanche of Orleans, and two sons, the eldest being the Count of Eu, born 1842, married to a daughter of Pedro II. of Brazil, and having three children, and the second the Duke of Alençon, born 1844, and married to a Bavarian princess (who was burned in the Paris bazaar fire in 1897), and having two children.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the younger, or Orleans, line.

The British Parliament.

THE supreme legislative power of the British Empire is, by its constitution, vested in Parliament. This body consists of two houses, the Lords and the Commons.

THE HOUSE OF LORDS.

The House of Lords is composed of the whole Peerage of England and of the United Kingdom, and of certain representative Peers of Scotland and Ireland, but many members of these latter have also English titles which give them seats in the House. The Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Viscount Leinster. The House at present consists of 3 Princes of the Blood, 2 Archbishops, 22 Dukes, 24 Marquises, 128 Earls, 47 Viscounts, 24 Bishops, 348 Barons, 16 Scottish Representative Peers elected for each Parliament, and 28 Irish Representative Peers elected for life—in all, 642 members.

The Lord Chancellor of England is the Speaker of the House of Lords.

The Swiss Government.

THE FEDERAL COUNCIL is elected tri-annually (re-elections are in vogue) by Congress. Members for the period ending December 31, 1912, are as follows: Messrs. Perrier, E. Müller, A. Hoffmann, Molta, Decoppet, L. Forrer, Schulthess.

The Federal Council is the chief executive body of the confederation, and acts as a unit. Its members are the directors of the respective departments of Interior, Justice, Military, Finance, Commerce, Post and Railroads. The chairman of the Federal Council is the nominal President of Switzerland. *President*—1912, M. Forrer. *Vice-President*—M. Müller. The vice-president will doubtless be president in 1913. The members take this office in rotation. The president is the chief of the Department of Foreign Affairs.

NATIONAL ASSEMBLY—189 members. Groups: 114 Radical-Democrats, 38 Roman Catholic Conservatives, 15 Socialists, 13 Centrum, 5 Social-Political, 4 "Wild." They are elected by the people.

NATIONAL STATE COUNCIL—2 from each canton. The elections are under cantonal regulation.

MILITARY—*Chief of Department*—Federal Councillor Hoffmann. *Chief of General Staff*—Corps Commander T. Sprecher von Bernegg.

President of the Supreme Court of Switzerland—Dr. V. Merz.

The Portuguese Government.

The permanent President of the Republic of Portugal is Manuel de Arriaga, elected in August, 1911. The new ministry has been constituted as follows: *Premier and Minister of the Interior*—Duarte Leite; *Minister of Justice*—Carrela de Lemos; *Minister of Finance*—Vincenti Ferreira; *Minister of Public Works*—Doctor Costa Ferreira; *Minister of War*—Colonel Carrela Barreto; *Minister of Marine*—Fernandez Costa; *Minister of the Colonies*—Cerveiral Albuquerque e Castro; *Minister of Foreign Affairs*—Augusto de Vasconcelos. During 1911 the United States and most of the European nations officially recognized the republic. A rising in northern Portugal in the Autumn in favor of the restoration of the monarchy was easily suppressed. Ex-King Manuel in the meanwhile is residing in England. Another rising in favor of the restoration of the monarchy was suppressed in the Summer of 1912. Nevertheless the Republic does not appear to rest on a very solid foundation.

* Egypt and the Egyptian Soudan, although nominally under the suzerainty of Turkey, are really controlled by Great Britain, and it is only a matter of time as to when they will be incorporated into the British Empire. Adding Egypt and the Soudan to the British Empire would increase the figures above given to 3,700,000 square miles and 54,000,000 population. † The war between Turkey and Bulgaria and its allies may cause further changes.

The remaining territory of Africa unoccupied is a part of the great Desert of Sahara and the Independent States of Abyssinia, Morocco and Liberia. Even this territory, except the last, is destined to pass under the power of the Europeans. The figures are from "Whitaker's Almanack."

The Union of South Africa.

A FEDERATION of four British Colonies in South Africa, namely, the Cape of Good Hope, Natal, the Transvaal and Orange Free State, was formed provisionally in 1909 by a convention held at Capetown. The federation was confirmed by an act passed by the British Parliament August 16, 1909, and the date appointed for the establishment of the Union was fixed for May 31, 1910. Viscount Gladstone was appointed Governor-General and assumed office on that date.

The act of Union vested the executive government in the King and his successors, a Governor-General advised by an executive council and ministers of state. Legislative power was vested in a Parliament composed of the King, a Senate of forty members, eight nominated for ten years by the Governor-General in council, and eight for each original province elected for ten years by the two houses of the Colonial legislature sitting together, and a House of Assembly, consisting of members chosen as follows: From the Cape of Good Hope, 51; Natal, 17; Transvaal, 36; Orange Free State, 17. The Governor-General has the power to summon, prorogue and dissolve Parliament, and that body shall sit annually.

Provision is made for an Administrator for each province for five years, appointed by the Governor-General, and a provincial council elected for three years.

Pretoria, in the Transvaal, is the seat of Government of the Union, and Cape Town the meeting place of Parliament. The English and Dutch languages are both official. It is provided that the British South African Company's territories may be received into the Union and the government of native territories may be transferred to the Union Government.

The area of the Union of South Africa is as follows, in square miles: Cape of Good Hope, 276,995; Natal, 35,371; Transvaal, 110,426; Orange Free State, 50,392. Total Union, 473,184.

The population is as follows: Cape of Good Hope, 2,563,024; Natal, 1,191,958; Transvaal, 1,676,611; Orange Free State, 526,906. Total Union, 5,958,499.

The Commonwealth of Australia.

THE Commonwealth of Australia consists of the six original Australian colonies: New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania. Each of these is a self-governing State, except as to the powers reserved to the Confederation. The Commonwealth of Australia was proclaimed at Sydney, January 1, 1901. Legislative power is vested in a Federal Parliament, consisting of the King—represented by a Governor-General—a Senate and a House of Representatives. The Senate consists of thirty-six Senators—six for each State—chosen for six years. The House of Representatives consists of seventy-five members, distributed as follows: New South Wales, 27; Victoria, 22; Queensland, 9; South Australia, 7; Western Australia, 5; Tasmania, 5.

The legislative powers of the Federal Parliament embrace commerce, shipping, finance, defence, post-office, telegraph, census and statistics and conciliation and arbitration in industrial disputes extending beyond the limits of any one State. Authority is given to the Commonwealth to assume jurisdiction regarding railways, light-houses, marriage and divorce, and emigration and immigration. The executive power is vested in the Governor-General, assisted by an Executive Council of responsible ministers. There is also a Federal Judicature. The present seat of government is at Melbourne, the Federal capital (Yas Canberra) being in process of building. The area of the Commonwealth, with the Territories (Northern Territory, Papua), and Federal District (Yas Canberra), is 3,063,234 square miles, and the population (census, 1911) is 4,805,005.

Each of the States has its own Parliament, Governor, Ministry and Judiciary.

*Land and water included in area. † Alberta and Saskatchewan were erected into provinces in 1905. By the Extension act of 1912, the area of Ontario was increased by 146,400 square miles, Quebec by 354,961, and Manitoba by 178,100.

High Commissioner to London, England, Lord Strathcona and Mt. Royal, G. C. M. G. Salary, \$10,000. The Dominion of Canada has an area of 3,729,665 square miles (excluding the Hudson Bay, the Gulf of St. Lawrence and all tidal waters) and comprises one-sixteenth of the land surface of the globe. It is the largest of all the British possessions, Australia, the next in size, containing 2,946,691 square miles. The Government of Canada is federal, centred at Ottawa, which city is the capital of the Dominion, while the provinces have their respective local Legislatures. The head of the Federal Government is the Governor-General, appointed by the King of Great Britain, and holding office for five years, his salary being paid by the Dominion Government.

The Lieutenant-Governors of the several provinces are appointed by the Federal Government for a term of five years. The Legislatures are elected by the people of each province. The highest Court in the Dominion is the Supreme Court, composed of a Chief Justice and five Judges, each of whom receives a salary of \$9,000 per annum, except the Chief Justice, who is paid an additional \$1,000. From the decisions of this Court the only tribunal to which appeal can be made is to the Judicial Committee of the Imperial Privy Council of Great Britain. The only other Federal Court is the Exchequer Court, presided over by a single Judge, for trying cases connected with the revenue. Salary \$8,000. All others are of a provincial character, limited to jurisdiction in their respective provinces only.

FINANCES.

Revenue (financial year ending March 31, 1912), \$136,108,217 of which \$85,051,872 was from customs, \$19,261,662 from excise, \$10,492,394 from post-office, \$11,651,947 from public works, including Government railways; miscellaneous, \$9,650,342. The revenue in 1911 amounted to \$117,780,410, and in 1910 it was 101,503,711.

The expenditure on account of consolidated fund was \$98,161,441, of which \$12,259,397 was for interest; 4,774,678 for civil government; \$1,300,514 for administration of justice; \$2,439,807 for legislation; \$2,128,242 for light-house and coast service; \$1,904,514 for mail subsidies and steamship subventions; \$1,756,565 for Indians; \$843,857 for fisheries; \$679,069 for department of mines and scientific institutions; \$2,771,636 for arts, agriculture and statistics; \$7,580,600 for militia and defence; \$10,996,041 for public works; \$10,281,045 for subsidies to provinces; \$9,172,035 for post-office; \$13,093,469 for railways and canals; \$2,443,846 for collecting customs revenue; \$1,128,908 for ocean and river service; \$1,365,000 for immigration; \$696,663 for mounted police; \$1,901,494 for naval service.

DOMINION OF CANADA—Continued.

NATIONAL DEBT.

The gross public debt of Canada on March 31, 1912, amounted to \$508,338,592. The total assets counted against gross public debt amounted to \$168,419,131.

DEFENCE.

Every Canadian citizen is liable to service in the Militia from the age of 18 to that of 60. Militiamen are enrolled for three years to the "Active" Militia. The actual training varies in length, according to the branch of the service, from 12 to 16 days.

It is provided that if the embodiment of the Militia becomes necessary, the men, both active and reserve, would be called out in four classes or levies; first, the unmarried men and widowers (without children) from 18 to 30; secondly, the unmarried men and widowers (without children) from 30 to 45; thirdly, the married men and widowers (with children) from 18 to 45; fourthly, all the remaining men up to 60. In the case of a levée en masse, all male inhabitants capable of bearing arms may be required to serve without regard to age, class or distinction.

The active Militia includes the "Permanent Force," which furnishes the personnel of the training schools, and some nucleus units of garrison artillery, etc. There are various schools of military instruction which are established in the six divisional areas and the three military districts into which Canada is now divided. A proportion of the officers are trained at the Royal Military College at Kingston. Total active Militia in 1912 was:

The present Constitution of Mexico bears date February 5, 1857, with subsequent amendments. By its terms Mexico is considered a Federative Republic, divided into States, nineteen at the outset, but at present twenty-seven in number, with three Territories and one Federal District, each having a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the Federal Government are divided into three branches—the legislative, executive, and judicial. The legislative power is vested in a Congress, consisting of a House of Representatives and a Senate; the executive in a President, and the judicial in Federal Courts. Representatives elected by the suffrage of all male adults, at the rate of one member for 40,000 inhabitants, hold their places for two years. The qualifications requisite are to be twenty-five years of age and a resident in the State. The Senate consists of two members from each State, of at least thirty years of age, who hold their places for four years. Senators are elected indirectly, half of them being renewed every two years. The members of both Houses receive salaries of 3,000 pesos each a year.

The President is elected by electors popularly chosen in a general election and holds office for six years. According to the last Amendment of the Constitution, it prohibits his re-election. In case of his sudden disability, the Vice-President, who is also permanent President of the Senate, officiates in his place. Congress holds two regular sessions annually, from September 16 to December 15, and from April 1 to May 31, and a permanent committee of both Houses sits during the recesses.

COMMERCE.

Value of imports year ended June 30, 1911, was \$96,006,883, a decrease of \$1,426,007 from the previous year. Value of exports, year ended June 30, 1911, was \$147,451,968, an increase of \$17,428,833 over the previous year.

ARMY AND NAVY.

President Madero in his message to Congress (September 16, 1912) states that the full strength of the army is 107 generals, 6,236 officers and 49,332 men.

There are six gunboats of from 1,000 to 1,300 tons, armed with rapid-firing four-inch guns and with rapid-firing six-pounders; a transport of 1,600 tons, armed with 57 mm. guns; another transport of 900 tons; two training ships, one of steam, 1,300 tons, armed with 12 cm. and 57 mm., and the other, a sailing ship of 700 tons. There are, also, several small revenue cutters watching the coast on both oceans; a naval school, a navy-yard, a floating dock at Vera Cruz, a dry-dock at Salina Cruz and a shipyard at Guaymas. The Military School is at Chapultepec.

NATIONAL DEBT.

According to the report of the Under Secretary of Finance to the Mexican Congress on December 14, 1910, the public debt for the fiscal year 1909-10 was as follows: Debt payable in foreign currency, face value of bonds in circulation, \$150,262,498.01; debt payable in Mexican currency, face value of bonds in circulation, \$68,925,066.85; floating debt, uncollected balances of past budgets, \$136,699.37. Grand total, \$219,324,264.23.

INTERNAL IMPROVEMENTS.

Miles of railway in operation, 16,000; miles of telegraph line, 50,000; post-offices, 2,964. This information about Mexico was furnished by the Pan-American Union, Washington, D. C.

Brazil.

President.....HERMES DA FONSECA

The Republic of the United States of Brazil is the largest of the South American countries and the second largest of the American Republics, extending over an area of 3,218,130 square miles, or about 400,000 square miles less than the United States of America with Alaska. It is situated between latitude 4° 22' north and 33° 45' south and longitude 34° 40' and 73° 15' west, and has a population of 20,515,000, equal to 6.4 per square mile, or about one-fifth the population per square mile of the United States of America proper (29.6). A new census was taken in December, 1910. The language of the country is Portuguese.

Under its constitution Brazil is a federal union of States, republican and representative. The Union is composed of twenty-one States, one national territory and the Federal district. The peace strength of the regular army is 30,000, but as every Brazilian citizen between twenty-one and forty-five years of age is liable to military service the war strength of the Republic probably exceeds 300,000 men. The navy consists of thirty-one vessels, among which are three battleships, four protected cruisers and fifteen torpedo gunboats.

The gross receipts of the Government from all sources in 1909 were \$165,508,766, and the expenditures \$177,812,425. The foreign debt amounts to \$440,000,000. The total length of railroads in operation in Brazil at the close of December, 1911, was 13,753 miles. There are 3,246 post-offices, 2,000 telegraph offices and 18,874 miles of telegraph lines. The primary schools of the Republic number 11,147 with 565,922 pupils and the secondary schools 327 with 30,258 pupils.

Argentina.

President.....DR. ROQUE SAENZ PENA

Argentina, the third largest of the American Republics, is situated between latitude 22° and 56° south and longitude west of Greenwich 53° and 57°, being bounded by the Republics of Chile, Bolivia, Paraguay, Brazil, Uruguay, and the Atlantic Ocean. It has an area of 1,135,840 square miles, equal to about two-fifths the total area of the United States of America proper, and a population of more than 7,500,000.

It is a Federal Republic of fourteen provinces, ten Territories and one Federal district. The provinces and Federal district are represented in the National Congress, composed of a Senate and Chamber of Deputies. The permanent army numbers about 20,000 men, and there is a reserve army of trained men of about 150,000. The navy aggregates over thirty vessels, of which three are battleships, four armored cruisers and three protected cruisers.

The government revenue in 1909 was \$120,791,624 gold, and the expenditures \$112,101,733 gold. The public debt was \$447,000,000 gold. The total length of railroads in operation at the close of 1910 was 17,181 miles, representing a capitalization of \$1,010,800,000. There were 1,806 post-offices, 613 telegraph offices and 36,716 miles of wire. There were in 1910 5,321 public schools for primary instruction, with an enrolment of 1,200,212 pupils, aside from the numerous schools supported by the provinces.

Chile.

President.....RAMON BARROS LUCE

The Republic of Chile extends over more than thirty-eight degrees of latitude, from 17° 57' to 55° 59' south, stretching from the Sama River to Cape Horn, and occupying a long, narrow strip of land between the Andean Mountain range and the Pacific Ocean, with a coast line of 2,625 miles and an average width of only ninety miles. The Republic has a total area of 291,500 square miles, with a population, according to the census of 1907, of 4,249,279.

Chile has a single republican form of government, with the customary division into legislative, executive and judicial branches. There are twenty-three provinces and one territory. The army consists of 17,132 men, and the war strength of the Republic is 150,000 men. The navy is composed of thirty vessels, of which three are armored battleships and five are cruisers, also two dreadnoughts being constructed. The government revenue in 1910 was \$66,392,712 gold, and the expenditures \$76,379,137 gold. The external debt of the Republic was \$120,657,912. At the end of 1910 there were 3,833 miles of railroad in operation, the post-offices numbered 1,090; miles of telegraph wire were 22,334, and there were 2,716 elementary schools with 258,875 pupils.

For trade with the United States see Index. For population of Latin-American Republics see Index. The above returns were compiled from the reports of the Pan-American Union (International Union of American Republics).

The institution was established at Washington under the recommendation of the Pan-American Conference of 1890, for the purpose of maintaining closer relations of commerce and friendship between the American Republics. At the Pan-American Conference at Mexico in 1901, its scope was enlarged, while at the Third Pan-American Conference held at Rio de Janeiro in 1906 a resolution was passed for its reorganization upon broader lines, so that it should become a world-recognized and practical institution for the development of Pan-American commerce and comity. The Governing Board consists of the Secretary of State of the United States, chairman ex-officio, and the chief diplomatic representatives in the United States of the other American Republics.

ORGANIZATION OF THE ARMY.*

The army in active service as now organized under the acts of Congress of February 2, 1901, January 25, 1907, April 23, 1908, and March 3, 1911, comprises 15 regiments of artillery, 765 officers and 13,823 enlisted men; 6 regiments of field artillery, 252 officers and 5,417 enlisted men; a coast artillery corps, 170 companies, 715 officers and 13,471 enlisted men; 80 regiments of infantry, 1,530 officers and 30,344 enlisted men; 3 battalions of engineers, 1,942 enlisted men, commanded by officers detailed from the corps of engineers; the Porto Rico Regiment of Infantry, 32 officers and 591 enlisted men; staff corps, Service School detachments, Military Academy, Indian scouts, recruits, etc., 7 officers and 8,412 enlisted men; and a provisional force of 52 companies of native scouts in the Philippines, 159 officers and 5,792 enlisted men. The total number of commissioned officers, staff and line, on the active list, is 4,781 (including 127 first lieutenants, Medical Reserve Corps on active duty, 60 Dental Surgeons, and 244 additional and detached line officers), and the total enlisted strength, staff and line, is 81,547, exclusive of the provisional force and the hospital corps. The law provides that the total enlisted strength of the army shall not exceed at any one time 100,000. * For Military Divisions and Departments, see Index.

ENLISTMENT LAW FOR THE UNITED STATES ARMY.

The Army act of August 24, 1912, prescribes a seven years' term of enlistment in the Army after November 1, 1912, in lieu of the previous term of three years, the first four years with the colors in active service, and the remaining three years on furlough, without pay, and attached to the Army Reserve established by the same act. The Army Reserves are subject to be called into active service only in the event of actual or threatened hostilities.

A soldier after four years' continuous service, either under a first or any subsequent enlistment, may be re-enlisted for seven years and receive a final discharge from his prior enlistment, or after three years' continuous service may, upon his written request, be furloughed and transferred to the Reserve. Enlistment periods for service pay are counted as four years. First enlistments are confined to men between the ages of 18 and 35 years. All soldiers receive, in addition to their pay, rations, clothing, bedding, and medical attendance while with the colors.

The monthly pay during first enlistment ranges from \$15 to \$18 for privates. For non-commissioned officers the rates are \$21, \$24, \$30, \$40, \$45, \$50, \$65 and \$75, respectively, according to grade, arm or corps, and nature of duties. Master electricians of the signal corps and the Coast Artillery Corps, and chief musicians of bands, receive the highest rate, \$75 per month.

Additional pay of from \$1 to \$4 per month for continuous service is allowed during each enlistment period of four years, after the first, up to and including the seventh. In addition to a 10th per cent. qualified or expert gunners, riflemen, sharpshooters and marksmen receive from \$2 to \$5 per month. Casemate electricians, plotters, planters, loaders, gun commanders, gun pointers, etc., of the Coast Artillery Corps receive from \$6 to \$9 per month additional. Twenty per cent. increase of pay is allowed for service in the Philippines and China.

Enlisted men may be retired after 30 years' service, with three-fourths of the pay of their grade, and \$15.75 per month additional in lieu of clothing, subsistence, quarters, fuel and light. Unmarried soldiers under 30 years of age or not less than two years' service may compete in examination for promotion to second lieutenant.

The Triple Alliance.

THE Triple Alliance was formed in 1883 between Germany, Austria-Hungary and Italy for the purpose of checking encroachments by Russia and France. By its provisions the three powers are bound to support one another in certain contingencies.

Its terms were made more definite in 1887. The exact provisions of the Alliance have not been divulged, but are said to have been modified as to France and Italy in 1893. The Alliance was renewed in 1902 and in 1907, for certain periods, and the period of its last renewal extends to June 14, 1914. It would appear that the recent demands of Italy against Turkey, followed by Italy's declaration of war, were assented to by the Alliance. For many years Great Britain, while not a party to the Alliance, was closely linked with it through apprehension of French and Russian aggressiveness, but later, becoming disquieted by the growth of the German naval power, adopted, in 1902, a decided change of policy with a view to seeking in the Balance of Power greater security against invasion.

In pursuance of this policy Great Britain entered into an agreement with France in 1904 and with Russia in 1907. The aims of the Triple Entente, so called, Great Britain, France and Russia, were substantially as follows:

1. The Balance of Power.
2. The strengthening of the treaty law in the interests of peace and the *status quo*.
3. Disarmament.

In some directions this policy has met with considerable success.

In the improbable event of a war between the powers of the Triple Alliance and those of the Triple Entente the land forces of the Entente would exceed by probably a million men those of the Alliance, but it is doubtful whether the vast army of Russia could be promptly assembled for service in the theatre of war.

The strength of the combined navies of the Entente in ships, tonnage, armament and number of men would exceed the combined naval strength of the Alliance.

Military Small Arms.

ABOUT 1880 all the civilized countries began rearming their troops with magazine rifles of small calibre, using high power cartridges with smokeless powder. Modifications and improvements in these as well as in carbines and pistols, have materially added to their effectiveness. At the present time no great difference exists in the effectiveness of the kinds of rifles with which the armies of the great powers are supplied with regard to their ranges and shooting qualities. It is well known that the effectiveness of any arm depends greatly on the experience and skill of the men who use it, and that, other things being equal, the troops most thoroughly instructed and drilled in the use of the rifle are the most efficient in battle.

While the wounds inflicted by the modern small calibre high velocity rifles are less fatal and yield more readily to treatment than those made by the guns of large calibre using slow-burning black powder formerly in use, yet it is claimed that men hit by the smaller bullet, even if not killed or mortally wounded, are as completely put out of action as if struck by the larger.

The automatic rifle will be, beyond question, the military weapon of the near future. Nearly all of the principal countries of Europe have been experimenting with rifles of this type. It seems, however, that, as yet, no automatic shoulder rifle has been brought forward that is considered as sufficiently reliable and effective for war purposes to justify the great expense of adopting it in the place of those now in use.

Some British army officers do not regard their Lee-Enfield rifle as equal to that of some other countries. This arm is made in two lengths. Opinions differ as to the respective merits of the long and the short rifle. During the present year the British War Office has adopted and manufactured for experimentation a limited number of rifles of a new type. It is claimed that in matters of calibre, weight of bullet, size of charge and effectiveness the new rifle is superior to any existing.

A few years ago the Mexican Government ordered some 4,000 rifles of the automatic type, known as the "Mondragon," with which to arm part of its army. This gun has the same calibre and uses the same cartridge as the German Mauser, with which the Mexican troops are mostly armed, but information as to the result of this experiment of introducing an automatic rifle to actual military use is lacking.

Germany adopted an automatic pistol for military use in 1908. The United States has recently adopted for the army and navy, in place of the service revolver, the Colt automatic pistol, after extended and rigid experiments and tests by a board of army officers. This is regarded as a remarkably effective weapon. Its length is 8.5 inches; length of barrel, 5 inches; weight, 2 lbs. 7 oz.; calibre, .45; cartridges in magazine, 7. The German automatic pistol has a length of 8.54 inches; length of barrel, 4.02 inches; weight, 1 lb. 13½ oz.; calibre, .35; cartridges in magazine, 8.

The appended table of military rifles in use by the principal countries of the world is compiled from the latest available data. Changes are frequently made, however, and it is difficult, if not impossible, to present accurate statistics up to date.

The Navy League of the United States.

THE Navy League of the United States was incorporated under the laws of the State of New York on January 2, 1903, its declared object being "to acquire and spread before the citizens of the United States, through branch organizations and otherwise, information as to the condition of the naval forces and equipment of the United States, and to awaken public interest and co-operation in all matters tending to aid, improve and develop their efficiency." It is strictly non-partisan. Men, women and children are eligible to membership. The button of the League is of silver gilt and blue enamel, with letters in white and anchor of gold, and is worn by members. The membership fee is one dollar annually. The headquarters of the League is at the Southern Building, Washington, D. C.

The General Officers are: *President*—Gen. Horace Porter. *Vice-President*—Robert M. Thompson. *Secretary*—Henry H. Ward. *Treasurer*—J. P. Morgan, Jr. *Honorary Members*—President William Taft and Secretary of the Navy George von L. Meyer.

The Southern Commercial Congress.

President—Duncan U. Fletcher, Jacksonville, Fla. *First Vice-President*—David R. Francis, St. Louis, Mo. *Second Vice-President*—Thomas S. Southgate, Norfolk, Va. *Managing Director*—Clarence J. Owens, Riverdale Park, Md. *Treasurer and Resident Director*—William H. Saunders, Washington, D. C. *Resident Director*—G. Grosvenor Dawe, Washington, D. C.

The headquarters of the Congress is at the Southern Building, Fifteenth and H Streets, Washington, D. C.; Clarence J. Owens, Managing Director.

Among the purposes of the organization are the following:

(a) To promote and develop the interests of the following sixteen States of the United States known as the "Southern States," to wit: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia.

(b) To collect and disseminate information regarding the resources and conditions of the said States and the opportunities and advantages offered in them for the safe and profitable investment of capital; the attractions offered in the South to the homeseeker, artisan and laborer, and the importance to the National Government of enacting proper legislation looking to the conservation of the natural resources of the South and the improvement of its rivers, harbors and transportation facilities.

(c) To encourage, promote and foster the development of the resources of the South with its own capital and by its own inhabitants.

(d) To encourage and obtain the establishment in the South of commercial, manufacturing, industrial and other enterprises, and to foster those already existing therein.

(e) To encourage, promote and foster the creation and establishment of institutions and organizations whose energies shall be principally directed toward the development of the material resources of the South.

(f) To promote and develop proper immigration to the South and to promote and foster the establishment of such organizations as may bring about the development of desirable immigration to the South.

(g) To encourage the movement for the construction of good roads and for the extension of railroad and trolley transportation.

(h) To encourage, foster and develop patriotic and national sentiments throughout the South and elsewhere in the nation, and particularly to promote, encourage and foster the feeling and desire for a greater nation through a greater South.

(i) To promote the improvement of educational and other conditions which tend to develop the material resources and happiness of the residents of the South.

The fifth annual convention will be held in Mobile, Ala., in September, 1913.

Military Educational System of the United States.

The military educational system of the United States, exclusive of the Military Academy at West Point, comprises the following:

I. The Army War College, Washington, D. C., under the management of a President and directors detailed from officers of the army. The course of instruction is for one year, beginning September 1. A limited number of officers not below the rank of captain, selected on account of exceptional efficiency and fitness, are detailed annually for instruction. The purpose of the college is to make practical application of knowledge already acquired, not to impart academic instruction.

II. The Army Service Schools. The group of schools established at Fort Leavenworth, Kansas, consisting of the Army School of the Line as the basic school, the Army Staff College, the Army Signal School, the Army Field Engineer School, and the Army Field Service and Correspondence School for Medical Officers as special affiliated schools, are designated the Army Service Schools, and are under the direction of a Commandant not of lower grade than that of a Brigadier-General.

The course of instruction at the schools, except as otherwise stated, is included in one term from September 1 to June 30 of the following year.

1. The Army School of the Line. The object of this school is the instruction of selected officers from the line of the army in the leading and care of troops in time of war and their training in time of peace. The Assistant Commandant of the Army Service Schools is also the Director of the School of the Line.

Upon graduation, the student class are graded, in order of merit, as "honor graduates," "distinguished graduates," and "graduates," respectively.

2. The Army Staff College, for the instruction of officers detailed annually from the highest graduates of the latest class of the School of the Line, recommended by the Academic Board of that school. The object of this college is to impart instruction to officers in the duties of the general staff of an army; to prepare them for the Army War College and to investigate military inventions, discoveries and developments.

The Commandant, Assistant Commandant, Secretary and Senior Instructors of the School of the Line hold corresponding positions in the Staff College.

3. The Army Signal School, for instruction of officers of the Signal Corps in their duties, including aeronautics; for instruction of officers of the line, who are designated therefor, in signal duties, and to make research and experiments in subjects pertaining to the work of the Signal Corps. The school is under the general direction of the Commandant of the Army School of the Line.

4. The Army Field Engineer School, for the instruction of officers of the Engineer Corps, not exceeding ten, and engineer officers of the National Guard.

5. The Army Field Service and Correspondence School for Medical Officers, for the instruction of officers of the Medical Corps and of the National Guard. Part one of this school requires attendance in person for a graded course of study, and part two for a course by correspondence. The course of instruction is six weeks, from April 1 to May 15 of each year. Students who complete the course satisfactorily receive certificates of proficiency.

III. The Army Medical School, Washington, D. C., for the instruction of medical officers of the army, candidates for appointment in the Medical Corps, and medical officers of the National Guard. The faculty consists of a President and Instructors. The course of instruction is for eight months, from October 1 each year. Graduates receive diplomas.

IV. The Coast Artillery School, Fort Monroe, Virginia. The object of this school is to enlarge the field of instruction of the garrison schools for Coast Artillery officers by advanced courses of study and practical training in technical duties; to prepare specially selected officers for the more important positions in the Coast Artillery; also to educate and train selected enlisted men for the higher non-commissioned staff grades in the Coast Artillery. The courses of instruction for officers and enlisted men are each comprised in one school year, from September 1 to July 1. Special courses in Ballistics are also provided.

Officers who are graduated are furnished with diplomas, as "honor graduates," "distinguished graduates," or "graduates," according to their standing.

V. The Engineer School, Washington Barracks, D. C. This school is under the control of the Chief of Engineers. Its object is to prepare junior officers of engineers for the active duties of their corps; to make experiments and recommendations, and to give instruction pertaining to the civil engineering work of the army. The course of instruction is one year, beginning September 1. Diplomas are given to students who successfully complete the course.

VI. The Mounted Service School, Fort Riley, Kansas, is under the command of a general officer, who also commands the post of Fort Riley. The object of the school is to give practical instruction to field and company officers of cavalry and field artillery, and to farriers and horseshoers. The course for field officers is from April 1 to June 15; that for company officers from October 1 to June 30, following; and for farriers and horseshoers two courses of four months each. Company officers who are graduated receive diplomas.

VII. The School of Fire for Field Artillery, Fort Sill, Oklahoma, for practical instruction in field artillery firing. Courses of instruction are prescribed: A, for captains and lieutenants; B, for field officers of field artillery; C, for non-commissioned officers, and D, for officers of the militia. Officers and enlisted men who complete any course satisfactorily receive certificates of proficiency.

VIII. Garrison Schools, one at each military post, for the instruction of officers of the army and the National Guard, in subjects pertaining to their ordinary duties. The course covers three years and the annual terms five months each, from November 1st. Certificates of proficiency in each subject of study are given to those who pass the prescribed examination therein.

IX. Post Schools for Instruction of Enlisted Men in the common branches of education and military subjects.

X. Schools for Bakers and Cooks, at San Francisco, California, and Washington, D. C., for the instruction of selected enlisted men.

Officers of the National Guard are admitted to most of the Army Schools, under the Militia law of January 21, 1903, and regulations prescribed by the War Department. They must be nominated by the Governors of their States. They are admitted to the garrison schools without an examination, which is required for admission to the schools of higher grade. Those admitted to any of the schools receive mileage and money commutations for subsistence, quarters, etc. A considerable number of militia officers enter these schools, notably the garrison schools, annually

The Organized and Unorganized Militia of the U. S.

(Compiled for THE WORLD ALMANAC from the latest official reports.)

THE Militia law of January 21, 1903, as amended by the act of May 27, 1908, provides: "That the militia shall consist of every ablebodied male citizen of the respective States * * * and every ablebodied male of foreign birth who has declared his intention to become a citizen, who is more than 18 and less than 45 years of age, and shall be divided into two classes—the organized militia, to be known as the National Guard * * * or by such other designations as may be given them by the laws of the respective States or Territories; the remainder to be known as the reserve militia."

(a) No organized militia. Alaska has no militia, though provision is made for such if need arises. Guam and Samoa have each a small provisional force, used more for police purposes than for military. The Philippines have a constabulary force which can be used either for police or war purposes, provided the latter is on the islands. Porto Rico has a regiment of eight companies of infantry which is a part of the army. The enlisted men of this regiment are natives of Porto Rico. The reserve militia in the Southern States is assumed to include negroes capable of bearing arms.

Cost of Maintaining Armies and Navies.

THE net cost of the British Army, according to estimates for 1912-13, will amount to \$139,300,000. The estimates for the Navy for 1912-13 are placed at \$220,427,000. The United States Army appropriations for 1912-13 amount to \$893,088,664, not including the expenditure by the several States on their National Guard or the enormous sums paid for pensions to ex-volunteers. The Navy appropriations for 1912-13 amount to \$123,518,549. The estimated military expenditure of the German Empire in the budget for 1912-13 amounts to \$238,876,000, excluding expenditures on Colonial troops. The German Naval estimates for 1912-13 amount to \$111,254,000. The military budget of France for 1912 shows an estimated expenditure of \$204,583,500 for the military establishment. The Navy estimate for 1913 amounts to \$92,000,000. Italy during 1912 expects to spend about \$41,859,000 on her Navy, and about \$79,213,190 on her Army. The military budget of Russia, ordinary and extraordinary, amounted in 1911 to \$279,754,590. The Russian Navy expenditures in 1913 amount to \$90,716,948. The Army estimate of Austro-Hungary for 1911 was \$93,596,000 and for the Navy \$25,678,570. The military expenditure of Japan for 1911-12 will be about \$55,000,000. The Naval estimates for 1912 amounted to \$46,079,050.

* This does not include cost of fortifications, Military Academy, etc., but only for the Army, including deficiencies. † This includes construction of ships, Naval Academy, Navy Yards, deficiencies, etc.

a See Army Pay Table below. Lieutenant-General is now the highest grade in the United States Army.

b These figures give base pay or pay proper. On account of the difference of pay of the same grade under varying conditions it is practically impossible to give the exact amounts received in each grade without an extended discussion of the entire subject. The table gives, however, approximately the correct average.

c Pay increased with each re-enlistment to the seventh. Enlisted men may be retired on 30 years' service with 75 per cent. of pay and allowances.

ARMY PAY TABLE—Continued.

(a) Service increase of pay of officers below rank of brigadier-general cannot exceed 40 p. c. in all.
 (b) The maximum pay of a colonel is \$5,000, of a lieutenant-colonel \$4,500, and of a major \$4,000.
 Dental Surgeons have the rank and pay of first lieutenant.
 Acting Dental Surgeons receive \$150 per month.

Veterinary Surgeons receive the pay of second lieutenant with right to retirement.

Army Pay Clerks receive from \$1,125 to \$2,000 per year with right to retirement.

The pay of non-commissioned officers is from \$21 to \$99 per month, and of privates from \$15 to \$25 per month. Service outside the United States, except in Porto Rico, Panama and Hawaii, 10 per cent. additional for officers and 20 per cent. for enlisted men.

The total amount appropriated by Congress for the United States Military establishment, including construction of fortifications and the Military Academy, for the fiscal year ending June 30, 1913, is \$98,087,607, including \$2,434,142 expenditures for 1912 and prior years not previously provided for, and for the naval establishment, including construction of ships, cost of navy yards and stations and the Naval Academy, \$123,518,649, including \$297,842 for expenditures for 1912 and prior years not previously provided for.

United States Military Academy at West Point.

EACH Senator, Congressional District, and Territory, including Porto Rico, Alaska, and Hawaii, is entitled to have one cadet at the Academy; the District of Columbia two cadets. There are also forty appointments at large, specially conferred by the President of the United States. The law, however, provides that for six years, from July 1, 1910, whenever any cadet shall have finished three years of his course at the Academy his successor may be admitted.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Senator or Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate two legally qualified second candidates, to be designated alternates. The alternates will receive from the War Department a letter of appointment, and will be examined with the regular appointee, and the better qualified will be admitted to the Academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age, free from any infirmity which may render them unfit for military service, and able to pass a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, descriptive geography and the elements of physical geography, especially the geography of the United States, United States history, the outlines of general history. The Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Philippine Commission, to receive instruction at the United States Military Academy at West Point; Provided, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; And provided further, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. Serve for 8 years, unless sooner discharged.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional, and military law, Spanish, civil and military engineering, art and science of war, and ordnance and gunnery. About one-fourth of those appointed usually fail to pass the preliminary examinations, and but little over one-half the remainder are finally graduated. The discipline is very strict—even more so than in the army—and the enforcement of penalties for offences is inflexible rather than severe. Academic duties begin September 1 and continue until June 4. Examinations are held in each December and June, and cadets found proficient in studies and correct in conduct are given the particular standing in their class to which their merits entitle them, while those cadets deficient in either conduct or studies are discharged.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is \$709.50 per year, and, with proper economy, is sufficient for his support. The number of students at the Academy is usually about five hundred and fifty.

Upon graduating cadets are commissioned as second lieutenants in the United States Army. The whole number of graduates from 1802 to 1912, inclusive, has been 5,112. It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The appointments by the President are usually restricted to sons of officers of the army and navy, who, by reason of their shifting residence, due to the necessities of the service, find it next to impossible to obtain an appointment otherwise. The Superintendent is Colonel Clarence Page Townsley, Coast Artillery Corps, U. S. A., and the military and academic staff consists of 128 persons.

National Association of Postmasters

OF FIRST-CLASS OFFICES.

THE National Association of Postmasters of First-Class Offices was organized at Detroit, Mich., October 8, 1898.

The Association consists of postmasters and assistant postmasters of the first class post-offices in the United States, and presidents and first vice-presidents of State associations of postmasters. Heads of the Post-Office Department and Chiefs of Bureaus at Washington are honorary members.

Article 3 of the constitution declares that: "The object of this Association is to aid in the improvement of the Postal Service of the United States through the mutual interchange of ideas of members of the Association and officials of the Post-Office Department."

The annual meetings are attended by the heads of Departments and Chiefs of Bureaus of the Post-Office Department who address the conventions and answer questions pertaining to the practical work of the post-office.

The following are the officers for 1912-13: *President*—Isador Sobel, Erie, Pa. *First Vice-President*—Robert E. Woods, Louisville, Ky. *Second Vice-President*—George W. Bean, Tampa, Fla. *Third Vice-President*—E. C. Mansfield, Boston, Mass. *Fourth Vice-President*—N. A. Merrith, Washington, D. C. *Fifth Vice-President*—John N. Dersam, McKeesport, Pa. *Treasurer*—D. C. Owen, Milwaukee, Wis. *Secretary*—To be appointed by the president.

Convention for 1913 will be held at Denver, Col.

CHAPLAIN.†

With Pay of Captain, Mounted.
Travers, Edward S., Dec. 1, 1905.

SECTION 12 of the act of February 2, 1901, provides "That the President is authorized to appoint, by and with the advice and consent of the Senate, chaplains in the army, at the rate of one for each regiment of cavalry and infantry in the United States service. * * * with the rank, pay and allowances of captains of infantry." By the act of June 12, 1906, one chaplain is authorized for the Corps of Engineers. By the act of January 25, 1907, fourteen chaplains are authorized for the Coast Artillery Corps, and one for each regiment of Field Artillery. By the act of April 21, 1904, the President may select from among the chaplains of not less than ten years' service, in the grade of captain, those who have been commended as worthy of special distinction for exceptional efficiency, and may, by and with the advice and consent of the Senate, promote such to be chaplains with the grade, pay and allowances of major; the number in active service so promoted shall not at any time exceed fifteen. The remaining chaplains have the grade, pay and allowances of captain, mounted, after seven years' service. Chaplains appointed after April 21, 1904, have the grade, pay, and allowances of first lieutenant, mounted, until they shall have completed seven years' service.

UNITED STATES NAVAL ENLISTMENT.

The term of enlistment in the Navy is four years, except for boys under eighteen, who enlist for minority, with the consent of parents or guardian. Minors over eighteen are enlisted without the consent of parents or guardian, but they must furnish a birth certificate or verified written statement of parent or guardian as to their age. Only American citizens of good character who may reasonably be expected to remain in the service are enlisted, and every applicant must pass the required physical examination, be able to read and write English and take the oath of allegiance. No boy under seventeen can be enlisted except by special permission from the Department.

Information regarding rates, with pay, opportunities for advancement, allowances, etc., can be obtained by addressing: BUREAU OF NAVIGATION, NAVY DEPARTMENT.

Permanent Navy Recruiting Stations are located at: Boston, Mass., 146 Tremont St.; Providence, R. I., 42 Westminster St.; Hartford, Ct., P. O. Building; New York, N. NAVY RECRUITING SERVICE.

On July 1, 1910, publicity offices were established at New York, N. Y. (153 W. 23d St.) for the Eastern district, and Indianapolis, Ind. (P. O. Bldg.) for the Western district, where full information regarding the pay, opportunities, etc., of service in the United States Navy may be obtained. Inquiries from the different States should be sent to the nearest of the two districts enumerated above. Address "Publicity Office, Navy Recruiting Service, 153 W. 23d St., N. Y.," or "Indianapolis, Ind.," as the case may be. All inquiries will be promptly answered by an officer of the navy. Better still, if you are in a position to do so, call at the nearest station and get all information first hand from the enlisted men who have seen service in our navy.

The origin of the Navy Department may be said to date from October 13, 1775, when Congress authorized the equipment of two cruisers, mounting respectively 10 and 14 guns. Before the end of that year 15 more vessels of from 20 to 36 guns were authorized. The affairs of the Navy were at that time intrusted to a "Marine Committee." In 1798 the present department was formally created, and Benjamin Stoddard appointed the first Secretary.

NAVY-YARDS.

1. New York Navy-Yard, Brooklyn, N. Y.
2. Boston Navy-Yard, Boston, Mass.
3. Norfolk Navy-Yard, near Norfolk, Va.
4. Portsmouth Navy-Yard, Portsmouth, N. H.
5. Philadelphia Navy-Yard, Philadelphia, Pa.
6. Mare Island Navy-Yard, near San Francisco, Cal.
7. Washington Navy-Yard, Washington, D. C.
8. Puget Sound Navy Yard, Bremerton, Wash.

There are naval stations at Charleston, S. C.; Key West, Fla.; Great Lakes, North Chicago, Ill.; a torpedo and training station at Newport, R. I., and a training station on Yerba Buena Island, Cal., and the Naval War College, Newport, R. I.

Naval stations have been established at Tutuila, Samoa; Island of Guam; Guantanamo, Cuba; Honolulu, H. I.; Cavite, and Olongapo, Philippine Islands. The latter has become an important naval base for the Asiatic Fleet.

OLD VESSELS.

There are in the Navy a small number of old vessels which are unserviceable for war purposes. A number of these vessels are in service as receiving ships at the principal navy yards.

TUGS.

There are 45 tugs in the Naval Service, of which the Ontario and Sanoma have a displacement of 1,120 tons, and the two smallest, the Chickasaw and Waban, 100 and 150 tons respectively. These vessels are distributed among the various naval stations in the United States and the Philippine Islands.

Rear-Admirals, second nine.....	6,000	Lieutenants (Junior Grade).....	2,000
Captains.....	4,000	Ensigns.....	1,700
Commanders.....	3,500	Midshipmen.....	600

All staff officers, such as medical directors, chaplains, naval constructors, pay directors, civil engineers, etc., receive the pay of their rank.

Chief boatswains, and other commissioned warrant officers receive the same pay as ensigns.

All officers paid under this table, below the rank of Rear-Admiral, are entitled to 10 per cent. increase upon the full yearly pay of their grades for each and every period of five years' service as "longevity pay," computed upon their total actual service in the Navy or Marine Corps, provided that the total amount of such increase shall not exceed 40 per cent. upon the full yearly pay of their grade.

All officers on sea duty and all officers on shore duty beyond the continental limits of the United States shall while so serving receive ten per centum additional of their salaries and increase as above provided, and such increase shall commence from reporting for duty on board ship or the date of sailing from the United States for shore duty beyond seas or to join a ship in foreign waters.

Warrant officers (boatswains, gunners, carpenters, sailmakers, pharmacists, machinists and pay clerks) are paid from \$1,125 to \$2,250 a year.

Commandants' clerks receive from \$1,000 to \$1,800 a year.

Petty officers (masters-at-arms, boatswains' mates, gunners' mates, gun captains, quartermasters, machinists, hospital stewards, yeomen, handmates, first musicians, coxswains, electricians, boiler-makers, copper-smiths, blacksmiths, plumbers and fitters, sailmakers' mates, carpenters' mates, oilers, printers, painters, water tenders, and hospital apprentices (first class) receive from \$396 to \$924 a year.

The pay of first-class seamen per month is \$26; seamen gunners, \$28; firemen, first class, \$38; musicians, first class, \$34.

The pay of second-class seamen per month is: Ordinary seamen, \$21; firemen, second class, \$33; shipwrights, \$27; musicians, second class, \$33.

The pay of third-class seamen per month is: Landsmen, for training, \$17; coal passers, \$24; apprentices, third class, \$10.

To provide for the welfare and comfort of the officers and enlisted men of the Navy during the fiscal year of 1913, it is going to cost Uncle Sam just \$37,280,971. Of this amount \$9,792,890 is required to pay the officers on the active list, while the retired officers receive the sum of \$3,058,899.

The perquisites allowed officers of the Navy will aggregate nearly three quarters of a million dollars in 1913. Of this amount \$440,576 will be spent in providing quarters for those officers who cannot be accommodated in buildings or houses maintained by the Government, and \$151,882 for the item of heat and light for officers using other than Government quarters and in Government quarters where no heating and lighting plant is maintained by the Government; also the item of rations, which figured at 30 cents a day, amounts to nearly a hundred thousand dollars. The sum of \$540,000 is required to pay the midshipmen under instruction at the Naval Academy.

The pay of the enlisted men of the Navy is divided into the following items. Pay of 48,000 petty officers, seaman, etc., \$21,086,080; 3,500 apprentices under training, \$742,980; 373 retired enlisted men, \$307,725, and 1,000 enlisted men in prisons undergoing sentences of court-martial, etc., \$295,200.

Each man in the Navy holding an honorable discharge receives a bounty. This item will cost the Government \$555,000 in 1913. There is also required the sum of \$57,267 for interest on the deposits held by Uncle Sam for the enlisted men of the Navy. Seventy-two thousand, nine hundred dollars is required to pay the Female Nurse Corps of the Navy and \$14,040 is allowed them for commutation of quarters.

Each officer or enlisted man in the Navy who dies from wounds or disease contracted in the line of duty is entitled to have paid to his beneficiary a sum equal to one-half of his annual pay. For this purpose the sum of \$65,532 will be required for the fiscal year 1913.

United States Naval Academy at Annapolis.

THE students of the Naval Academy are called Midshipmen. Two Midshipmen are allowed for each Senator, Representative, and Delegate in Congress, two for the District of Columbia, and five each year from the United States at large. The appointments from the District of Columbia and five each year at large are made by the President. One Midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the President, on the recommendation of the Governor of Porto Rico. The Congressional appointments are equitably distributed, so that as soon as practicable each Senator, Representative, and Delegate in Congress may appoint one Midshipman during each Congress. The course for Midshipmen is four years at the Academy, when the succeeding appointment is made, and the examination for graduation takes place. Midshipmen who pass the examination for graduation are appointed to fill vacancies in the lower grade of the Line of the Navy, in the order of merit as determined by the Academic Board of the Naval Academy. The D. Co. of June 29, 1906, prescribes that the Secretary of the Navy shall as soon as possible after June 1 of each year preceding the graduation of Midshipmen in the succeeding year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy that will exist at the Naval Academy, because of such graduation, and which he shall be entitled to fill by nomination of a candidate or more alternates therefor. The nomination of candidate and alternate or alternates to fill a vacancy shall be made upon the recommendation of the Senator, Representative, or Delegate, if recommendation is made by March 4 of the year following that in which said notice in writings of an actual resident of the State, Congressional District, or Territory, as the case may be in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional District, or Territory in which the vacancy will exist, and of the legal qualification under the law as now provided. Candidates allowed for Congressional Districts, for Territories, and for the District of Columbia must be actual residents. Candidates at the time of their examination must be physically sound, well formed of robust constitution. Attention will also be paid to the stature of the candidate, and no one under size for his age will be received at the Academy. The height of candidates for admission shall not be less than 5 feet 2 inches between the ages of 16 and 18 years, and not less than 5 feet 7 inches between the ages of 18 and 20 years; and the minimum weight at 16 years of age shall be 100 pounds, with an increase of not less than 5 pounds for each additional year or fraction of a year over the half. Any marked deviation in the relative height and weight to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any Midshipman who shall marry, or who shall be found to be married, before his graduation, shall be dismissed from the service. All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. The pay of a Midshipman is \$600, beginning at the date of admission. The regulations regarding places and times of examinations and subjects of examinations may be obtained by addressing the Chief of the Bureau of Navigation, Navy Dept., Washington, D. C.

Commandant—Major-General William P. Biddle.

Officer in Charge, Adjutant and Inspector's Department—Col. Charles H. Lauehelmer. *Quartermaster's Department*—Lieut.-Col. Charles L. McCawley. *Paymaster's Department*—Col. George Richards. *Headquarters*—Navy Department Annex (Mills Building), Washington, D. C.

The United States Marine Corps is an independent branch of the military service of the United States, serving generally under the direction of the Secretary of the Navy. The corps may be detached by order of the President for service with the army, and on various occasions parts of the corps have so served.

Marines served on shore and on board vessels of the navy throughout the Revolutionary war, two battalions having been authorized by the Continental Congress November 10, 1775, but the present organization dates from July 11, 1798, when an act of Congress was approved for establishing and organizing a marine corps to consist of 1 major, 4 captains, 16 first lieutenants, 12 second lieutenants, 48 sergeants, 48 corporals, 32 drums and fifes and 720 privates.

The authorized strength of the corps (October, 1912) was 345 officers and 9,921 enlisted men, as follows: 1 major-general commandant, 11 colonels, 12 lieutenant-colonels, 28 majors, 107 captains, 96 first lieutenants, 90 second lieutenants, 12 sergeant majors, 79 quartermaster sergeants, 1 drum major, 114 first sergeants, 86 gunnery sergeants, 480 sergeants, 897 corporals, 124 drummers, 124 trumpeters, 1 leader of the band, 1 second leader of the band, 30 first-class musicians, 30 second class musicians and 7,942 privates.

The following duties are assigned to the marine corps: To garrison the different navy yards and naval stations, both within and beyond the continental limits of the United States. To furnish the first line of the mobile defence of naval bases and naval stations beyond the continental limits of the United States. To man such naval defences, and to aid in manning, if necessary, such other defences as may be erected for the defence of naval bases and naval stations beyond the continental limits of the United States. To garrison the Isthmian Canal Zone, Panama. To furnish such garrisons and expeditionary forces for duties beyond the seas as may be necessary in time of peace. To serve on board all battleships and armored cruisers of the navy, and such other vessels as may be directed, in detachments of not less than 8% of the strength of the enlisted men of the navy on said vessels. In case of disturbances in foreign countries marines are landed to protect American interests.

Cleveland, Ohio, Federal Building.
Denver, Col., 1605 Larimer Street.
Detroit, Mich., 161 Griswold Street.

Information regarding pay, allowances, etc., can be obtained by addressing the officer in charge of recruiting at any of the above addresses. Enlistments are also made at all navy yards and naval stations.

Soldiers' Homes.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

President of the Board of Managers... Maj. James W. Wadsworth, 346 Broadway, New York City, N. Y.
Secretary..... John M. Holley, Esq., La Crosse, Wis.

There are branches of the National Home at Dayton, O.; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn.; and Hot Springs, S. Dak. The aggregate number of members cared for is about 35,000.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service during a war in which it was engaged.
 2. Disability which prevents the applicant from earning his living by labor.
 3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the Army of the United States.
 4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.
- There are State Homes for disabled volunteer soldiers provided by the States of California, Colorado, Connecticut, Idaho, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Washington, Wisconsin, and Wyoming.

UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the regular army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries in the line of duty while in the regular army, as unfit for further service, are entitled to the benefits of the Home.

A pensioner who enters the Home may assign his pension, or any part of it, to his child, wife, or parent, by filing written notice with the agent who pays him. If not so assigned, it is drawn by the treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed and receive medical attendance and medicine, all without cost to them. There are 1,379 men now receiving the benefits of the Home.

Applications for admission to the Home may be addressed to the Board of Commissioners, U. S. Soldiers' Home, War Department, Washington, D. C., and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

The Boy Scouts of America.

ORIGIN AND GROWTH OF SCOUTING.

487

LIKE many other things showing permanence and power, the scout movement can be traced back to widely separated sources where constructive ideas came to boy workers and were tested with varying degrees of success. In America there were a number of originators of methods, plans, and principles that have proved effective. In Great Britain, Lieut.-Gen. Sir Robert S. S. Baden-Powell became active in organization work based largely on the ideas and methods of American workers. He did this so successfully that the enrolment of British Boy Scouts soon grew into the hundred thousands, with the emphasis, not on the military note, but on peace virtues and learning some trades. Then the movement spread to Germany, France, Italy, Australia and New Zealand, to Canada and the United States; to South American republics; in short, almost the world over; since it is already established in twenty-four countries. Everywhere it has shown adaptation to new fields and nationalities.

In Germany the boys have engaged in the work with such enthusiasm and in such numbers that the Prussian and Bavarian authorities are giving the movement financial aid. But it has been left to the United States to show what the system of scouting can accomplish, when it returns to the lands in which the larger number of its working ideas and principles originated. While the number of the Boy Scouts enrolled throughout the world is estimated as not less than two million; one-fourth of the whole number are in the United States. The emphasis and ideals of the movement belong here also to the highest plans—that of efficient citizenship, service and character-building.

"The Boy Scouts of America," the name under which the movement in the United States was incorporated, February 8, 1910, has as its Honorary President, The Hon. William H. Taft, President of the United States, and Col. Theodore Roosevelt as its Honorary Vice-President. Associated with these in approval and promotion of the movement are the eminent citizens from all walks of public life who are members of the National Council and of the Local Councils in the cities and towns of the whole country, and a host of others who earnestly co-operate in the work. The National Organization of The Boy Scouts of America was incorporated on the eighth day of February, 1910.

A group of men, representing the various religious and civic organizations of the community that are engaged in boys' work, are brought together as a Local Council for the promotion of this work. This Local Council receives a charter from the National Organization, giving them full authority to deal with all questions relating to scouting in that district and to pass upon all Scout Masters' applications. In many cases this Council engages a boys' work director, to be known as the Scout Commissioner, to take charge of the work in that community. He is responsible to the Local Council for the direction and promotion of the work. He is the leader of the Scout Masters, and as such, gives whatever instructions and help that may be necessary, arranges inter-troop meets, games, camps, and in general, makes uniform the plan of work conducted in that community. The Scouts are organized in patrols and troops. Eight boys constitute a patrol, one of whom is known as the Patrol Leader. Three patrols make up a troop. The Scout Master is the adult leader of the troop. Already there are 250 Local Councils in as many cities throughout the United States and under the direction of each there are from five to one hundred Scout Masters in charge of troops.

The Scout programme is proving practicable as a civic enterprise. There are many cities so thoroughly organized that every phase of boy life in the community is being reached by scout activities. The movement is adopting itself not only to the wealthy classes, but to the boys of the slums, to the newsboys and to foreign boys alike. Over five thousand Scout Masters are already registered with the National Organization, representing half a million boys that are being reached by the movement. Work to some extent has been started in nearly every city in this country, besides in the Hawaiian Islands, the Philippine Islands, Porto Rico and Guam. Any boy over 12 years of age is eligible to become a Scout. The only requirements are that he know the Scout salute, sign, and laws, and that he take the Scout oath. By meeting certain requirements, he is in line to become a Tenderfoot, Second-Class and First-Class Scout.

The National Organization is maintained by public subscriptions. Sustaining and Contributing Memberships are issued to men and women throughout the country who are financially assisting in the development and promotion of this organization among boys.

American Veterans of Foreign Service.

Commander-in-Chief—R. G. Woodside, Pittsburg, Pa. *Adjutant-General*—Charles J. Barbour. *Quartermaster-General*—W. S. Haddock, Pittsburg, Pa.

The American Veterans of Foreign Service is an organization composed of officers and enlisted men who served in the Army, Navy or Marine Corps of the United States of America, in Cuba or Porto Rico, between April 21, 1898, and June 1, 1899, in the China Relief Expedition, or in Guam or the Philippines, from April 21st, 1898, to July 4, 1902, or who since July 4th, 1902, have served in the Philippines, and whose service entitled them to campaign badges, issued by the Government of the United States.

Its objects are to preserve and strengthen fraternity among its members; to assist worthy comrades; to care for the widows and orphans of deceased comrades; to perpetuate the memory and history of our dead; to maintain true allegiance to the Government of the United States of America, and fidelity to its constitution and laws; to cultivate the spirit of patriotism which will enable us and our posterity to preserve pure and intact the free institutions of our beloved country from insurrection, treason, rebellion or anarchy; to work for the universal spread of liberty, equal rights and justice to all men; and to preserve and defend the United States of America from all her enemies whatsoever.

CONSULAR SERVICE.

C. G., Consul-General; C., Consul; V. C., Vice-Consul; D. C., Deputy Consul; C. A., Consular Assistant; Agt., Consular Agent.

To insure prompt attention, letters upon consular business should be addressed "To the American Consul at" Such letters are opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name they are forwarded to him unopened if he should be absent, and a delay thus intervenes; if he should in the mean time have gone out of office they may wholly escape attention.

Consuls at the principal places in the world are given here. Where there are a consul and vice or deputy consul at the same place only the consul is given. Consular officers are *ex-officio* notaries for all the States of the United States.

The Hall of Fame.

MARCH 5, 1900, the Council of New York University accepted a gift of \$100,000, afterward increased to \$250,000, from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was accordingly built in the form of a semi-circle, 170 feet, connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementos of the names that are inscribed above. The colonnade over this is 400 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead ten or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. In case of failure to fill all the panels allotted, the vacancies are to be filled in a following year.

In February, 1904, the plan was announced of an additional Hall joining the colonnade on the north, having 25 panels for foreign born Americans, six to be filled in 1905, and of a Hall of Fame for Women, about 30 by 60 feet. The erection of the former Hall was begun in Oct., 1912, with places for 50 tablets.

The rules prescribed that the Council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens selected by the Council. Chancellor Emeritus MacCracken presides in the Senate when the Hall of Fame is considered.

In October, 1900, the University Senate received the ballots of the electors. Of the one hundred judges selected ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart, Asa Gray.

In October, 1905, under the rules named above, the Senate received the ballots of 95 Electors out of 101 appointed, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women, a majority of only 47. The following persons were found to be duly chosen: John Quincy Adams, 59; James Russell Lowell, 58; William Tecumseh Sherman, 58; James Madison, 56; John Greenleaf Whittier, 53; Alexander Hamilton, 58; Louis Agassiz, 83; John Paul Jones, 54; Mary Lyon, 58; Emma Willard, 50; Maria Mitchell, 48.

The Hall was dedicated May 30, 1901, when twenty-five or more national associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, the eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

Since the Deed of Gift was amended to admit memorials to famous foreign born Americans, the roll of electors has been amended in like manner, Mr. Andrew Carnegie, a native of Scotland, succeeding to the place of ex-President Grover Cleveland, deceased.

In October, 1910, the next ballot was taken, the number cast being 97 and the number required for a choice being 51. The following persons had the requisite number of votes: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; Roger Williams, 64; James Fenimore Cooper, 62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances E. Willard, 56; Andrew Jackson, 53; George Bancroft, 53; John Lothrop Motley, 51. There were 211 nominees.

Examinations for the Consular Service.

IN pursuance of the Executive order of June 27, 1906, whereby the President promulgated regulations governing appointments and promotions in the consular service, the following rules have been adopted by the Board of Examiners, who, under that order, have been designated to formulate rules for and hold examinations of applicants for admission to the consular service whom the President shall have designated for examination to determine their eligibility for appointment therein:

1. The examinations will be the same for all grades and will be to determine a candidate's eligibility for appointment in the consular service, irrespective of the grade for which he may have been designated for examination and without regard to any particular office for which he may be selected.

2. The examinations will consist of an oral and a written one, the two counting equally. The object of the oral examination will be to determine the candidate's business ability, alertness, general contemporary information, and natural fitness for the service, including moral, mental and physical qualifications, character, address, and general education and good command of English. In this part of the examination the applications previously filed will be given due weight by the Board of Examiners, especially as evidence of the applicant's business experience and ability. The written examination will include those subjects mentioned in the Executive order, to wit: French, German, or Spanish, the natural, industrial and commercial resources and the commerce of the United States, especially with reference to possibilities of increasing and extending the foreign trade of the United States; political economy, and the elements of international, commercial and maritime law. It will likewise include American history, government, and institutions; political and commercial geography; arithmetic (as used in commercial statistics, tariff calculations, exchange, accounts, etc.); the modern history, since 1850, of Europe, Latin America, and the Far East, with particular attention to political, commercial and economic tendencies. In the written examination, composition, grammar, punctuation, spelling and writing will be given attention.

3. To become eligible for appointment, except as student interpreter, in a country where the United States exercises extra territorial jurisdiction, the applicant must pass the examination outlined above, but supplemented by questions to determine his knowledge of the fundamental principles of common law, the rules of evidence, and the trial of civil and criminal cases.

4. The examinations to be given candidates for appointment as student interpreters will follow the same course as in the case of other consular officers, provided, however, that no one will be examined for admission to the consular service as a student interpreter who is not between the ages of nineteen and twenty-six, inclusive, and unmarried; and, provided further, that upon appointment each student interpreter shall sign an agreement to continue in the service so long as his services may be required, within a period of five years.

5. Upon the conclusion of the examinations the names of the candidates who shall have attained upon the whole examination an average mark of at least eighty, as required by the Executive order, will be certified by the Board to the Secretary of State as eligible for appointment in the consular service, and the successful candidates will be informed that this has been done.

6. The names of candidates will remain on the eligible list for two years, except in the case of such candidates as shall within that period be appointed or shall withdraw their names, and of candidates holding subordinate positions in the consular service, when eligibility shall not expire until appointment to consular rank or until separation from the service. Candidates whose names have thus been dropped from the eligible list will not again be eligible for appointment unless upon fresh application, designation anew for examination, and the successful passing of such second examination.

DUTIES OF CONSULAR OFFICERS.

Consular officers are expected to endeavor to maintain and promote all the rightful interests of American citizens, and to protect them in all privileges provided for by treaty or conceded by usage; to visa and, when so authorized, to issue passports; when permitted by treaty, law or usage, to take charge of and settle the personal estates of Americans who may die abroad without legal or other representatives, and remit the proceeds to the Treasury in case they are not claimed or by a legal representative within one year; to ship, discharge, and, under certain conditions, maintain and send American seamen to the United States; to settle disputes between masters and seamen of American vessels; to investigate charges of mutiny or insubordination on the high seas and send mutineers to the United States for trial; to render assistance in the case of wrecked or stranded American vessels, and, in the absence of the master or other qualified person, take charge of the wrecks and cargoes if permitted to do so by the laws of the country; to receive the papers of American vessels arriving at foreign ports and deliver them after the discharge of the obligations of the vessels toward the members of their crews, and upon the production of clearances from the proper foreign port officials; to certify to the correctness of the valuation of merchandise exported to the United States where the shipment amounts to more than \$100; to act as official witnesses to marriages of American citizens abroad; to aid in the enforcement of the immigration laws, and to certify to the correctness of the certificates issued by Chinese and other officials to Chinese persons coming to the United States; to protect the health of our seaports by reporting weekly the sanitary and health conditions of the ports at which they reside, and by issuing to vessels clearing for the United States bills of health describing the condition of the ports, the vessels, crews, passengers, and cargoes; and to take depositions and perform other acts which notaries public in the United States are authorized or required to perform. A duty of prime importance is the promotion of American commerce by reporting available opportunities for the introduction of our products, aiding in the establishment of relations between American and foreign commercial houses, and lending assistance wherever practicable to the marketing of American merchandise abroad.

In addition to the foregoing duties, consular officers in China, Turkey, Siam, Korea, Masket, Morocco, and a few other so-called "Christian countries, are invested with high judicial powers over American citizens in those countries. These powers are usually defined by treaty, but generally include the trial of civil cases to which Americans are parties, and in some instances extend to the trial of criminal cases.

The United States Public Health Service.

SURGEON-GENERAL, RUPERT BLUE.

THE United States Public Health Service is a bureau of the Treasury Department. The head of the bureau is a commissioned medical officer, with the title of Surgeon-General. The work of the Service is administered, under direction of the Surgeon-General, by seven bureau divisions—Personnel and Accounts, Scientific Research, Foreign and Insular Quarantine, Domestic (Interstate) Quarantine, Sanitary Reports and Statistics, Marine Hospitals and Relief and Miscellaneous.

The commissioned corps of the Service consists of medical officers of the following grades: Surgeon-General, Assistant Surgeon-Generals (chiefs of divisions of the bureau), Senior Surgeons, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons. Appointments in the corps are made to the grade of Assistant Surgeon, after successful examination. Qualifications for examination are graduation from a reputable medical college, one year's hospital experience or two years' professional work after graduation, and testimonials from responsible persons as to professional and moral character. Applicants for examination must be between the ages of 23 and 32 years.

The Public Health Service maintains twenty-two marine hospitals and 125 other relief stations throughout the country. Fifty-one quarantine stations in the United States and twenty-five stations in its insular possessions are also operated, and eighty-one stations for the medical inspection of immigrants. Eighteen officers are stationed at American consulates abroad to assist in the administration of quarantine and the inspection of immigrants.

At the Hygienic Laboratory, located in the city of Washington, research work in connection with investigations of disease, sanitation and water pollution is carried on, and tests are made of the purity and potency of viruses, serums and toxins, with the supervision of the manufacture and sale of which the Public Health Service is charged by law.

The Public Health Service co-operates with State and local Boards of Health in the eradication of epidemic diseases, such as plague, cholera, yellow fever, typhus fever, smallpox and leprosy. Details of officers are also made, on request from State and municipal health authorities, to assist in the suppression of typhoid fever, infantile paralysis, cerebro-spinal meningitis, and other diseases. Among the signal achievements of the Service in recent years, in the field of public health work, have been the eradication of bubonic plague in California and the suppression of yellow fever in the South.

In addition to the commissioned medical corps, the services of 231 Acting Assistant Surgeons (physicians appointed locally and not subject to change of station) were required to conduct the operations of the Service during the fiscal year 1912.

During the year 51,078 patients were treated—14,717 in hospitals and 36,361 at dispensaries. At quarantine stations 7,908 vessels, carrying 530,452 passengers and crews, were inspected, and 275 vessels disinfected. Immigrants to the number of 1,143,234 were inspected, and 27,021 certified for rejection on account of physical and mental defects. At the immigrant hospitals at Ellis Island, N. Y., and Angel Island, Cal., conducted by Service officers under the supervision of Commissioners of Immigration, 7,356 patients were admitted to treatment.

The Socialist Vote.

A SOCIALIST authority, W. J. Ghent, has compiled the following table of the latest returns of the Socialist vote in various countries, and the number of Socialist members of the popular branches of the national parliaments. The countries are ranked according to the proportion of Socialist deputies to the total deputies.

An act to provide for the opening, maintenance, protection and operation of the Panama Canal and the sanitation and government of the Canal Zone. (Approved August 24, 1912.) Provides for the government of the Panama Canal after its construction and the exemption of coastwise American vessels from tolls.

Joint resolution providing for the termination of the treaty of 1832 between the United States and Russia. (Approved December 21, 1911.) Abrogation of the treaty on account of its denial of passports to Jewish-American citizens.

Joint resolution making appropriations for the relief of sufferers from floods in the Mississippi and Ohio Valleys. (Approved May 6, 1912.)

Joint resolution proposing an International Maritime Conference. (Approved June 28, 1912.)

Joint resolution to convey the thanks of Congress to Capt. Arthur Henry Rostrom, and through him to the officers and crew of the steamship Carpathia of the Cunard line, for the prompt and heroic service rendered by them in rescuing seven hundred and four lives from the wreck of the steamship Titanic in the North Atlantic Ocean. (Approved July 6, 1912.)

Joint resolution appropriating \$1,350,000 for encampment and manoeuvres of the organized militia. (Approved July 8, 1912.)

Joint resolution making appropriations to be used in exterminating the army worm. (Approved July 30, 1912.)

Joint resolution directing the Secretary of War to investigate the claims of American citizens for damages suffered within American territory and growing out of the late insurrection in Mexico. (Approved August 9, 1912.)

Joint resolution authorizing the erection on the public grounds in the city of Washington of a joint memorial to Major Archibald W. Butt and Francis Davis Millet. (Approved August 24, 1912.)

Changes and new enactments were made as riders to general appropriation bills. Among these were:

Provision for the establishment of an experimental parcels post.

Provision for a seven years' term of enlistment in the army—four years with the colors and three years in a proposed new army reserve.

Provision for the abolition of the Tariff Board.

The Senate ratified nine treaties during the session, including those with France and Great Britain, which the President refused to accept in amended form, and the following: Settlement of pecuniary claims between the United States and Great Britain; agreement of international naval conference on war prizes; copyright treaty with Hungary; North Atlantic fisheries treaty with Great Britain; naturalization treaty with Costa Rica; international wireless telegraph treaty; international treaty on assistance and salvage at sea.

Other matters which took effect by the action of Congress during this session were the approval of a Constitutional Amendment for the direct election by the people of United States Senators; the

ousting by the Senate of William Lorimer as Senator from Illinois, and the beginning of impeachment proceedings against Judge Robert W. Archbald of the Commerce Court.

Investigations were made by committees, of the United States Steel Corporation, the American Sugar Refining Company, the Shipping Trust, the Beef Trust, the Money Trust and the contributionist to the National campaign of 1904.

The Senate passed a resolution declaring its disapproval of the acquisition of territory in America by foreign Governments for strategic purposes.

Among the bills before Congress which failed to pass this session were: the bill to create a Department of Labor, with a member of the Cabinet; the bill to extend the Corporation Tax law to individuals; the Agricultural Extension bill; the Cotton Anti-Option bill, the bill to create a United States Corporation Commission, the bill to establish a Bureau of Markets in the Department of Agriculture, the bill to regulate the Consular Service, the bill to authorize the coinage of three cent and one-half cent pieces, the bill to regulate immigration, and the joint resolution to extend the campaign publicity law to candidates for President and Vice-President. Among the riders to the appropriation bills which failed were the attempt to legislate Major-General Leonard Wood out of office; the attempt to abolish the United States Court of Commerce and the attempt to establish a seven years' tenure of eleven for Government clerks in Washington.

The President vetoed eleven bills, including the wool and metal tariff schedules. The House repassed the two latter over the veto but was not sustained by the Senate.

The session lasted 265 days. The number of bills introduced during the session were 4,245 in the Senate and 12,368 in the House of Representatives. The Senate resolutions were 237, joint resolutions 78. House resolutions 404, joint resolutions 359.

The number of public laws passed was 253.

The Scandinavian American Society.

This society was organized 1903. Its purposes are to cultivate closer relations between the Scandinavian countries and the United States, and to strengthen the bonds between Scandinavian Americans. The society has begun an interchange of university professors, and arranged a travelling exhibition of Scandinavian art in American cities, 1912-13. Headquarters, 507 Fifth Avenue, New York City. *President*—John A. Gode.

THE AMERICAN SCANDINAVIAN FOUNDATION.

Consists of a self-perpetuating board of trustees, incorporated in 1911, to hold in trust and administer an endowment of more than \$500,000, given by the late Niels Poulsen, and other funds which may be intrusted to their care for the purposes similar to those of the Scandinavian American Society. The *Foundation* has given financial support to the art exhibit of the Society, created travelling fellowships, and received the patronage of the kings of Denmark, Norway and Sweden. Headquarters, 507 Fifth Avenue. *Secretary*, Henry Goddard Leach.

Of the whole number of post-offices at the close of the fiscal year, June 30, 1912, 8,228 were Presidential offices and 50,501 were fourth-class offices.

The estimated number of pieces of postal matter of all kinds which passed through the mails of the United States in the fiscal year (1912) was 17,588,659,941. Letters, etc., registered, 42,235,000. Special Delivery pieces delivered, 16,756,499. Ordinary postage stamps issued, 9,928,263,748; postal cards, 909,411,045. The annual aggregate number of letters transmitted through the post-offices of the world may be estimated at 50,000,000,000, and of newspapers, 15,000,000,000.

Polar Discoveries in Recent Years.

(By Major-Gen. A. W. Greely, Gold Medalist of Royal Geographical Society and of Societé de Géographie.)

For the first year in the history of the world man is in possession of definite information as to the physical conditions surrounding the North and the South Geographical Poles. This summary brings together in correlated form the principal discoveries made by daring explorers during the past few years in the polar regions.

ARCTIC DISCOVERIES.

Through the priority of its exploration, and also on account of notable achievements therein by Americans, the condition of geographic discovery within the Arctic Circle is first considered. The previous nearest approach and the ultimate attainment of the North Pole were made over what is known as the American route, which was primarily opened up by the explorations of the expedition commanded by Dr. Elisha Kent Kane, United States Navy, during 1833-1855, which had its winter quarters in Van Rensselaer Harbor, West Greenland. Kane contributed not only the first full account of the Etah Eskimaux, but also most valuable information as to the climate, the tides, the magnetic conditions, the fauna and the flora of this hitherto unknown region. Moreover, by the sledge journey to Cape Constitution, at the entrance to Kennedy Channel, he made known to the world the wonderful waterways along the west coast of Greenland which connect Smith Sound with the Arctic Ocean, acknowledged as the easiest route to the Pole. In the United States Naval expedition of 1870 Charles Francis Hall pushed the Polarists into the newly discovered Arctic Sea, reached an unprecedented latitude by ship, added nearly 200 miles to the coasts of northwest Greenland and extended Grant Land to within 413 miles of the Pole. In 1875-1876 his immediate successor, Sir George Nares of the British Navy, wintered in the Alert on the shores of the Polar Sea and through his lieutenants, P. Aldrich, L. A. Beaumont and A. H. Markham, extended Grant Land to 85° W. longitude, pushed Greenland northward to Cape Britannia and made a world's record of nothing by reaching 83° 24' on the ice of the great frozen sea. From 1881-1883 Lieut. (now General) A. W. Greely, United States Army, occupied one of the International Circumpolar Stations, at Lady Franklin Bay, 81° 44' N., 65° W., where were made scientific observations of unsurpassed polar value on the climate, the tides, the fauna, the flora, the geodesy and of the magnetism of the region—it was the most northerly station occupied. In the supplementary work of physical geography, through his own journeys the interior of that remarkable Arctic paradise—ice-free and vegetation-covered Grant Land—was explored, while Lieut. J. B. Lockwood and Sergt. (now Colonel) D. L. Brainard covered by their discoveries one-eighth around the world north of parallel 80° N. to 86° W. longitude, the honors of the "farthest north" from England, which had held them for three centuries. Then came Civil Engineer (now Rear-Admiral) Robert E. Peary, United States Navy, whose series of unsurpassed Arctic and magnetic efforts have covered 23 years. He crossed twice the glacial cap of Greenland, filed in the northwest coast of Grant Land and rounded Greenland some ten miles north of Lockwood, thus attaining the northernmost known land of the earth. The crossings of Greenland were marvelous journeys though unfortunately they were notably barren of results, as Peary was deceived both in believing that he had reached the Greenland Sea and also in thinking that he had determined the insularity of Greenland—honors that fell to Mylius-Erichsen, who paid for them with his life. In 1908 Peary made his final voyage, wintering in the Roosevelt on the shore of the ice-clad Arctic Ocean. He had with him 49 Eskimaux, 226 dogs, and was determined to surpass his own record—the highest north—of 87° 6' N. in 1906. Commencing field work on February 15, aided by a series of splendid supporting parties of Eskimaux and whites, Peary reached the North Pole across the frozen sea on April 6, 1909. In the northward as well as in the return journey Peary and his three men—the negro Henson and two Eskimaux—made record travel never even approached in previous Arctic exploration. Northward they traveled 140 miles in 5 days and on the southward journey made over 400 miles in 16 days, of which 130 miles were traversed in 3 days. The location of the North Pole is on a deep, ice-covered ocean, the soundings increasing regularly from 110 fathoms in 84° N. to 1,500 fathoms within 5 miles of the Pole. The claims of Dr. Frederick A. Cook that he reached the North Pole on April 21, 1908, have not yet been established, for the satisfaction of scientific authorities. Scarcely second in importance to the Arctic work of Peary are the discoveries of the Dane Mylius-Erichsen. From the winter quarters of the Danmark in 1908 near Cape Bismarck, East Greenland, with Lieutenant Koch, Mylius-Erichsen completed the exploration of all the unknown coasts of Greenland, which he proved to extend in an unbroken continuity north and south of about 1,625 statute miles, from Cape Farewell, 60° N. to 83° 40' N. After his daring and successful efforts to connect Northeast Foreland with Navy Cliff of Peary, Mylius-Erichsen perished of cold and starvation after heroically crossing in the darkness of the polar winter the inland ice between Denmark Flord and Lambert Land. Ejnar Mikkelsen, another Danish explorer, by heroic efforts involving two years of fearful struggles and sufferings succeeded in recovering the missing records of Mylius-Erichsen and brought them back to Denmark in 1912. These records revolutionize the cartography of northeastern Greenland. On the erroneous supposition that he had reached the Greenland Sea Peary filed in the coast by a line trending almost straight from Academy Glacier to Lambert Land. Mylius-Erichsen discovered that Peary Channel is merely a fiord and that Hazen (Hellprin or Peary) Land is not separate, but is a northerly extension of Greenland. He also carries Greenland no less than 22 degrees of longitude to the eastward of Peary's farthest, to Northeast Foreland, which is in 12° W., 83° N. Not only is the area of northern Greenland greatly augmented—the increase amounting to 150,000 square miles—but Northeast Foreland proves to be within 23 degrees of longitude of Spitzbergen, an unexpected and remarkable narrowing of the principal connecting waterway between the Atlantic and Arctic Oceans. Elsewhere in the New World recent and important Arctic explorations are those of Sverdrup, Amundsen and of Stefansson. In 1900-1902 O. Sverdrup, from his base in the Norwegian Fram in Jones Sound, explored the west coast of Grinnell Land to Greely Flord and attained 81° 37' N. Off the coast he discovered Heiberg and Ringnes Islands. In 1903-1905 the Norwegian explorer, R. Amundsen, from his base on King William Land, relocated by elaborate magnetic observations the North Magnetic Pole in about 70° N. 97° W. Steaming west he then made in the Gjoa, a tiny boat of 46 tons, the Northwest Passage over the route discovered by Franklin. It was the first passage made by ship alone. From 1908-1912 V. Stefansson, under the auspices of the American Museum of Natural History, New York City, pursued ethnological investigations of the Eskimaux along the Arctic coasts from the Mackenzie River eastward to Bathurst Inlet. From Great Bear Lake as a base he explored the shores of Dolphin Strait, Coronation Gulf and Bathurst Inlet, subsisting on the game of the country. Sharing for many months the intimacies and vicissitudes of a wandering life with the Eskimaux he enjoyed special facilities for acquiring an accurate knowledge of the language, the customs, the beliefs and the life methods of various bodies of Eskimaux. Between Cape Bexley and Bathurst Inlet he met a thousand natives in all whose lives were entirely devoid of association with white men. Indeed there were groups representing 200

POLAR DISCOVERIES IN RECENT YEARS—Continued.

people who had never seen either a white man or an Indian and were unfamiliar with the Eskimaux to the westward. The most extraordinary discovery was an isolated band of Eskimaux whose physical characteristics presented most marked resemblances to the Scandinavian types of northern Europe. Of the 40 in this band no single person had black eyebrows, but they shaded in color from brown to almost white. Stefansson supplemented his observations by photographs and head measurements. He considers himself justified in believing that these prove the existence among the Eskimaux of persons with distinct European traits. Unquestionably they present blond characteristics, as shown by reddish hair, shading gradually from light on the forehead to nearly black at the back. Many of them had straggling light beards, some of a brownish or yellowish tinge, while others were of very light straw color—almost white. Of the thousand or more Eskimaux examined by Stefansson at least a dozen had blue eyes.

Stefansson has decided to renew his work among the islands to the north of the American continent. Establishing his permanent quarters on Banks Land, with a scientific staff, he will complete his ethnological and geological studies of adjacent islands and of the natives living thereon. Additionally, he contemplates sledging from Banks Land northwestward with a view of determining if land there exists, as is believed to be the case by General Greely and Prof. Harris.

ANTARCTIC DISCOVERIES.

Rich as have been recent Arctic voyages in results, yet they yield in extent and in importance to those obtained in Antarctic explorations since the year 1900. While Americans at the beginning of the twentieth century were assured that their countrymen, N. B. Palmer and Charles Wilkes, had discovered parts of a great southern continent, yet the existence of Wilkes Land was widely discredited in Europe. Capt. R. E. Scott, R. N., in 1905 stated that he had definitely disposed of Wilkes Land. Just before the beginning of the new century (1898), the Belgian Lieutenant Gerlache, in the *Belgica*, was beset off the west coast of Palmer Land, whence drifting he touched the continental shelf in 71° 31' S. The re-establishment of a general belief in an austral continent may be said to have begun with a Scotch explorer, W. E. Bruce, in the *Scotia* , who discovered an ice-clad, undulating country, Coats Land, in 74° S., 24° W., diametrically opposite South Victoria Land. The same year, the Swedish Professor O. Nordenskiöld, exploring the east coast of Palmer Land to 66° S., found it to be a mountainous, glacier-covered region. The German expedition under E. V. Drygalski in 1901-1902, wintered in the Gauss in 60° E., 67° S., where he discovered Kaiser Wilhelm Land, extending from about 87° E. to 94° E. The British expedition of 1901-1904, under R. E. Scott, R. N., from its base under Mount Erebus, South Victoria Land, discovered a new country east of the Great Barrier—King Edward VII. Land, extending from 152° to 157° E. He followed the Great Barrier, an oceanic icecap of enormous thickness and very great extent, abreast of the mountain ranges of Victoria Land to 82° 17' S., and also ascended the glacial covering of the Land, where by a journey of 300 miles he reached at an elevation of over 9,000 feet, a point in 77° 39' S., 147° E.—the glacial cap being unbroken and ascending. France also took the field, Dr. J. Charcot leading expeditions—1904 in the *Francis* and 1909 in the *Pourquoi Pas?* Charcot has greatly increased our knowledge of West Palmer Land, having traced the coasts southerly to 73° S., adding Loubet and Falleres Lands in the extreme south. In addition, he sailed south of the 70th parallel to longitude 125° W., crossing an unknown sea. Sir Ernest Shackleton, a comrade of Scott's in 1902, personally equipped an expedition, 1908-1909, which made scientific and geographic discoveries that in extent and importance have rarely, if ever, been surpassed by any other single expedition. Geographically, Shackleton and his parties in 127 days traveled 1,755 miles, reaching on January 9, 1909, a glacier-covered plateau about 11,000 feet above the ocean, in 88° 23' S., 162° W., within 97 miles of the Pole. This journey also added eight mountain ranges, and disclosed the greatest known areas of glaciation, both on sea and land. The so-called Great Barrier is a floating icecap on the ocean, covering probably more than 150,000 square miles of the Antarctic Ocean. Among contributing ice-rivers is the Beardmore Glacier, which is about 1,000 feet thick, has an average gradient of 60 feet to a mile, and a surface area exceeding 5,000 square miles. The glacial ice-cap of the Continent of Antarctica extends north and south over 1,000 statute miles, and in area possibly exceeds all Europe by five per cent. Geological specimens corroborate the continental features of the land, and coal seams within 300 miles of the Pole indicate a former milder climate with extensive vegetation at the very Pole. Deductions show that the Continent of Antarctica has an average elevation approximating 6,500 feet, double that of Asia. Three professors, David, Mackay and Mawson also reached and located the South Magnetic Pole, in 72° 25' S., 155° 16' W., on the inland ice more than 7,000 feet above the ocean. Captain Scott renewed Antarctic work in 1910, entering the circle with the best equipment for scientific work ever known. A absent now two years Scott is pursuing his scientific work, making the reaching of the Pole a supplementary matter. The last report from his field party, about the middle of January, 1912, shows that he was in 87° 32' S., within 148 miles of the Pole. A Japanese Lieutenant, Shirase, in the *Kainan Maru*, landed at Whale Bay, Great Barrier, January 16, 1912 and made short inland explorations, besides landing on King Edward VII. Land, where Lieutenant Takeda reached an elevation of 1,300 feet in 156° 27' W., 80° 05' S. Amundsen, the Northwest Passage celebrity, established his winter-quarters on the Great Barrier in 1911, and by a series of wonderful marches reached the South Pole on December 16, 1911, its position being determined by hourly altitudes of the sun for 24 hours by several observers simultaneously. Amundsen's route followed the 164th meridian (west) to the mountain range in about 85° S., where his party crossed Devil's Glacier, between mountain peaks about 15,000 feet high. The glacier led to the South Polar Plateau, about 10,500 feet elevation, entirely ice-covered. The barrier ends in a blight in about 86° S., 160° W.

The late discoveries of Gerlache, Charcot, Scott, Shackleton and Amundsen quite fully bear out the theories of Sir John Murray, to whom the continent of Antarctica owes its name. The general geographical features of the south-polar problem are now settled, disclosing this as in many respects the most remarkable of regions—an ice-clad continent devoid of terrestrial life, save of the lowest organisms, crowned by a wonderful glacial table-land.

It is of special interest to note that the great and almost landless Arctic Ocean is diametrically opposite the enormous uplifted mountainous Antarctica. The mass and location of this vast southern continent, one and a half times greater in surface than Europe, should serve to elucidate vexed problems of latitude-variations and pole-shifts in the past.

Most gratifying to geographic students, and especially to Americans, are the results of the Australian expedition of 1911 of Prof. D. Mawson (who located the South Magnetic Pole). His ship *Aurora* skirting the Antarctic circle for 1,200 miles has proved the existence for this distance of Wilkes Land, discovered by the United States Exploring Expedition of 1840, but which has been discredited by most Europeans for seventy-two years. The *Aurora* ran south of supposed Sabrina Land. Two scientific stations have been established for a year's work, one in 95° E. on the extremity of Wilkes's Termination Land, while Mawson occupies the other on Adèle Land. The German expedition of Lieutenant Filchner, 1911, is pursuing its work in Weddell Sea with results as yet unknown.

Geographical Research in 1912.

AFRICA.

The union of Northern and Southern Nigeria into one government, which had been under consideration for some time, was decided on in February. The completion of the railway from *Baro*, on the Niger, to *Kano*, with its connection with the Lagos line by way of *Jebba* and *Zungem*, supplied a link between the two protectorates and paved the way for their amalgamation.

Letters were received from the Austrian Expedition to Northern Uganda, which started out in the Fall of 1911, for ethnological research in the region between Lake Rudolf and the Nile. Mount Elgon was ascended and members of the expedition climbed to the highest point north of the crater.

A party from the Italian Military Geographical Institute was sent to Tripoli, to make surveys, which will include the astronomical determination of the position of Tripoli, the measurement of a base line, and tidal observations for the determination of an altimetric datum.

The course of the Mbam between 5° and 6° 30' N. lat. was investigated by Captain Winkler and that of the lower Nun by Lieutenant von der Leyen. Both the Mbam and the Nun are too much impeded by rapids, falls, and shallows to be of practical use for navigation and they are little used even by the natives. In its lower course the Mbam is known as the *Leba*.

Dr. Kmunke's expedition through Northern Uganda reached Nimule on the upper Nile in February, thus crossing one of the least known portions of the protectorate. From Elgon they went by way of Lakes Salsburg and Kirkpatrick and through the districts of Nakual, Lobor and Kanichuru.

A new territorial division of the Belgian Congo was promulgated in a royal decree, dated March 28. The changes consist chiefly in the subdivision of the older units, especially in the interior parts of the colony, where many were of unmanageable size.

An examination of some of the features of Egyptian deserts was made by members of the Carnegie Institution of Washington, D. C. The water in the Libyan desert is either pluvial or is derived from precipitation areas so widely distant that the supply is independent of local climatic conditions apart from evaporation. Distances as great as 40 miles were traversed without the sight of a single plant, dead or alive.

The Italian Commission for the survey of the frontier of Italian Somaliland with Abyssinia returned to Italy in January. Besides the precise survey of the frontier, the route from Dire Dawa (near Harrar) to Brava was carried out, and numerous astronomical determinations of latitude and longitude were made.

P. J. Rainey's African expedition returned with a large number of birds and reptiles.

The boundaries between the wedge of Portuguese territory running up the lower Zambezi to the confluence of the Loangwa and the British territories to the north and south were fixed.

AMERICA.

Mount Sir Sanford, one of the highest peaks in the Canadian Rockies, was first scaled by Howard Palmer, Secretary of the American Alpine Club, on June 24. The mountain, which is 11,634 feet high, is practically one continuous wall of ice.

Engineers were sent out by the Canadian Government to report on the best harbor on Hudson Bay to serve as the port of call for a line of steamers from Europe and also the terminal point of the proposed railway from Le Pas, the choice in the latter lying between Port Nelson and Fort Churchill.

The existing maps of Great Slave Lake, according to reports from H. V. Radford, are very inaccurate. The lake, he claims, does not extend east of 111° 45' W. longitude.

Letters have been received from Dr. Koch-Grillberg's expedition in northern Brazil. The little known region about the headwaters of the Rio Branco, and the great northern branch of the Rio Negro, is being explored. Studies are being made of the habits, customs and languages of the natives.

Dr. Max Schmidt completed some interesting researches among the headwaters of the Paraguay and Guapore. He visited the source region of the Jauril, Juruena and Guapore, studying the Paressi Indians, who are comparatively recent immigrants to this region.

An expedition started out to the northern interior of South America, in charge of Dr. Hamilton Rice. After reaching San Marten he proposes to descend the Ariari River to the *Guaviari* and then cross into the basin of the Waupes. He will make maps of the rivers and country he traverses.

The expedition organized by Yale University and the National Geographic Society, under the leadership of Prof. Bingham, continued the work of the Yale Peruvian Expedition of 1911. Maps were made of the Cuzco basin and the routes connecting the later Inca capital of *Victos* with the rest of Peru.

The American Geographical Society celebrated its sixtieth anniversary, and the completion of its new building in New York City. The society invited geographers from Great Britain, France, Germany and other countries as its guests. Trips were made to Yellowstone Park, Glacier National Park and other places of interest in the United States.

The province of Manitoba, Canada, secured the extension of its territory to Hudson Bay, by an act which passed the Dominion Parliament on March 12. This gives an outlet to the sea and a probable future route to Europe by way of Hudson Bay is secured.

A protocol signed at La Paz authorized the Delimitation Committee to fix the Peru-Bolivia boundary line between the Heath and Yaveria Rivers. The Commissioners have now fixed the entire line of the frontier between Peru and Bolivia.

The Smithsonian Museum has four expeditions in the field collecting exhibits for the Panama-California Exhibition, to be held at San Diego, Cal., in 1915. One is at work in the upper Yenesei region of Siberia, two at St. Lawrence Island, Alaska, and the fourth at the Philippine Islands.

Parts of Labrador never before visited by a white man were explored by H. G. Bryant, of the Philadelphia Geographical Society. He explored and mapped the St. Augustine River from the sea to its source, a distance of 141 miles.

A party headed by Prof. H. Parker of New York City discovered a new pass through the Alaska range, explored about 60 miles of country which has been a blank on the map, and verified the statement that the ascension of Mt. McKinley can be made along the northeastern ridge.

ASIA.

Permission was granted by the Dutch Government to A. F. R. Wollaston to explore West New Guinea. The principal object of Mr. Wollaston's expedition will be the exploration of the Snowy range. An attempt will be made to reach the watershed and if possible to climb Mount Carstensz (15,960 feet), the highest point in the range.

The Arbor expedition on the northeast frontier of India sent a party to explore the unknown part of the Tsang-po valley and to reach the great falls reported to exist near the Tibetan border. Another party explored the Yam-ne valley, and the Yam-ne River was surveyed up to a point 12 miles north of its junction with the Debong, and the latter was also surveyed for several miles.

A collection of papers connected with the fishery survey of the Bay of Bengal was issued by the

GEOGRAPHICAL RESEARCH IN 1912—Continued.

Bengal Secretariat Book Depot of Calcutta. The papers contain lists of the fish in the bay, their favorite haunts and their periodic migrations. Altogether 150 species were identified, and of these at least six were new to science.

An exhaustive account of several months' sojourn in the Behring and Copper Islands in Behring Sea was published by E. K. Suvorov in the *Izvestiya* of the Geographical Society of St. Petersburg. The southern part of Behring Island is a chaos of ranges and detached summits rising to a height of 2,200 feet, and is almost inaccessible except along the coast. Everything on Copper Island tends to show that it lies on a line of fault, and the remains of animal organism indicate that it came into existence in the Tertiary period.

An unknown area in the extreme north of the Kimberley division of Western Australia, between Cambridge Gulf and Drysdale River, is being explored by C. P. Congrave.

B. Raunklaer, under the auspices of the Royal Danish Geographical Society, travelled from Aleppo, Bagdad, to Basra. He made valuable anthropological, zoological and botanical observations, and mapped out the country traversed.

From a study of Japanese Pliocene and post-Pliocene fossils M. Yokoyama claims that Japan during the diluvial period had a warmer climate than the present, and that the changes in temperature have been in the reverse direction from those in Europe and America.

The forests and mountains on the northern boundary of Korea were explored by a representative from the American Museum of Natural History. A partial ascent of Paik-Tre-San, one of the highest mountains in Northern Korea, was made to explore what the Koreans call "Three Big Rivers." The rivers were found to be three lakes ranging in length from one to two miles.

It was reported that Dr. Sven Hedin was organizing a new expedition to Asia.

The capital of India was moved from Calcutta to Delhi.

Russia endeavored to establish communication by sea between Pacific ports and northwestern Siberia, via Behring Strait. Parties were sent out to investigate the port of Nishni Kolymsk at the mouth of the Kolyma River, to study the conditions of navigation between the mouths of the Kolyma and the Lena and to survey the coast of Kamchatka.

The French Geographical Society sent out the auxiliary motor ship *Curieuse* to study the fauna and flora of the Trissam-Oceana Islands south of the Cape of Good Hope, the islands north of Australia, and other little known islands in the Pacific Ocean.

An investigation of the native types of Siberia and China was made by Dr. A. Hrdlicka of the National Museum, Washington, D. C., with the object of comparing them with the American Indians.

A Dutch expedition to New Guinea started out in August and will be in the field about nine months. It will make collections in the regions from 7,000 feet to the snow limit and will explore the mountains north of Wilhelmina Peak.

The Takla-Makan Desert, the worst of all deserts in Central Asia, was crossed by a priest of the West Hongwanji Temple of Kioto. He found sand mountains 12,000 feet high, and that the desert was a veritable sea of sand.

EUROPE.

A descriptive summary of the caverns and underground channels of Greece was published by N. N. A. Siderides. The caverns described are (1) the Palamytos, at about the centre of the eastern shore of Lake Kopais, (2) the Great Katavothra, at the northeast extremity of Lake Kopais, at present blocked near its entrance by a great fall of rock, and (3) the Katavothra of Bylna, a short distance north of the Great Katavothra, and which judging from the size of the channel leading to it seems to have been the most important of all.

The opening of an Alpine road, affording uninterrupted communication from the mountains of Dauphine to the Cote d'Azur, suggested the opening of a similar road in the Pyrenees. Studies have been made for such a road, and it was found that a road through the Pyrenees would be feasible.

The Tenth International Geographical Congress will be held in Rome, Italy, beginning March 27, 1913, and will last one week.

Representatives from Russia, Sweden and Norway met at Christiania, Norway, and agreed that Spitzbergen will be a neutral territory open to all nations, but administered by a joint board consisting of one representative of each of the contracting powers.

In tracing the analogies which may be made out between the central massif of France and that of Bihar in the Eastern Carpathians, Dr. L. Sawicki, a Hungarian geographer, defines the type under which both massifs may be considered to fall.

A study of the annual migrations of sheep between the Winter and Summer feeding grounds in the Montpellier region was contributed by M. M. Sorre to the Bulletin of Languedoc Geographical Society.

The two hundred and fiftieth anniversary of the foundation of the Royal Society (Great Britain) was celebrated during the week beginning July 15.

A joint committee comprising representatives from the Royal Meteorological Society and from the Meteorological Office planned the publication of data on barometric pressure and wind direction in Great Britain.

Changes have been made in the names of several German cities. One of the most important is that of "Rixdorf" to "Neukölln," which is a suburb of Berlin having a population of about 236,000. Prof. A. Malladra, of the Royal Observatory of Vesuvius, Italy, succeeded in descending into the crater of Mount Vesuvius on May 24. The crater is about 984 feet deep, and 1,500 feet in diameter. The temperature ranged from 187 to 200 degrees Fahrenheit.

POLAR RESEARCH.

Capt. E. Mikkelsen and his engineer, who left Copenhagen, Denmark, in 1910, to recover the records left by M. Erichsen in Denmark Flirth, returned in the Summer of 1912 with the records.

Word was received from V. Stefanson and Dr. R. M. Anderson, who left New York City in 1908, to make ethnological studies in the Arctic region for the American Museum of Natural History, that they had made complete surveys of Langston Bay, Horton River and several other uncharted regions. On the south coast of Victoria Land a race of blond Esquimaux was found.

Dr. Mawson's party landed from his ship the *Aurora* on the Antarctic continent in January. He spent several weeks exploring, but found no trace of the supposed *Claire* Land, thought to have been seen by D'Urville in 1838.

Capt. J. P. Koch set out to explore the interior of Greenland. The Winter of 1912 he spent in scientific work on the west side of Queen Louise Land. In the Spring of 1913 he will start across the ice sheet and hopes to reach the west coast at Salmon fjord about the first of July.

M. A. de Querval, a Swiss meteorologist, will also make explorations in Greenland. He contemplates crossing from Holstenborg on the west coast to Angmagssalik on the east. From Koch's and Querval's expeditions valuable data should be obtained on the interior of Greenland.

GEOGRAPHICAL RESEARCH IN 1912—Continued.

The Crocker Land expedition was prevented from starting by the death of one of its leaders. However, plans are being made for another expedition that will begin work in the Summer of 1913. An expedition was organized in Germany by Lieut. Schroder-Stranz to circumnavigate North-east Europe and Asia. Scientific researches will be made during the voyage, which is expected to last from three to four years.

An expedition was planned by the Russian explorer Russanof to Nova Zembla, with the object of further testing the possibilities of navigation to Siberia around its northern end.

The Kaiman Maru, with Lieutenant Shirase's party on board, returned to Yokohama on June 19. It is stated that Shirase does not believe that King Edward VII. Land is connected with South Victoria Land.

The Terra Nova, the vessel of the British Antarctic expedition, arrived at Akaroa, New Zealand, on April 1 and brought news that on January 3 Captain Scott, with five men, were within 150 miles of the South Pole, and that he intends to remain another year in the Antarctic. Captain Scott left the base at McMurdo Sound on November 2, 1911, for the poleward journey and arrived at latitude 87° 32' S. on January 3. Nearly three weeks before this date Captain Amundsen had reached the South Pole.

The loss of the White Star Steamer "Titanic" by collision with an iceberg caused considerable attention to be paid to the formations and movements of icebergs and ice fields in the North Atlantic Ocean. Among the many publications that were written on the subject, the following are worth mentioning: "Icebergs," by Prof. H. T. Barnes, published in the Royal Institute Proceedings of May 31; "Drift Ice," by H. O. Baschin of the Geographical Institute of Berlin; and "A New System for Preventing Collisions at Sea," by Sir Hiram S. Maxim.

A Russian Arctic expedition was planned by Captain Ssedov, who proposes to proceed in a ship to Franz Josef Land, and thence to attempt a sledge journey over the ice to Greenland, by way of the Pole.

Reports were received from Dr. Charcot of his visit to Jan Mayen. He also visited Egg Island, where he found no signs of recent volcanic activity.

Review of Scientific Progress in 1912.

ARCHAEOLOGY.

At Carhemish, Syria, quays were discovered below the Citadel mound, decorated with reliefs in the style of the Cappadocian monuments, and other reliefs were found along the wall of the great courtyard in front of the lower palace.

Interesting discoveries of antiquities in the time of King Narmer of the First Dynasty, which showed that crocodile worship in the Fayyum was already established in his time, were made by Prof. Petrie, in a necropolis at Kafr Ammar in Middle Egypt.

Excavations were made at Ostia (about 13 miles from Rome, Italy), by Prof. Staglieri, who uncovered many houses and tombs.

American archaeologists have been working at Sardes, the ancient capital of the Kingdom of Lydia, and at the village of Sart. On the luner face of the wall of the Temple of Artemis, in Sardes, a record of a mortgage was deciphered.

During the past year the excavation of the Oslerioff at Abydos continued, which was started nine years ago by the Egyptian Research Account. Tombs from the First Dynasty to the Roman period have been opened in the cemeteries, and in the sand skeletons, jars and coins have been found.

Many new and interesting discoveries were made in Pompeii. Houses have been found with projecting balconies which, although common in Nocera and in other Campanian towns, were rare in Pompeii. A building was unearthed, the front of which was covered with beautiful frescoes representing various deities.

Parties from the Imperial Ottoman Museum at Constantinople excavated the tumulus of Langaza, near Salonica, and brought to light a vaulted tomb of the Macedonian period.

The German expedition in Central Mesopotamia has been at work at Tel Halef (the site of the ancient capital of the Hittite monarchy), and succeeded in unearthing a palace, with remarkable sculptured groups in a perfect state of preservation. The palace was built about the fourteenth century B. C.

A large cemetery was found by members of the British School of Archaeology in Egypt, only 35 miles south of Cairo, which dates from the earliest historic age down to the Pyramid period. A special feature of the cemetery is the extraordinary preservation of both the woodwork and the clothing found.

A remarkable find of prehistoric weapons and ornaments was made at St. Kanzlon, in the Karst Mountains, not far from Abbazia, Austria. At a depth of about three feet a large number of bronze articles were unearthed, the date of which was estimated as 1,000 B. C.

Work at Memphis, by the British School of Archaeology in Egypt, resulted in the discovery of a number of monuments of immense size. One of these was the largest known example of the couchant Sphinx, being 26 feet long and weighing over 80 tons. It belongs probably to the Nineteenth Dynasty of about 1,300 B. C.

An expedition under the direction of the school of American Archaeology was at work at Quirigua, Guatemala. On excavating a mound near Temple Court, a structure of several rooms was unearthed, having hieroglyphic texts containing important data.

At Samaria, in Northern Palestine, the palace of a Hebrew King, believed to be the Ivory house of Ahab, was unearthed.

Canadian archaeologists working under the direction of H. I. Smith, unearthed near Prescott, Ontario, the remains of an Indian settlement.

At Jensen quarry, near Rock Springs, Wyo., the vertebrae of a dinosaur which in life exceeded sixty-five feet in length, was uncovered.

Prof. R. L. Hull of Yale University reported finding the remains of a two-toed horse in Briscoe County, Texas. He also reported unearthing the bones of a camel and a ground sloth.

ASTRONOMY.

An important contribution to stellar photometry was published by Prof. Pickering of Harvard University, giving the adopted magnitudes of ninety-six stars measured in the Harvard polar sequences.

REVIEW OF SCIENTIFIC PROGRESS IN 1912—Continued.

A spectroscopic determination of the period of rotation of Venus, which was found to be about one day, was made by M. Belopolsky. Another astronomer determined the period as 23 hours, 28 minutes.

That the moon is not round but oval is the conclusion reached by Prof. Castadilobo of Coimbra University, Portugal. During an eclipse of the sun he took cinematograph pictures of it, and from them found that at the time of the maximum obscuration the moon while completely blotting out the sun at top and bottom, did not quite cover it on the right and left. From this he concluded that the moon is not a sphere, and furthermore he estimated the difference between the greatest and least breadth as about 3 miles.

A new star of the fourth magnitude was discovered at Kiel on March 13. It was stated to be near Theta Geminorum. Another new star was discovered in Gemini by M. Enebo of Dombass, Norway, on March 12.

A catalogue of 9,800 stars was published by T. W. Backhouse. The catalogue includes the whole sky from pole to pole, and shows all stars visible to the ordinary eye. The magnitudes are discussed and reduced to a common system.

The previous values of the axis of Mars, determined from the shifts of the orbital planes of the satellites, were confirmed by Dr. Struve. He found the obliquity of the equator to the orbit to be $25^{\circ}10'2''$.

The eclipse of the sun, April 17, afforded an opportunity of determining the exact path of the moon's shadow and the duration of totality.

The Transvaal Observatory at Johannesburg, South Africa, was renamed the Union Observatory. The work carried on will be of an astronomical nature, including the collecting of seismological data.

A rough wedge-shaped fragment of a meteorite, weighing about 1,900 grams, was found in Scott County, Kansas. It contained particles of iron and iron sulphide, one to two millimetres in diameter, evenly disseminated throughout its mass.

The orbit of the asteroid 1911 M. T., calculated by Messrs. Haynes and Pitman, are as shown by previous observations fairly accurate. The next opposition will take place in March, 1913, but most of them occur when the planet is near aphelion, and are therefore unfavorable for observation.

The discovery of radium, uranium and emanation radiations in the spectrum of Nova Geminorum, was reported by Dr. H. Gleibeler.

The 30-inch refracting telescope for the Allegheny Observatory, River View Park, Pa., was completed.

It was reported from the observatory at Mount Wilson, Cal., that, with the exception of the image forming lens, the new 100-inch reflecting telescope was completed.

The occultation of Venus, on April 15, and that of Mars on January 1 and 28, were the only planetary occultations of 1912 that were visible.

A new form of telescope mounting was devised by J. Hartness of Springfield, Vt. The telescope has no polar axis, but the same result is secured by a turret mounting revolving in the plane of the equator. To the turret is fixed the declination axis about which the telescope revolves, and where the declination axis cuts the optical axis of the telescope there is a totally reflecting prism turning the beam through 90 degrees. There is no dome to shelter the objective.

The Argentine Congress appropriated money for a 5-foot reflecting telescope for the National Observatory at Cordoba.

CHEMISTRY.

The Committee of International Atomic Weights issued its report and table of atomic weights to be used in 1913. The list numbers eighty-two elements, having been increased by the addition of niton, the name given to the emanation of radium.

A simple process to obtain sulphuric acid of the necessary degree of purity for estimating minute traces of arsenic was brought out by G. Bressanly and described in *Gazzetta Chimica Italiana*.

Pure metallic vanadium was prepared and its properties studied by Messrs. O. Ruff and W. Marten. The melting point of the pure metal was 1715°C ., and its specific gravity at 18.7°C . was 5.688. In the fused condition it would dissolve either vanadium trioxide or carbide, to form mixtures of higher melting points than the metal.

A systematic examination of thirty-six different kinds of vegetable products, including fungi, fresh and dried vegetables and cereals for arsenic, was made by Messrs. Jadin and Astruc. Arsenic was present in varying proportions in every instance—for example: in fresh vegetables it ranged from .004 milligramme in peas to .023 milligramme in lettuce.

A new alloy of radium and silver was brought out by Messrs. De Marc and Jacobs. It was obtained by reducing a mixture of silver chloride and radium sulphate by means of calcium carbonate and charcoal in a gas furnace. The resulting alloy was a yellowish radio-active substance, which was sufficiently tenacious to be drawn out into a thin wire.

The viscosity of ethylene and carbonic oxide at temperatures down to 150°C . was observed by Dr. O. Zimmern. At this temperature he found that Sutherland's law (the viscosity of a gas should vary as the square root of the absolute temperature of the gas) no longer held.

A new compound of carbon and nitrogen was prepared by M. G. Darzens. He names it carbon pernitride, and prepares it by the interaction of cyanogen bromide and sodium hydrazoate. From the results of experiments, M. Darzens concludes that the new compound is the most endothermic substance known.

A method of making synthetic rubber was outlined by Prof. W. H. Perkin at the Eighth International Congress of Applied Chemistry, held in New York City during September.

By employing a high temperature and a high pressure Dr. F. R. Bergius succeeded in producing artificial coal from cellulose in about 24 hours, analogous to that produced by nature.

A new source of potash was discovered in alunite. The largest occurrence is near Marysvale, Utah, and the deposit is of such importance that the United States Geological Survey issued Bulletin No. 511 concerning it.

A process for the synthetic manufacture of ammonia was brought out by Dr. H. A. Berntsen of Ludwigshafen, Germany.

A cheap fermentation process for the production of fusil oil, one of the raw materials of isoprene, was discovered by Prof. Fernbach of the Pasteur Institute. Isoprene is a substance having the principal properties of natural caoutchouc and can be used for tires, electrical installations and other purposes that rubber can.

Two important announcements were made by Dr. A. E. H. Tutton: first, that the chemical nature of any substance which crystallizes can be ascertained by measuring the angles of the surfaces of the crystals, and second, that means have been devised to render the molecules and their arrangements in a crystal visible.

GEOLOGY.

The great slides of the Culebra cut, of the Panama Canal, were discussed by D. F. MacDonald of the Isthmian Canal Commission. He finds that the slides are generally due to geological conditions. The oldest rocks are exposed along the canal between Obispo and Empire, and as the same fossil

relations were found all across the Isthmus, he concluded that the Atlantic and Pacific oceans were joined at one time.

In Erin Bay, Trinidad, an island was formed on January 4. It has an area of about 2½ acres and is less than 14 feet above high water level. Geologists who have visited the new island find that it is composed chiefly of a bluish clay mud with an oily smell. The rock fragments consist of sandstone, clay-slate, burnt clay and pyrites.

The results of an investigation of the relations existing between the observed values of gravity anomalies at 124 stations throughout the United States, and the geological formations in which the stations occur, were published in the American Journal of Science for March.

The Twelfth International Geological Congress will meet in Toronto, Canada, in 1913.

The United States Geological Survey published the second edition of the Data of Geochemistry. In this publication the chemistry of geology is dealt with in detail.

The Mesozoic rocks obtained in four of the principal borings for coal in Kent, England, were examined by the Geological Survey. A knowledge of the range and character of the Mesozoic rocks in the southeast of England is of great importance as bearing on the prospects of finding coal at a workable depth in the Palaeozoic floor which underlies the area.

A study of Australian glaciations was made by W. Howchin. Australia has experienced three well defined periods of glaciation—in the Cambrian, Permo-Carboniferous and Pleistocene. In every case the distinctive evidences of ice action are so clear that it is difficult to realize their antiquity.

A paper on the Minerals of Tonopah, Nevada, was published in the seventh volume of the Bulletin of the Department of Geology, University of California.

The volcanoes of Madagascar were described by Prof. A. Lacroix. The total area covered by the volcanic rocks is at least 4,000 square kilometres, and it is believed that these belong to the Tertiary period. Craters still intact show that the volcanic activity persisted until a very late period.

Two further occurrences in the Tavistock-Launceston area, and in the Kilbride Peninsula Mayo have been added to the list of pillow-lavas which are so well developed upon several Palaeozoic horizons in Great Britain.

The occurrence of northern erratics in the Thuringian loess is attributed by H. Habenschicht to catastrophic flooding which took place at the close of the steppe-epoch that followed on the first extension of the continental ice.

The earlier thrusting in the Alps came from the northwest, and was followed by erosion carried on until a mature type of surface had been produced, is a belief advanced by B. Willis. The more recent thrusting from the southeast is regarded as Pliocene, since the scarp weathered out in the Bernese Oberland that was moved forward remains still fresh and young.

That the Thames River in England at one time had a different course than it has at present, is shown from investigations made by R. L. Sherlock and A. H. Noble, which were published in the Quarterly Journal of the Geological Society for June. The diversion of the Thames toward the south at Bourne End is believed to have been accomplished by the movement of an ice sheet.

ENGINEERING.

The Key West Railway, an extension of the Florida East Coast Railway, was formally opened to traffic on January 22. The Key West Railway is one of the most interesting ever constructed, as one part of it actually passes out of sight of land. Besides connecting Key West with the main land of Florida, it will facilitate communication with Havana, Cuba, only 90 miles away.

Rapid progress has been made on the new dock at Liverpool, Eng., which will be completed in the summer of 1913. The dock is 1,020 feet long (nearly 140 feet longer than the steamer Olympic) and has an entrance 120 feet wide.

Work on the Panama Canal has progressed favorably, and it is the intention to allow vessels to use the canal as soon as practicable, although the official date of the opening has been set for January 1, 1915. Present indications seem to bear out the opinion previously expressed by the chairman and chief engineer of the Isthmian Canal Commission, that the canal will be opened for navigation during the latter part of 1913.

The State of New South Wales is contemplating a gigantic irrigation scheme at Burrinjuck, whereby 350,000 acres in the Murrumbidgee Valley will be made suitable for cultivation. A great dam 240 feet high and 186 feet wide at its base will be built.

The Council of Administration of the Swiss Federal Railways decided to proceed with a second Simplon Tunnel by the side of the tunnel already built.

Chile is contemplating spending a large amount of money in fortifying her seaports. At the port of Talcahuano, two new outside forts and one inside will be erected, both being mounted with heavy guns. At the port of Arica, the fortifications are being strengthened, and Morro Rock, with the addition of the new guns, has been made almost impregnable.

Important sanitary works have been started at Buenos Ayres, Argentina, whereby the water and drainage systems which have only served 12 square miles are to be extended to cover an area of 75 square miles.

The Medway dock, the largest and heaviest floating dock ever built in England, was completed in June. The dock is located in the Medway River near Port Victoria, and is 630 feet long over platforms, with the side walls about 65 feet high.

On the various sections of the new subway routes in New York City upward of 5,000 men were employed. The system when completed will be the largest one in the world. (For Section on Subways, see Index.)

Canada is contemplating a 4,000 mile highway, from Halifax, N. S., to Alberni, Vancouver. It is estimated that it will take five years to complete it.

It was reported that the Union Pacific Railroad will build a 30,000-foot single track tunnel through the Sierra Nevada Mountains, at a point between Blue Canyon and Truckee. The proposed tunnel will be the longest on the Continent and will cost about \$10,000,000.

The Strawberry Tunnel reclamation project of the United States Government was completed. The project is primarily for irrigation purposes, bringing the waters of Strawberry Creek through the Wasatch Mountains by a tunnel into the Utah valley. The cost of the work is stated to be \$3,000,000.

The stone breakwater in the harbor of Colombo, Ceylon, work on which was started in 1875, was completed, making one of the finest harbors in the world. The total cost of construction was about \$15,000,000.

The new steamer Imperator (which will be completed in 1913) of the Hamburg-American Line, is the largest steamer ever built. She is 900 feet long, has a displacement of 65,000 tons, and is driven by steam turbines estimated at 75,000 to 85,000 H. P.

The Canadian Government decided to widen and deepen the Welland Canal from Port Colborne to a short distance north of Thorold. The improvements will reduce the number of locks from 22 to 7, thereby saving 8 hours from Port Colborne to Port Dalhousie. The total cost will be around \$45,000,000.

The returns of the Grand Lodges of the United States and British America for 1911 were as follows: Whole number of members, 1,493,588. Gain in membership over preceding year, 28,890.

These Grand Lodges are in full affiliation with the English Grand Lodge, of which the Duke of Connaught is Grand Master, and the Grand Lodges of Ireland, Scotland, Cuba, Peru, South Australia, Mexico, the Netherlands, Belgium, Sweden, Norway, Denmark, New South Wales, Victoria, and also with the Masons of Germany and Austria. They are not in affiliation and do not correspond with the Masons under the jurisdiction of the Grand Orient of France; they, however, affiliate with and recognize Masons under the jurisdiction of the Supreme Council. Freemasonry is under the ban of the Church in Spain and other Catholic countries and the membership is small and scattered.

* The totals are given to the nearest hundred thousand, and include Christians not separately specified. For countries outside Europe, Roman Catholics are not separately specified, but are included under the heading "Others." It is estimated that there are about 89 million Roman Catholics outside Europe, thus making a total in the world of about 268 millions, as against 177 million Protestants. Greek Catholics numbered 119,300,000. Buddhists and Brahminists about 550 millions. † Including Greek Catholics. ‡ Readjustment of boundaries owing to the Balkan war of 1912 will probably affect the figures given in table.

The aggregate of 36,109,405 represents actual church membership, and includes all Catholics (communicants, but not uncon-
firmed minors). It does not give all persons affiliated by family ties to Protestant bodies. The larger of the Protestant bodies may
claim twice the number of their communicants as nominal adherents.—EDITOR OF THE ALMANAC.

NOTE.—(a) Beside a actual church members the Christian Scientists claim several hundred-thousand unattached adherents,
(b) The London Jewish Year Book for 1910 estimates the number of the Jewish race in the United States as 1,903,928.

SEATING CAPACITY OF CHURCHES.

The total seating capacity of church edifices reported in 1906, according to the Census Bulletin
of August 20, 1909, was 58,536,830, an increase over 1890 of 14,976,767, or 34.4 per cent. The
seating capacity reported for the Protestant bodies was 53,282,445; for the Roman Catholic Church,
4,494,377; and for the remaining bodies, 760,008. The rate of increase was practically the same
for both the Protestants and the Roman Catholics, being 33.6 per cent. for the former, and 33.3
per cent. for the latter. The increase in the seating capacity of churches has kept pace with the
increase in population, the seating capacity being 69.2 per cent. of the population in 1890, compared
with 69.5 per cent. in 1906.

The average seating capacity per organization for the Protestant bodies taken together
was 317, and for the Roman Catholic Church, 436. With the single exception of the Roman
Catholic Church, all the denominations showed an average seating capacity considerably in
excess of the average membership. For the Protestant bodies the average seating capacity
was three times the average membership per organization, while for the Roman Catholic
Church the average membership was almost two and one-fourth times the average seating
capacity.

GENERAL SUMMARY OF THE ROMAN CATHOLIC CHURCH IN THE UNITED STATES.

Cardinals, 3; archbishops, 14; bishops, 97; archabbots, 2; abbots, 16; clergy, 17,491; churches, 13,939; seminaries, 83; students, 6,006; colleges for boys, 229; academies for girls, 701; parishes with schools, 5,119; attendance, 1,333,786; orphan asylums, 289; children in institutions, 1,640,049; Total Catholic population, 15,015,569. (Report of the Official Catholic Directory.)

Pope X. X., nine years ago, announced his motto to be: "To restore all things in Christ." "Plus X. has effected marked changes in important matters of church government and discipline, and has been unrelenting in attacking the doctrinal errors of Modernism, which he calls the "synthesis of all heresies." He has reorganized the Roman Curia, made up of the various sacred congregations of cardinals who assist the Pope in the administration of church affairs, revived the venerable tribunal of the Rota, inaugurated a codification of canon law, transferred the church in the United States from the jurisdiction of the propaganda as a missionary land to the immediate supervision of the Cardinal Secretary of State in the Vatican itself, instituted in Rome a school for higher biblical studies, ordered the establishment of confraternities for the teaching of catechism in every parish, issued decrees reforming church music, introduced new legislation on marriage, recommended frequent and daily communion to the people, directed the first communion be given to children on reaching the age of reason, and on November 27, 1911, bestowed the red hat on eighteen prelates, three of whom are citizens of the United States: His Eminence, John Murphy Farley, of New York; His Eminence, William H. O'Connell, of Boston, and His Eminence, Diomedeo Falconio, former Apostolic Delegate at Washington, D. C. (From a statement furnished by the Chancellor of the Diocese of New York.)

The Federal Council of the Churches of Christ.

THE Federal Council was organized as the chief consummation of the National Federation of Churches at its first meeting, held in Philadelphia, December 2-8, 1908. It is the delegated congress of thirty-two leading Christian bodies which are constitutionally federated for the purpose of providing this congress through which to realize their fellowship and united action. The Federal Council, through its Committees and Secretaries, seeks to organize efficient State and local federations, to secure co-operation in home missionary work, and to promote moral reform and social service by the churches throughout the United States.

The following Churches are represented in this Federal Council: Baptist (North), Free Baptist, Christian, Congregational, Disciples of Christ, Evangelical Association, Evangelical Synod, Friends, General Synod, Methodist Episcopal, Methodist Episcopal (South), Primitive Methodist, Colored Methodist Episcopal, Methodist Protestant, African Methodist Episcopal, African Methodist Episcopal Zion, Mennonite, Moravian, Presbyterian, Presbyterian South, Welsh Presbyterian, Reformed Presbyterian, United Presbyterian, Protestant Episcopal, Reformed Church in America, Reformed Church in the U. S. A., Reformed Episcopal, Seventh Day Baptist, United Brethren in Christ, United Evangelical, National Baptist Convention, Congregational Methodist.

The Council has active committees on Foreign Missions, Home Missions, Sunday Observance, Temperance, Family Life, Social Service, and Christian Education. The executive and field work of the Council is in charge of the Executive Secretary, Rev. Chas. S. Macfarland, D. D., Rev. E. B. Sandford, D. D., is Corresponding Secretary. Rev. Charles S. Macfarland, Ph. D., is Secretary of the Commission on the Church and Social Service. The officers may be addressed at the National office, Clarendon Building, 215 Fourth Avenue, New York City.

Religious Education Association.

THE Religious Education Association was organized on February 12, 1903, at the close of a three days' convention held in Chicago, called to consider the improvement of moral and religious education. Its object is the promotion of moral and religious training in existing educational agencies, in homes and through the press. It has no theological platform. It now enrolls over 2,600 members, including laymen, college presidents and professors, pastors, teachers and parents, interested in the problem of reverent, scientific, effective character training.

The officers are: *President*, Harry Pratt Judson, Chicago, Ill. *Secretary*, Henry Frederick Cope, 332 S. Michigan Avenue, Chicago, Ill.

Luther League of America.

President—Wm. C. Stoeber, Philadelphia, Pa. *Secretary*—Luther M. Kuhns, Omaha, Neb.

The first National Convention of the Luther League of America was held at Pittsburgh, Pa., October 30 and 31, 1895. The League is a Lutheran organization, linking together the Lutheran young people who are laboring for the good of the Church by means of many individual societies of various names and styles of organization, each with its own immediate church. The constitution declares that its objects shall be "to encourage the formation of the young people's societies in all Lutheran congregations in America, to urge their affiliation with their respective State or Territorial leagues, and with this league to stimulate the various young people's societies to greater Christian activity and to foster the spirit of loyalty to the Church." The fundamental principles are federation and co-operation. The membership of the various organizations is over 100,000. These are comprised in twenty-five States, fourteen of which already have permanent State organizations and four foreign countries. The first local organization adopting the title of "The Luther League" was organized by delegates of six Lutheran Church societies in the city of New York, April 19, 1888.

Organizations of this League exist in Canada, Porto Rico, Japan, China and India.

World's Purity Federation.

THIS Federation and the Committee out of which it grew has been at work since November, 1900, and represents the largest and first real organized movement in North America, in a national and international sense, for the eradication of the traffic in women (White Slave Traffic); for the annihilation of public vice; for a higher and single standard of morals, and for the safe and sane instruction of the young in sex hygiene. Departments of work are maintained covering every phase of Social Purity work. The Seventh International Purity Congress will be held in November, 1913.

The International headquarters are at La Crosse, Wis. The officers are: *President*, B. S. Steadwell, La Crosse, Wis.; *First Vice-President*, Judge Ben B. Lindsey, Colorado; *Second Vice-President*, Rev. Dr. Floyd W. Tomkins, Pennsylvania; *Third Vice-President*, Rev. Dr. T. Albert Moore, Ontario, Can.; *Secretary*, Dr. Emma F. A. The Chautauqua season will cover each year from the first of July to the first of September. Civic, educational, agricultural and religious conferences are held, August 15th to 31st being reserved for the Bible Conference. Business office, 1250 Bedford Avenue, Brooklyn, N. Y. (Report of 1911.)

Seventh-Day Adventists.

THE following statement has been prepared by H. E. Rogers, Statistical Secretary of the General Conference:

The doctrine of the second coming of Christ was preached extensively in the United States and Europe during 1840-1844, and found adherents in many denominations. The circulation of books and journals on this question deepened the interest, and this study and agitation brought about the formation of a movement which assumed definite form in 1846 in the New England States and was later organized as the Seventh-Day Adventist denomination. The chief tenets of this body are a belief in the literal, personal second appearance of Christ, yet without ever setting a time for that event, and the observance of the seventh day of the week as the Sabbath. Their total communicants throughout the world is 108,975. They have 116 organized conferences, 93 mission fields, 2,799 churches, 89 advanced educational institutions, 613 primary schools, total enrollment, 23,541; 37 publishing houses and branches, 102 sanitariums and branches, publish 125 periodicals, issue publications in 71 languages, are operating in about 85 countries, and employ over 10,000 evangelistic and institutional laborers, thus constituting every eleventh member an active laborer. Contributions for 1911 were \$2,363,088.29, a per capita of \$21.68. Funds for evangelistic work since the organization of the central governing body known as the General Conference, in 1863, aggregate over twenty-three million dollars. Investments in institutions, churches, etc., exceed thirteen million dollars.

Beginning in 1894, active work was begun in non-Christian lands, and has been continued until the present, so that a segregation of the work conducted in non-Christian and non-Protestant lands from the foregoing figures, indicates the following: Mission work is carried forward in 67 countries, at 140 main stations, and 145 sub-stations, with a total foreign force of 586, and 974 native helpers, a total force of 1,560 laborers. There are 413 churches, 17,565 adherents, 7,454 pupils in 205 schools, taught by 364 foreign and native teachers. Publications are issued in 64 languages, and work is conducted orally in 73 languages. Total income for 1911 from the foreign field was \$135,234.87, a per capita of \$7.69.

The headquarters is in Washington, D. C., in which place will be held in May, 1913, the next quadrennial session, which will commemorate fifty years of organized work by the denomination.

The Latter-Day Saints.

THE Mormons is a term applied to the members of the Church of Jesus Christ of Latter-Day Saints. This church was organized April 6, 1830, with six members, by Joseph Smith, at Fayette, Seneca County, N. Y. After being driven by mobs from various places in Missouri, Ohio, and Illinois, they settled at Great Salt Lake, Utah, under the leadership of Brigham Young, in 1847. The total church membership is about 450,000, and the number of missionaries, about 2,000.

LATTER-DAY SAINTS REORGANIZED CHURCH.

The Reorganized Church of Jesus Christ of Latter-Day Saints is a separate body, having its headquarters at Lamoni, Iowa. Its membership now numbers 63,090. It has 342 active ministers in the field, 29,457 Sunday-school members and 625 Sunday-schools. It claims to be the church in succession to the one founded by Joseph Smith in 1830. It was reorganized in 1851, and is presided over by Joseph Smith, of Independence, Mo., son of the Prophet. *Presiding Bishop*, Edmund L. Kelley, Independence, Mo. *General Church Secretary*, Richard S. Salvards, Lamoni, Iowa. The only church of this denomination in New York City is at the corner of Park Place and Schenectady Avenue, Brooklyn, N. Y.

Young People's Society of Christian Endeavor.

OFFICERS OF THE UNITED SOCIETY OF CHRISTIAN ENDEAVOR.—Office, Tremont Temple, Boston, Mass. *President*, Rev. Francis E. Clark, D. D.; *General Secretary*, William Shaw.

Each society is in some local church, and in no sense outside. It exists simply to make the young people loyal and efficient members of the Church of Christ. It is the Church training the young. Its motto is, "For Christ and the Church." In July, 1912, there were 79,077 societies, with a membership of 3,953,850, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan, and in all missionary lands. It is found in about the same proportion in all the great evangelical denominations and in all their subdivisions.

American Sunday-School Union.

THE First Day Society, founded in Philadelphia in 1791, still active, led to the formation of the Philadelphia Sunday and Adult School Union in 1817. With other similar societies it was changed to the American Sunday-School Union in 1824. Its object is twofold: To establish and maintain Sunday-schools; to publish and circulate moral and religious publications. It is a voluntary union of Christians of different denominations to teach the truths of our common Christianity as they are taught in the Bible.

Its great field is the rural districts. The Philadelphia Union began with one juvenile book in 1817, and one missionary in 1821. The American Sunday-School Union now issues a thousand works and nine periodicals. In eighty-eight years it has circulated \$12,000,000 to \$15,000,000 worth of Bibles, testaments and religious works. In ten years it founded 24,962 Sunday-schools, with 964,550 members; resulting in 218,083 hopeful conversions, and 1,213 churches. In eighty-eight years the Union has founded 124,613 Sunday-schools, with 5,560,636 members. It employs Sunday-school missionaries, who have organized an average of four new Sunday-schools for each day of the last eighty years. Its benevolent work costs \$225,000 yearly. Officers: *President*, Martin L. Finckel; *Vice-Presidents*, William N. Ashman, Richard Ashhurst, Clarkson Clothier; *Recording Secretary*, William H. Hirst; *Treasurer*, John E. Stevenson. Headquarters, 1816 Chestnut Street, Philadelphia, Pa.

Kingsley; *Treasurer*, Samuel Woolverton; *State Secretary*, F. W. Pearsall. This committee was incorporated under the laws of New York April 14, 1886, having for its object "the establishing and assisting Young Men's Christian Associations, and generally to provide for the spiritual, intellectual, physical and social well-being of young men in accordance with the aims and methods of Young Men's Christian Associations of the State of New York." The membership in the State is 61,203, divided as follows: General, 48,167; Railroad, 9,826; Student, 2,405; Boys' Departments, 12,933; County and Small Town, 2,723. A biennial meeting of the State Association, comprising the 221 Associations in the State, is held in February, the even years.

OFFICERS OF THE YOUNG MEN'S CHRISTIAN ASSOCIATION OF THE CITY OF NEW YORK.—General office, No. 215 West Twenty-third Street, New York. *President*, W. Fellowes Morgan; *Treasurer*, Samuel Sloan; *General Secretary*, Henry M. Orne.

There are 8,612 Associations in the world, of which 2,192 are in North America. The total membership of these American Associations is 563,479; they occupy 756 buildings of their own, valued at \$60,454,336; and have 570 libraries; number of loans, 628,034. They have 67,417 young men as students in evening educational classes, and 300,590 in their physical departments, and 103,599 different students in Bible classes. They employ 3,633 general secretaries and other paid officials, and expended last year for current expenses—local, State and international—\$11,302,547.

The World's Young Women's Christian Association.

The World's Young Women's Christian Association was formed in 1894. Eighteen National Associations are now affiliated: Great Britain, United States, Canada, Germany, Italy, France, Australasia, Finland, Holland, Japan, Portugal, South Africa, Sweden, India, Denmark, Brazil, Hungary and China. The headquarters is in London. Office, 26 George Street, Hanover Square, West. The Executive Committee is composed of a resident membership in London. Mrs. J. H. Tritton, President; Miss Clarissa Spencer, General Secretary.

The Young Women's Christian Association of the United States of America was formed in December, 1906, the object being stated thus: "To unite in one body the Young Women's Christian Associations of the United States; to establish, develop and unify such associations; to advance the physical, social, intellectual, moral and spiritual interests of young women." 208 city associations, 660 student associations and 7 county associations are members of the national organization. There are 11 Field and State Committees. Special work instituted for immigrant women, colored and Indian students, professional art students and nurses. Each year eleven summer conferences are held to train volunteer workers in Bible study and Association work. The National Training School to prepare young women for executive positions is located at 135 East 52d Street, New York. The official organ is *The Association Monthly*. The national organization is a member of the World's Association; its Student Committee is a member of the World's Student Christian Federation, and is connected with the Student Volunteer Movement. National headquarters, 600 Lexington Avenue, New York. *President of National Board*, Grace H. Dodge; *General Secretary*, Mabel Cratty.

American Tract Society.

The Society was founded in 1825. Its work is interdenominational and international in scope, and is commended by all the evangelical churches. It has published the Gospel message in 175 languages, dialects and characters. Its total issues of books, tracts and periodicals at the Home Office amount to 781,854,461 copies. It has made foreign cash appropriations to the value of \$784,795.39, by means of which millions of books and tracts have been published at mission stations abroad. Its colporteurs have made 17,616,521 family visits, largely among the immigrants, and have circulated 17,080,463 volumes. The grand total of its gratuitous distributions has been to the value of \$2,566,572.28. The society is wholly dependent upon donations and legacies for the support of its benevolent work. Offices, 150 Nassau Street, New York. *President*, William Phillips Hall; *General Secretary*, Judson Swift, D.D.

American Bible Society.

The American Bible Society was founded in 1816. It is a charitable institution whose sole object is to encourage a wider circulation of the Scriptures without note or comment. It invites the contributions and co-operation of all. The officers are a President and twenty-seven Vice-Presidents, headed by J. L. Chamberlain, Maine. There are thirty-six managers, divided into four classes as to terms of office. The Corresponding Secretaries are: Rev. John Fox, D. D., and Rev. W. I. Haven, D. D.; Recording Secretary, Rev. H. O. Dwight, LL. D. The Treasurer is William Foulke. The issues for the year ending March 31, 1912, were 3,691,201 volumes, and for the ninety-six years of the existence of the Society, 94,219,105 volumes. This includes Bibles in many foreign tongues and the languages of several American Indian tribes. (The British and Foreign Bible Society, established in 1804, had distributed to March 31, 1912, 236,515,500 volumes.) The offices of the Society are at the Bible House, Astor Place, New York.

United Christian Church.

National Woman's Christian Temperance Union.

THE National W. C. T. U. was organized in Cleveland, Ohio, in 1874, and is the sober second thought of the great woman's crusade. It is now regularly organized in every State of the Union.

There are about 12,000 local unions, with a membership and following, including the children's societies, of about half a million. The W. C. T. U. has forty distinct departments of work, presided over by as many women experts, in the National Society, and in nearly every State. All the States in the Republic have laws requiring the study of scientific temperance in the public schools, and all these laws were secured by the W. C. T. U.; also the laws forbidding the sale of tobacco to minors. The first police matrons and most industrial homes for girls were secured through the efforts of this society, as were the refuges for erring women.

The World's W. C. T. U. was founded through the influence of Frances F. Willard in 1883, and already has auxiliaries in more than fifty countries and provinces. The white ribbon is the badge of all the W. C. T. U. members, and is now a familiar emblem in every civilized country.

The headquarters of the National organization is The Willards Rest Cottage, Evanston, Ill. The following are the officers: *President*, Mrs. Lillian M. N. Stevens, Portland, Me.; *Vice-President-at-Large*, Miss Anna A. Gordon, Evanston, Ill.; *Corresponding Secretary*, Mrs. Frances P. Parks, Evanston, Ill.; *Treasurer*, Mrs. Elizabeth P. Hutchinson, Evanston, Ill.

The Silver Bay Association is incorporated under the New York Legislature, and holds the property on Lake George for the use of Summer Christian conferences. The property consists of 1,550 acres, including a large main building, seventeen cottages, auditorium and athletic field. Conferences were held June 14 to August 30, 1912, attended by 3,498 persons.

Church Temperance Society.

GENERAL OFFICERS.—*President*, Rt. Rev. Frederick Courtney, D.D., New York; *Treasurer*, Irving Grinnell; *General Secretary*, H. K. Graham. The Society was organized within the Protestant Episcopal Church in 1881. Its adult membership combines those who temperately use and those who totally abstain from intoxicating liquors as beverages. It works on the lines of moral as well as of legal suasion, and its practical objects are: 1. Training the young in habits of temperance. 2. Rescue of the drunkard. 3. Restriction of the saloon by legislation. 4. Counteractive agencies, such as iced water fountains, lunch wagons, coachmen's and firemen's coffee vans, coffee-houses, workmen's clubs, reading-rooms, and other attractive wholesome resorts. It has established the Squirrel Inn Free Reading Room, 131 Bowers, New York, and the Longshoremen's Rest, 164 Eleventh Ave., New York. The Order of Knights of Temperance deals with boys, seeking to induce them to keep sober, pure, and reverent from the earliest years of manhood, and it endeavors to perpetuate those habits in men. Headquarters, the Church Mission House, New York.

American Unitarian Association.

THIS Association was organized in Boston, Mass., May 25, 1825, and incorporated in 1847. Its objects, as defined in the report of the Committee on Organization, are as follows:

1. To collect and diffuse information respecting the state of Unitarian Christianity in our country.
2. To produce union, sympathy, and co-operation among liberal Christians.
3. To publish and distribute books and tracts, inculcating correct views of religion, in such form and at such price as shall afford all an opportunity of being acquainted with Christian truth.
4. To supply missionaries, especially in such parts of our country as are destitute of a stated ministry.
5. To adopt whatever other measures may hereafter seem expedient—such as contributions in behalf of clergymen with insufficient salaries, or in aid of building churches.

President—Rev. Samuel A. Eliot, D.D., Boston, Mass. *Secretary*—Rev. Lewis G. Wilson, Boston, Mass. *Treasurer*—Henry M. Williams, Boston, Mass.

Christian and Missionary Alliance.

OFFICERS.—*President and General Superintendent*, Rev. A. E. Simpson. *Secretary*, A. E. Funk; *Treasurer*, David Crear.

The Christian Alliance was founded in 1887. It combined with the International Missionary Alliance in 1897, and the present title was adopted. Membership consists of all professing Christians who shall subscribe to the principles of the order and enroll their names. The objects of the Alliance are stated to be "Wide diffusion of the Gospel in its fulness, the promotion of a deeper and higher Christian life, and the work of evangelization, especially among the neglected classes at home and in heathen countries." Its income in 1910 was over three hundred thousand dollars. Connected with the Alliance are the Missionary Training Institute, Institute for the Training of Home Workers, Berachah Home, and a High School at Nyack. Headquarters of the Alliance, 690 Eighth Ave., N. Y.

Christian Unity Foundation.

INCORPORATED July 18, 1910. Its purpose is to promote Christian Unity at home and throughout the world, by the method of Research and Conference. Bishop Courtney, rector of St. James's, New York, is President of the Foundation; Rev. Arthur Lowndes, Secretary; Francis E. Huntington, Treasurer. Rev. George W. Douglas is Chairman of the Executive Committee, and Rev. Rockland Tyng Homans is Chairman of the Committee on Research. Headquarters, 143 E. 37th Street, New York.

Universalist General Convention.

THE Universalist General Convention has jurisdiction over the ecclesiastical organizations of the Universalist Church in the United States and Canadian provinces. The Convention is composed of the officers of the General Convention, of the presidents, vice-presidents, and secretaries of State conventions, and of clerical and lay delegates from the State conventions. All laws relating to fellowship, ordination, and discipline originate in the General Convention, and it is the final court of appeal in all cases of dispute or difficulty between State conventions. It has funds to the amount of over \$390,000, the income of which, with the contributions of its constituency, is used for missionary and educational objects. The officers of the Convention are: *President*—Rev. M. D. Shutter, D.D., Minneapolis, Minn. *Secretary*—Rev. W. H. Skeels, Utica, N. Y. *Treasurer*—Eugene F. Endicott, Boston, Mass. The denomination has a membership of 64,825.

The Vedanta Society.

THE Vedanta Society of New York was established in 1894 by Swami Vivekananda of India and was regularly incorporated in 1898 by Swami Abhedananda, now at its head. The object of the Society is to explain through logic and reason the spiritual laws that govern our lives; to show that the True Religion of the Soul is not antagonistic to, but in harmony with, philosophy and science; to establish that Universal Religion which underlies all the various sects and creeds of special religions; to propagate the principles taught by great seers of Truth and religious leaders of different countries; and to help mankind in the practical application of those principles in their spiritual, moral, intellectual and physical needs.

The present headquarters of the Society with its Circulating Library, Reading Room and Meditation Room is at 135 West Eightieth Street, New York City.

The officers of the Society are: *President*—Professor Herschel C. Parker. *Vice-President*—Edward O. Torme. *Secretary*—Mrs. Christina G. Kelley.

The Society has a large publishing department and issues a catalogue containing nearly forty titles of works on the Philosophy and Religion of Vedanta. Within the last five years it has sent out from its headquarters 39,876 books and pamphlets written by Swamis of India. The Vedanta Society of New York has a Summer school called the "Vedanta Ashrama." It is situated in West Cornwall, Ct., on a farm of 370 acres. There are also centres in Pittsburgh, San Francisco, Los Angeles and Washington, D. C., besides a Peace Retreat in the mountains of Santa Clara County, Cal. These organizations in America are affiliated with hundreds of Vedanta Societies throughout India and Ceylon.

American Board of Commissioners for Foreign Missions.

THE head office of the American Board of Commissioners for Foreign Missions is at the Congregational House, 14 Beacon Street, Boston, Mass. There are three district offices: (1) at the United Charities Building, Twenty-second Street and Fourth Avenue, New York City, Rev. E. L. Smith, D. D., District Secretary; (2) 153 La Salle Street, Chicago, Ill., Rev. A. N. Hitchcock, Ph. D., District Secretary; (3) Mechanics' Savings Bank Building, San Francisco, Cal., Rev. H. M. Tenney, District Secretary. Its officers are: *President*—Samuel B. Capen, LL. D., Boston, Mass. *Corresponding Secretaries*—James L. Barton, D. D., Cornelius H. Patton, D. D. *Treasurer*—Frank H. Wiggin.

The American Board, which is the oldest foreign missionary society in the United States, was organized June 29, 1810. During the past one hundred years of its history it has sent out over 2,700 missionaries, of whom 612 are now in service. Into the 621 churches which have been organized by these missionaries there have been received from the first nearly 21,000 members. The total receipts from the beginning have been \$41,224,232; for year 1912, \$1,062,442.

The mission fields now occupied by the Board are: Mexico; Micronesian Islands; Mindanao, Philippine Islands; Japan; North China; Shansi, in Northwestern China; Foochow and Canton, in Southern China; Ceylon; Madura, in Southern India; the Marathi field of Western India; East Central Africa; Southern Africa; West Central Africa; European and Asiatic Turkey; Austria, and Spain.

Southern Baptist Convention.

President—Edwin Chas. Dargan, D. D., Macon, Ga. *Secretary*—Lansing Burrows, D. D., Americus, Ga. *Treasurer*—Mr. Geo. W. Norton, Louisville, Ky.

Article II. of their constitution reads: "It shall be the design of the Convention to promote foreign and domestic missions and other important objects connected with the Redeemer's kingdom, and to combine for this purpose such portions of the Baptist denomination in the United States as may desire a general organization for Christian benevolence, which shall fully respect the independence and equal rights of the churches."

Baptist Young People's Union of America.

THE Union is a federation of all young people's societies connected with Baptist churches in the States and Canada. The following are the International officers: *President*—W. J. Williamson, D. D., St. Louis, Mo. *Vice-Presidents*—H. A. Porter, D. D., Louisville, Ky.; C. D. Case, D. D., Buffalo, N. Y.; Rev. H. H. Bingham, London, Ont. *General Secretary*—Rev. Wm. E. It holds annual meetings.

International Order of The King's Daughters and Sons.

HEADQUARTERS, 156 5th Ave., New York City. Officers: *President*—Miss Kate Bond. *General Secretary and Treasurer*—Mrs. Mary Lowe Dickinson.

The Order is an interdenominational, religious and philanthropic society, working locally in Circles, County and City Unions, Chapters, National, State and Provincial organizations. Branches are established in thirty-two States and in eight Canadian provinces.

The objects of the Order are "the development of spiritual life and the stimulation of Christian activities." It has a paid membership in all countries of 52,000. The Order has established and is supporting several hundred institutions of different kinds in different localities. Its members are engaged in every form of helpful work, religious, educational and philanthropic. The badge is a small silver cross, which is also the corporate seal of the society. A monthly magazine, *The Silver Cross*, is the official organ of the Order.

The Daughters of the King.

THE Order of the Daughters of the King was organized on Easter evening, 1885. It is desired by its promoters that a careful distinction shall be made between the Daughters of the King and the King's Daughters. This is the older organization, and differs from the King's Daughters in many important particulars. In the first place, it is an order, and is distinctively Episcopal. Its work is definite, and is "for the spread of Christ's kingdom among women," and the "active support of the rector's plans in the parish in which the particular chapter may be located." Its emblem is a cross of silver, a Greek cross fleury, and its motto is "Magnanimiter Crucem Sustine" and its watchword "For His Sake." Its colors are white and blue—white, the old royal color of Israel, and blue, the color of the Virgin Mary, the "blessed daughter of Israel's King, the Mother of the King of Kings." Its constitution is framed, as far as is possible, in the terms of that of the Brotherhood of St. Andrew, the work of the two organizations being similar. The officers of the Council are: *President*—Mrs. A. Adam Denmead, Baltimore, Md. *General Secretary*—Emma E. Behlendorff. Office of the Council, Church Missions House, 281 Fourth Avenue, New York.

Christian Science.

THE Christian Science Publication Committee, contributes the following statement:

There are many teachers of Christian Science, and upward of 5,000 practitioners of Christian Science mind-healing. Organizations can now be found in almost every city in the United States, and there are branches in Canada, Nova Scotia, British Columbia, Mexico, the British West Indies, the Hawaiian Islands, Cuba, Philippine Islands, Holland, Sweden, British Isles, France, Germany, Norway, Switzerland, Italy, Australia, New South Wales, India, China, South Africa, Argentina, Chile, Russia, Panama and many other countries.

In all of the churches the Sunday services are uniform, and consist of correlative passages read from the Bible and the Christian Science text-book, "Science and Health, with Key to the Scriptures," by Mary Baker Eddy. On Wednesday evening a meeting is held in every church of this denomination.

Mrs. Eddy said in her book, "Retrospection and Introspection": "I claim for healing scientifically the following advantages: 1. It does away with all material medicines and recognizes the antidote for all sickness, as well as sin, in the immortal mind; and mortal mind as the source of all the ills which befall mortals. 2. It is more effectual than drugs, and cures when they fail, or only relieve, thus proving the superiority of metaphysics over physics. 3. A person healed by Christian Science is not only healed of his disease, but he is advanced morally and spiritually. The mortal body being but the objective state of the mortal mind, this mind must be renovated to improve the body." The absence of creed and dogma in the Christian Science Church, its freedom from materialism, mysticism and superstition, also the simplicity, uniformity and impersonality of its form of worship and organization, are among the distinguishing features which characterize this modern religious movement. Hypnotism, mesmerism, spiritualism, theosophy, faith cure and kindred systems are foreign to true Christian Science. Those practising these beliefs are denied admission to the Christian Science Church.

The Theosophical Society.

THE Theosophical Society was founded in New York City on November 17, 1875, by Mme. H. P. Blavatsky and Col. Henry S. Olcott, but its headquarters was removed in 1879 to Adyar, Madras, India, where the President, Mrs. Annie Besant, resides. Its objects are three: (a) To form a nucleus of the Universal Brotherhood of Humanity, without distinction of race, creed, sex, caste or color; (b) to encourage the study of comparative religion, philosophy and science; (c) to investigate unexplained laws of nature and the powers latent in man. It has now twenty territorial sections, each presided over by a general secretary, three by Presidential agents: America, England, Wales, India, Scandinavia, Holland, Hungary, France, Italy, Germany, Australia, Cuba, Finland, Russia, Bohemia, South Africa, Scotland, Switzerland, Belgium, Dutch East Indies, South America, Spain, Ireland and New Zealand. During the 35 years of its existence it has admitted about 30,000 members and chartered over 750 branches. The membership at present of the American section is about 3,700; there are 125 branches. Reincarnation and Karma are the basic stones of the Theosophical system. A. P. Warrington, General Secretary, Krotoua, Hollywood, Los Angeles, Cal., contributes the above statement.

United Brethren Christian Endeavor Union.

THE Union was organized June 5, 1890. It is a union of all forms of young people's societies within the Church, of the United Brethren in Christ. There are now 2,136 societies, with 85,513 members. Each conference is called a Branch and holds its annual conventions, when a review of the year's work is made and new plans are laid. *The Watchword* is the organ of the Union. Its circulation is nearly 39,000. H. F. Shupe, D. D., Dayton, Ohio, is editor. The principal officers are: President, Rev. J. G. Huber, D. D., Dayton, Ohio; General Secretary, Col. R. Cowden, Dayton, Ohio.

The Universal Brotherhood and Theosophical Society.

THE Universal Brotherhood and Theosophical Society, founded by Mme. H. P. Blavatsky in New York, 1875, continued after her death under the leadership of the co-founder, William Q. Judge, and now, under the leadership of their successor, Katherine Tingley, has its international headquarters at the world's Theosophical centre, Point Loma, Cal.

This organization declares that brotherhood is a fact in nature. The principal purpose of the organization is to teach brotherhood, demonstrate that it is a fact in nature, and make it a living power in the life of humanity, establishing Raja Yoga schools throughout the world, and creating a new literature. Its subsidiary purpose is to study ancient and modern religion, science, philosophy and art, to investigate the laws of nature and the latent divine powers in man. It declares in its constitution that every member has a right to believe or disbelieve in any religious system or philosophy, each being required to show that tolerance for the opinions of others which he expects for his own.

The official publication of the organization is "The Theosophical Path."

Secretary, Mr. J. H. Fussell, Point Loma, Cal.

The Brotherhood of Andrew and Philip.

THIS organization, founded by Rev. Rufus W. Miller in Reading, Pa., in 1888, held its first federal convention in the city of New York in 1893. It is composed of members of twenty-six evangelical denominations, among them—the Reformed Church in America, the Reformed Church in the United States, the Congregational, Presbyterian (North, South, Canadian, and United), Methodist Episcopal, Methodist Protestant, Baptist, United Brethren, Lutheran, Reformed Episcopal, Church of Christ, Progressive Brethren, Friends, United Evangelical, Free Baptist, Federal, African Methodist Episcopal, and Evangelical Association. It has chapters in Australia and Japan, China and England. Its objects are embodied in the statement that "Any man can belong to the Brotherhood who will promise to pray daily for the spread of the kingdom of Christ among men, and to make an earnest effort each week to bring at least one man within the hearing of the Gospel." The number of chapters of the Brotherhood in the United States is 1,000, and the membership 44,780; 102 boys' chapters enrolling 1,972 members. The office of Rev. R. Howard Taylor, General Secretary, is at 1328 Chestnut Street, Philadelphia, Pa.

The Brotherhood of St. Andrew.

"THE Brotherhood of St. Andrew is an organization of men in the Protestant Episcopal Church. Its sole object is the spread of Christ's kingdom among men. It works under two rules, known as (1) The Rule of Prayer: To pray daily for the spread of Christ's kingdom among men, especially young men, and for God's blessing upon the labors of the Brotherhood, and (2) The Rule of Service: To make at least one earnest effort each week to lead some man nearer to Christ through His church." There are now 1,500 active chapters with a membership of about fifteen thousand men.

The Brotherhood of St. Andrew in the Church of England in the Dominion of Canada has been formed, with five hundred chapters and forty-five hundred men. A similar organization has been formed in the Scottish Episcopal Church. In the West Indies there is a membership of 1,000 men, and there is also a national organization in Japan. June 12, 1896, the Brotherhood of St. Andrew in the Church of England was formed, and now has a membership of 1,200.

The Brotherhood in the United States includes a Junior Department. It has 500 chapters in the United States, with about 6,000 members.

The Volunteers of America.

THIS statement of the inauguration, purposes, and advance of The Volunteers of America has been prepared by Its President, General Ballington Booth, for THE WORLD ALMANAC.

The Volunteers of America is a philanthropic, social and Christian movement. It was inaugurated in March, 1896, in response to a number of requests on the part of American citizens. It was subsequently incorporated on November 6, 1896, under the Membership act of the State of New York. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government. Its constitution and by-laws are framed by a Grand Field Council, which represents the minor councils of officers throughout the country annually. Though only fifteen years old, the Volunteers have representatives and branches of their benevolent cause in almost all the principal centres of the United States.

The Volunteers have some 36 principal homes and institutions of benevolence, many of which are Volunteer property, and are open for poor and deserving people in different sections of the country. During the past year no less than 42,929 beds have been provided for all classes of women in the Volunteers' Women's Homes, and 3,778 have been received under the care of, and permanently aided. The commissioned workers in their visitation called upon and aided, in one form or another, no less than 25,549 families. This was primarily in the poorer sections of the large cities. In the different permanent philanthropic homes and institutions no less than 443,775 lodgings have been given, while 496,375 free meals were given, and 287,935 meals were distributed to persons who paid for them, many doing so by work.

In their latest undertaking, which has proved a large responsibility, that is, the Volunteer hospital work, which hospital is located at 93 Gold Street, New York City, in the shadow of the Brooklyn Bridge, there have been 1,418 ambulance calls, 430 major operations, 6,623 days' treatment given to patients in the surgical and medical wards, 12,014 new cases treated, 15,914 old cases treated, and a total during the year of not less than 28,358 cases of all kinds, surgically and medically treated in the institution. In addition, physicians connected with the hospital made visits to 131 homes.

The Volunteer Prisoners' League has embraced upward of some 75,000 members since its inauguration. It has leagues in nearly 30 State prisons, and over seventy per cent. of those having left the prisons, are, through our Hope Halls, living reformed and honest lives. Through the Fresh Air Branch of the work many thousands of mothers and children have been taken from crowded cities for a change in the open air amid hills and lakes, rivers and dales. From the regimental reports of Volunteer centres, it is carefully calculated that 842,330 persons were gathered to our indoor services, while 2,100,472 persons were listeners in God's natural cathedral, our open-air stands. By these services 5,743 were led to promise that they would lead a new life.

In addition to the Volunteer reading rooms, thousands of copies of Christian literature are circulated in the State prisons, jails, hospitals, soldiers' homes, and children's homes. In connection with the Volunteers there are also sewing classes, hospital nursing, temporary financial relief departments, fresh air camps, Thanksgiving and Christmas dinners, and many other worthy undertakings. The headquarters of The Volunteers of America is at 34 West Twenty-eighth Street, New York City. The principal officers are General and Mrs. Ballington Booth, Presidents; General Edward Fielding, Vice-President; Colonel Walter J. Crafts, Treasurer, and Colonel James W. Merrill, National Secretary.

The American Civic Association was formed by merger of the American League for Civic Improvement and the American Park and Outdoor Art Association, June 10, 1904. The Association seeks to combine and make efficient the country-wide effort for civic betterment. It has led in the effort to prevent the destruction of Niagara Falls for power purposes; it advocates a Federal Bureau of National Parks; it is inaugurating a campaign for the restraint and reduction of objectionable outdoor advertising as a defacement of nature, and it urges community beauty. It fosters parks, playgrounds, and outdoor recreation; it arouses communities, and leads them toward betterment; it conducts a city planning department, and directs a national crusade against the "typhoid" fly. A lantern-slide series is maintained, and many bulletins are issued.

Society of the Cincinnati.

GENERAL OFFICERS.

President-General.....Hon. Winslow Warren, Mass.
Vice-President-General.....Hon. James Simons, LL. D., S. C.
Secretary-General.....Hon. Asa Bird Gardiner, LL. D., L. H. D., R. I.
Assistant Secretary-General.....Mr. John Collins Daves, N. C.
Treasurer-General.....Mr. Charles Isham, Ct.
Assistant Treasurer-General.....Mr. Henry Randall Webb, Md.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the Continental army on the Hudson at the close of hostilities in the War of the Revolution for American Independence, May 10, 1783.

In forming the society it was declared that, "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute, and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen State societies were formed, and one in France, under the direct patronage of Louis XVI., which was dispersed at the Reign of Terror in 1793. Upon the roll of original members appeared the names of all the great historic military and naval characters of the Revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the Declaration of Independence.

THE RIGHT TO MEMBERSHIP.

All Continental officers who had served with honor and resigned after three years' service as officers, or who had been rendered supernumerary and honorably discharged, in one of the several reductions of the American army, or who had continued to the end of the war, and all French officers who had served in the co-operating army under Count d'Estaing, or auxiliary army under Count de Rochambeau, and held or attained the rank of colonel for such services, or who had commanded a French fleet or ship of war on the American coast, were entitled to become original members, and upon doing so were required to contribute a month's pay.

STATE SOCIETIES.

The Cincinnati is organically one society in membership, but for convenience in admission of members and in its charitable and patriotic objects is subdivided into State societies, there being thirteen. Four dormant societies were restored to membership at the triennial meeting of 1902.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society when legislating for the good of the Order is composed of the general officers and five delegates from each State society, and meets triennially. In 1854 it ruled that proper descendants of Revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

Sons of the Revolution.

General President—Edmund Wetmore, N. Y.

General Vice-President—J. M. Montgomery, N. Y.

Second General Vice-Pres.—Hon. J. W. Weeks, Mass.

General Secretary—Prof. Wm. Libbey, N. J.

General Treasurer—Richard M. Cadwalader, Pa.

General Registrar—Hon. George E. Pomeroy, Ohio.

General Historian—Marshall D. Haywood, N. C.

The society of the "Sons of the Revolution" was originated in New York in 1875 by John Austin Stevens, in conjunction with other patriotic gentlemen of Revolutionary ancestry. The New York Society was instituted February 22, 1876; reorganized December 3, 1883, and incorporated May 3, 1884, to "perpetuate the memory of the men who, in military, naval or civil service, by their acts or counsel, achieved American Independence; to promote and assist in the proper celebration of the Anniversaries of Washington's Birthday, the Battles of Lexington and Bunker Hill, the Fourth of July, the Capitulations of Saratoga and Yorktown, the Evacuation of New York by the British Army, and other prominent events relating to or connected with the war of the Revolution; to collect and secure for preservation the manuscript rolls, records and other documents and memorials relating to that war; to inspire among the members and their descendants the patriotic spirit of their forefathers; to inculcate in the community in general sentiments of nationality and respect for the principles for which the patriots of the Revolution contended; to assist in the commemorative celebration of other great historical events of national importance, and to promote social intercourse and the feeling of fellowship among its members."

Eligibility to membership is confined to male descendants, above the age of twenty-one years, from an ancestor who as either a military, naval, or marine officer, soldier, sailor, or marine, or official in the service of any one of the thirteen original Colonies or States, or of the national Government, representing or composed of those Colonies or States, assisted in establishing American independence during the war of the Revolution between the 19th day of April, 1775, when hostilities commenced, and the 19th day of April, 1783, when they were ordered to cease. The next triennial meeting of the general society will be held in the city of Washington, April 19, 1914.

The officers of the New York Society Sons of the Revolution are as follows: *President*—Edmund Wetmore. *Vice-Presidents*—Robert Olyphant, Walter L. This society, originally composed of officers of the United States Army who served in the war with Mexico, was formed in the city of Mexico in 1847, and has been continued "with a view to cherish the memories and keep alive the traditions that cluster about the names of those officers who took part in the Mexican War." Membership is confined to officers of the army, navy and marine corps who served in the war, or their male blood relatives. Each primary member may nominate as his successor his son or a male blood relative, who during the life of the primary member is known as associate-member, and on the death of the former is entitled, as his representative, to full membership. There are 222 members.

Societies of the War of 1812.

THE VETERAN CORPS OF ARTILLERY OF THE STATE OF NEW YORK, CONSTITUTING THE MILITARY SOCIETY OF THE WAR OF 1812.

THE Veteran Corps of Artillery of the State of New York was instituted in New York City, November 25, 1790, exclusively by officers and soldiers of the war of the Revolution, and was duly confirmed as a separate corps in the active militia of the State by Governor George Clinton, March 3, 1791. Congress, in its militia laws of 1792, 1874, 1903 and May 27, 1908, enacted that it should retain "accustomed privileges" as a component part of the active militia, supplemental to the National Guard and the status of the corps, as part of the active militia, has also been embodied in several State statutes.

When composed wholly of Revolutionary veterans, it was in the military service of the United States, June 25 to July 2, 1812, and September 2, 1814, to March 2, 1815, and afterward recruited exclusively from veterans, War of 1812, until 1890, when the surviving veteran original members amended their regulations to admit male descendants of original members or male descendants of those who served honorably in the War of 1812, which limitation was fixed by law March 9, 1895.

On January 8, 1826, the Society of the War of 1812 was formed at New York City exclusively by officers of the Regular Army, Navy and Volunteer services of that war, and consolidated January 8, 1848, with the Veteran Corps of Artillery, and was constituted by law the Civic Association of the Corps. Its last Revolutionary member, Daniel Spencer, died March 4, 1854, aged 94; its last War of 1812 member, Hiram Cronk, died May 13, 1905, aged 105.

The officers are: *Commandant*—Asa Bird Gardiner, LL. D., L. H. D. *Vice-Commandant*—John Hone. *Adjutant*—Charles Eliot Warren, 32 East 42d Street, New York City. *Quartermaster*—Walter Lispenard Suydam. *Paymaster*—James Mortimer Montgomery. *Commissary*—Clarence H. Eagle. *Chaplain*—F. Landon Humphreys, S. T. D. *Ordnance Officer*—Paul G. Thebaud.

The officers are commissioned, and the Corps, with the National Guard, form the active militia of the State.

Headquarters, Philadelphia, Pa. *President*—P. V. D. Conway, Fredericksburg, Va. *Secretary*—Miss Mary Vivian Conway, Fredericksburg, Va. *Treasurer*—John S. Braxton, Philadelphia, Pa.

Military Order of Foreign Wars.

THE Military Order of Foreign Wars of the United States was instituted in the city of New York December 27, 1894, by veterans and descendants of veterans of one or more of the five foreign wars which the United States had been engaged in, to wit: The war of the Revolution, the war with Tripoli, the war of 1812, the Mexican war, "to perpetuate the names and memory of brave and loyal men who took part in establishing and maintaining the principles of the Government" in said wars, and "to preserve records and documents relating to said wars, and to celebrate the anniversaries of historic events connected therewith." Since the institution of the order the United States has fought two foreign wars (war with Spain and China campaign). By an amendment to the constitution all American officers who participated in the war with Spain, or any future foreign campaign recognized by the United States Government as "war," are rendered eligible to membership as veteran companions.

State commanderies now exist in New York, Pennsylvania, Connecticut, Illinois, California, Massachusetts, Maryland, Ohio, Missouri, Vermont, Virginia, Rhode Island, Louisiana, Indiana, Wisconsin, Michigan, Texas, Georgia, Colorado, New Jersey, and the District of Columbia.

The National Commandery was instituted March 11, 1896, by the officers of the New York, Pennsylvania, and Connecticut commanderies. The following are the officers of the National Commandery: *Commander-General*—Major-Gen. Chas. F. Roe, N. G. N. Y. *Secretary-General*—Major David Banks, 23 Park Place, N. George Washington Memorial Association.

President—Mrs. Henry F. Dimock, New York. *Treasurer*—Mrs. Frank Northrop, New York. *General Secretary*—George Milbank Hersey, 200 Ford Building, Boston, Mass.

To furnish our National capital with a building which will provide facilities for the holding of congresses and conventions—both National and international. The building will also provide office accommodations for the many societies of National scope devoted to the advancement of mankind which require National headquarters, such as the patriotic, scientific, educational, art, literary, sociological and civic virtue organizations. The structure which is to embody this idea is to be known as the George Washington Memorial. In a broader sense it will fulfil Washington's wish expressed in his Farewell Address, to "promote as an object of primary importance institutions for the general diffusion of knowledge."

Naval Order of the United States.

THE Naval Order of the United States is composed of a General Commandery and Commanderies in the States of Massachusetts, Pennsylvania, New York, California and Illinois, and in the District of Columbia. The General Commandery meets triennially on October 5, and the State Commanderies meet annually in the month of November. The Massachusetts Commandery is the parent Commandery, and was organized at Boston on July 4, 1890. The General Commandery was established three years later, on June 19, 1893. The Companions of the Order are officers and the descendants of officers who served in the navy and marine corps in any war or in any battle in which the said naval forces of the United States have participated. The membership clause, as adopted at the triennial congress held at Boston, October 5, 1895, provides for two classes of members—first, veteran officers and their male descendants; and, second, enlisted men who have received the United States naval medal of honor for bravery in the face of the enemy.

The United Daughters of the Confederacy was organized at Nashville, Tenn., September 10, 1894. It is composed of the widows, wives, mothers, sisters, and lineal female descendants of men who served honorably in the army and navy of the Confederate States, or who served in the civil service of the Confederate States or one of the Southern States, or who gave personal services to the Confederate cause. The objects of the United Daughters of the Confederacy, as stated in the constitution of the society, are "social, literary, historical, monumental, benevolent, and honorable in every degree, without any political signification whatever." (2) To cultivate ties of friendship among our women whose fathers, brothers, sons, and, in numberless cases, mothers, shared common dangers, sufferings, and privations; and to perpetuate honor, integrity, valor, and other noble attributes of true Southern character. (3) To instruct and instill into the descendants of the people of the South a proper respect for and pride in the glorious war history, with a veneration and love for the deeds of their forefathers which have created such a monument of military renown, and to perpetuate a truthful record of the noble and chivalric achievements of their ancestors. The organization now has 1,380 chapters in the United States, North and South, and in City, 1 Chapter in the City of Mexico. The organization has 80,000 members.

Arlington Confederate Monument Association.

During the administration of President McKinley the Confederate dead buried in the city of Washington, D. C., and vicinity were removed to the National Cemetery at Arlington, Va., the old home of Robert E. Lee, where they were reinterred in a plot of ground set apart by the President for that purpose, and designated "The Confederate Section."

The Arlington Confederate Monument Association was formed for the purpose of erecting in this section a suitable monument to the dead there buried, and to stand, in a larger sense, as a memorial to all those who lost their lives in defense of the Confederacy, as well as to the cause they represented.

The Association is formed as a committee of the United Daughters of the Confederacy, the President-General of which is the President of the association.

The officers of the association are: Recording Secretary, Mrs. Drury C. Ludlow, Washington, D. C.; Corresponding Secretary, Mrs. Lillian Pike Roome, No. 1419 Clifton Street, Washington, D. C.; Treasurer, Wallace Streeter.

The American Flag Association.

President—Col. Ralph E. Prime, Yonkers, N. Y. *Secretary*—Theodore Fitch, 456 North Broadway, Yonkers, New York. *Treasurer*—Major Henry L. Swords, U. S. Custom House, New York. The American Flag Association was organized February 17, 1898, its motto being "One Flag, One Country, God Over All." Its object is to secure National and State legislation for the protection of the flag from degrading and desecrating uses, and to secure a general observance of June 14 as "Flag Day," because on that day in 1777 Congress adopted the United States flag. The Association is composed of individual members and also the members of the Flag Committees of patriotic societies for the purpose of fostering public sentiment in favor of honoring the flag of our country and preserving it from desecration. It aims to co-ordinate the efforts of all flag committees.

Society of Tammany, or Columbian Order.

Grand Sachem—John R. Voorhis, *Sachems*—Louis F. Haffen, George W. Loft, Thomas F. McAvoy, Thomas E. Rnsh, John J. Scannell, Charles F. Murphy, Julius Harburger, John F. Ahearn, Asa Bird Gardiner, George W. Plunkitt, Timothy D. Sullivan, John Fox, William Dalton, *Secretary*—Thomas F. Smith, *Treasurer*—William Söhmer, *Sagamore*—Bryan P. Henry, *Wiskinkie*—John A. Boyle.

This organization was formed in 1789, being the effect of a popular movement in New York having primarily in view a counterweight to the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-Federalist or democratic in its character, and its chief founder was William Mooney, an upholsterer and a native-born American of Irish extraction. It took its first title from a noted ancient, wise and friendly chief of the Delaware tribe of Indians, named Tammany, who had, for the want of a better subject, been canonized by the soldiers of the Revolution as the American patron saint. The first meeting was held May 12, 1789. The act of incorporation was passed in 1805. The Grand Sachem and thirteen Sachems were designed to typify the President and the Governors of the thirteen original States. William Mooney was the first Grand Sachem. The Society is nominally a charitable and social organization, and is distinct from the General Committee of the Tammany Democracy, which is a political organization, and cannot use Tammany Hall without the consent of the Society.

Daughters of Holland Dames.

DESCENDANTS of the ancient and honorable families of New Netherland.

The objects of the Society are to perpetuate the memory and to promote the principles and virtues of the Dutch ancestors of its members, to collect documents, genealogical and historical, relating to the Dutch in America, and to erect commemorative and durable memorials to be lasting tributes to the early Dutch settlers.

Directress-General—Mrs. D. Phoenix Ingraham, *Recording Secretary*—Miss Alice Hart Neafie, Goshen, N. Y., *Corresponding Secretary*—Mrs. Russell W. Moore, 121 Madison Avenue, New York City, *Treasurer*—Mrs. Wm. H. Leferts, 308 Lexington Avenue.

The Huguenot Society of America.

THIS Society was organized April 13, 1883, and has its office in New York at 29 West Thirty-ninth Street. Descent from Huguenot ancestors is the qualification necessary for membership.

The American Cross of Honor.

President—Thomas H. Herndon, 1215 Harvard Street, N. W., Washington, D. C. *Vice-President*—John J. Delaney, *Secretary*—Harry A. George, *Treasurer*—Richard Stockton.

The order was organized in 1898 and incorporated by act of Congress in 1906. The membership of The American Cross of Honor is composed of persons upon whom the United States Government has conferred the life-saving medal of honor, and its object is to encourage the saving of life throughout the world, both through individual effort and by advocating the principles of universal peace.

The honorary members are: the President of the United States, the Emperor of Germany, the King of Great Britain and Ireland, the King of Italy, the President of France, ex-President Roosevelt and Andrew Carnegie. The Cross of Honor of the order is awarded annually to some person who has greatly distinguished himself in saving life, and who also has received the Government life-saving medal of honor. The associate members are persons interested in saving life and wish to aid by the payment of a small sum as annual dues.

Society of Colonial Wars.

Governor-General—Howland Pell, New York, *Secretary-General*—Clarence Storm, Room 62, 45 William Street, N. Y., *Treasurer-General*—Wm. Macpherson Hornor, Philadelphia, Pa., *Registrar-General*—Geo. N. Mackenzie, *Historian-General*—T. J. Oakley, Rhineland, N. Y., *Chaplain-General*—Rev. Chas. L. Hutchins, Concord, Mass., *Surgeon-General*—Dr. Henry A. Griffin, New York.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defence, and preservation of the American Colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or as a military, naval, or marine officer in the service of the Colonies, or under the banner of Great Britain.

The Order of the Founders and Patriots of America.

Governor-General—Rev. Chas. Wadsworth, *Secretary-General*—John Elderkin, Lotos Club, New York City, *Treasurer-General*—Arthur Marvin, *Attorney-General*—John C. Hinckley, *Genealogist-General*—Chas. Henry Smith, *Historian-General*—Julius M. Foote.

The Order was founded in 1896, its object being "to bring together and associate congenial men whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country, and whose line of descent from them comes through patriots who sustained the Colonies in the struggle for independence in the Revolutionary war; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic." Eligibility—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended, in the male line of either parent, from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies. There are State Societies in New York, Connecticut, New Jersey, and Pennsylvania. The Governor of the New York Society is Theodore Gilman, 55 William Street, New York City. *Secretary*, Wm. H. A. Holmes.

Catholic Summer School of America.

A ROMAN Catholic Chautauqua or Summer School was opened at New London, Ct., in the Summer of 1892 under the auspices of distinguished clergymen and laymen, and the first meetings were held from July 30 to August 14. The association has since acquired a site at Cliff Haven, near Plattsburg, N. Y., on Lake Champlain, upon which the necessary buildings have been erected, and here the Summer School is held annually from July to September. The work of the institution is continued throughout the year by means of reading circles and study clubs on the University Extension plan. President, Rev. David J. Hickey, L. L. D., 7 East Forty-second Street, New York.

Carnegie Foundation for the Advancement of Teaching.

AN institution founded by Andrew Carnegie in 1905, and incorporated by the Congress of the United States in 1906. The institution is endowed with \$14,000,000, and its primary purpose is to provide retiring allowances for teachers and officers of colleges, universities and technical schools in the United States, Canada and Newfoundland and, in general, of advancing the profession of the teacher and the cause of higher education. By the sixth annual meeting of the trustees in 1911, 300 allowances were being paid to teachers, and 73 pensions to widows of teachers, at an annual cost of \$553,665. The amount of the average retiring allowance is \$1,628.41, the average age of retirement being about 70 years.

In the administration of its endowment, the Foundation has restricted its allowances to professors and officers in a list of 72 institutions selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. The president of the foundation is Dr. Henry S. Pritchett; secretary, Clyde Furst; address, 576 Fifth Avenue, New York City.

The Carnegie Institution of Washington.

THE Carnegie Institution of Washington was founded by Mr. Andrew Carnegie, January 28, 1902, when he gave to a board of trustees \$10,000,000, in registered bonds, yielding 5 per cent. annual interest. In general terms, he stated that his purpose was to "found in the city of Washington an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall in the broadest and most liberal manner encourage investigation, research and discovery, show the application of knowledge to the improvement of mankind, and provide such buildings, laboratories, books, and apparatus as may be needed." Mr. Carnegie added \$2,000,000 to his gift in 1907, and \$10,000,000 in 1911, making a total endowment of \$22,000,000.

By an act of Congress, approved April 28, 1904, the institution was placed under the control of a board of twenty-four Trustees, all of whom had been members of the original board referred to above.

The Trustees meet annually, and during the intervals between such meetings the affairs of the Institution are conducted by an Executive Committee, chosen by and from the Board of Trustees, acting through the President of the Institution as chief executive officer.

The Administration Building is situated on the S. E. corner of 16th and P Streets N. W., Washington, D. C.

Trustees of the Institution—Chairman, John S. Billings; *Vice-Chairman*, Elihu Root; *Secretary*, Cleveland H. Dodge; Robert S. Brookings, John L. Cadwalader, Simon Flexner, William N. Frew, Lyman J. Gage, Henry L. Higginson, Charles L. Hutchinson, Seth Low, S. Weir Mitchell, Andrew J. Montague, William W. Morrow, Wm. Barclay Parsons, Henry S. Pritchett, Martin A. Ryerson, William H. Tatt, Charles D. Walcott, Henry P. Walcott, William H. Welch, Andrew D. White, George W. Wickersham, Robert S. Woodward.

President of the Institution—Robert S. Woodward.

The Carnegie Corporation of New York.

THE Carnegie Corporation of New York, incorporated by an act passed by the New York Legislature June 9, 1911, was organized November 10, 1911.

The purposes of the corporation, as stated in the charter, are as follows:

"Section 1. Andrew Carnegie, Elihu Root, Henry S. Pritchett, William N. Frew, Robert S. Woodward, Charles L. Taylor, Robert A. Franks, James Bertram, and their successors are hereby constituted a body corporate by the name of Carnegie Corporation of New York, for the purpose of receiving and maintaining a fund or funds and applying the income thereof to promote the advancement and diffusion of knowledge and understanding among the people of the United States, by aiding technical schools, institutions of higher learning, libraries, scientific research, hero funds, useful publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

The incorporators met at Mr. Carnegie's house, Friday afternoon, November 10, 1911, accepted the charter, adopted the constitution and by-laws, and elected the following officers:

President—Andrew Carnegie. *Vice-President*—Elihu Root. *Treasurer*—Robert A. Franks. *Secretary*—James Bertram, 2 East 91st Street, New York City.

Mr. Carnegie transferred to the corporation, for its corporate purposes, \$25,000,000 par value first mortgage gold bonds of the United States Steel Corporation.

It is intended that the business of founding and aiding libraries and educational institutions which has been carried on by Mr. Carnegie as an individual for many years, will be turned over to the corporation at an early date and carried on by the corporation.

The Carnegie Hero Fund.

IN April, 1904, Andrew Carnegie created a fund of \$5,000,000 for the benefit of the dependents of those losing their lives in heroic effort to save their fellow men, or for the heroes themselves if injured only. Provision was also made for medals to be given in commemoration of heroic acts.

The endowment known as "The Hero Fund" was placed in the hands of a commission composed of twenty-one persons, residents of Pittsburgh, Pa., of which Charles L. Taylor is President, and F. M. Wilmot, Secretary and Manager of the fund.

In his letter to the Hero Fund Commission Mr. Carnegie outlined the general scheme of the fund thus: "To place those following peaceful vocations who have been injured in heroic effort to save human life, in somewhat better positions pecuniarily than before, until able to work again. In case of death, the widow and children or other dependents are to be provided for until she remarries, and the children until they reach a self-supporting age. For exceptional children, exceptional grants may be made for exceptional education. Grants of sums of money may also be made to heroes or heroines as the commission thinks advisable—each case to be judged on its merits."

The fund applies only to acts performed within the United States of America, the Dominion of Canada, the Colony of Newfoundland, and the waters thereof, and such acts must have been performed on or after April 15, 1904 and brought to the attention of the Commission within three years of the date of the act.

Applications should be made by letter addressed to the manager, Oliver Building, Pittsburgh, Pa. The Commission has awarded 698 medals—422 bronze, 261 silver and 15 gold. In addition to the medals, \$645,206 has been awarded for disablement benefits, and for educational and other special purposes, and for the dependents of heroes who lost their lives, including payments made to December 31, 1912, on monthly allowances. Pensions in force as of this date amount to \$54,780 annually. The Commission has also awarded \$174,462 for relief of sufferers from disasters—at Brockton, Mass., \$10,000; from the California earthquake, \$54,462; at Monongah Mines,

Monongah, W. Va., \$35,000; at Darr Mine, Jacobs Creek, Pa., \$25,000; at Lick Branch Mine, Switchback, W. Va., \$10,000, and at Muiga Mine and Palos Mine, Muiga and Palos, Ala., \$15,000; at McCurtain Mine, McCurtain, Okla., \$15,000; and at Jed Mine, Jed, W. Va., \$10,000.

The Alfred B. Nobel Prizes.

THE Swedish scientist, Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at \$9,000,000, to the founding of a fund, the interest of which should yearly be distributed to those who had mostly contributed to "the good of humanity." The interest is divided in five equal shares, given away. "One to the person who in the domain of physics has made the most important discovery or invention, one to the person who has made the most important chemical discovery or invention, one to the person who has made the most important discovery in the domain of medicine or physiology, one to the person who in literature has provided the most excellent work of an idealistic tendency, and one to the person who has worked most or best for the fraternization of nations, and the abolition or reduction of standing armies, and the calling in and propagating of peace congresses."

The prizes for physics and chemistry are awarded by the Swedish Academy of Science, that for physiological or medical work by the Caroline Institute (the faculty of medicine in Stockholm), that for literature by the Swedish Academy in Stockholm, and the peace prize is awarded by a committee of five persons, elected by the Norwegian Storting.

In accordance with these statutes the awarders of the prizes (the four above named institutions) elect fifteen deputies for two consecutive years, the Academy of Science electing six, and the other prize awarders three each. These deputies elect for two consecutive years four members of the Board of Directors of the Nobel Institute, which board, exclusively consisting of Swedes, must reside in Stockholm. A fifth member, the President of the board, is nominated by the Government. The Board of Directors has in its care the funds of the institution, and hands yearly over to the awarders of the prizes the amount to be given away. The value of each prize is on an average \$40,000. The distribution of the prizes takes place every year on December 10, the anniversary of Mr. Nobel's death. Full information can be obtained from "Nobelstiftelsens Styrelse" (The Board of Directors of the Nobel Institute), Stockholm, Sweden.

The awards made until now have been: Physics, 1901, W. C. Röntgen, German; 1902, H. A. Lorentz and P. Zeeman, Hollanders; 1903, H. A. Becquerel, P. Smithsonian Institution

(WASHINGTON, D. C.)

FOR THE INCREASE AND DIFFUSION OF KNOWLEDGE AMONG MEN.

OFFICERS OF THE SMITHSONIAN INSTITUTION.

Ex-Officio Presiding Officer of the Institution, William H. Taft, President of the United States; *Chancellor of the Institution*, _____, Vice-President of the United States; *Secretary of the Institution*, Charles D. Walcott; *Assistant Secretary in Charge of United States National Museum*, Richard Rathbun; *Assistant Secretary in Charge of Library and Exchanges*, Frederick W. True.

Board of Regents, _____, Vice-President of the United States, Chancellor; Edward Douglass White, Chief Justice of the United States; Shelby M. Cullom, Member of the Senate; Henry Cabot Lodge, Member of the Senate; A. O. Bacon, Member of the Senate; John Dalzell, Member of the House of Representatives; Scott Ferris, Member of the House of Representatives; Irvin S. Pepper, Member of the House of Representatives; Andrew D. White, citizen of New York; Alexander Graham Bell, citizen of Washington, D. C.; Charles F. Choate, Jr., citizen of Massachusetts; George Gray, citizen of Delaware; John B. Henderson, Jr., citizen of Washington, D. C.; Charles W. Fairbanks, citizen of Indiana.

The Institution at Washington, D. C., was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian Building, was erected on land given by the United States. The Institution is legally an establishment having as its members the President of the United States, the Vice-President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice-President, the Chief Justice, three members of the United States Senate, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress. It is under the immediate direction of the Secretary of the Smithsonian Institution, who is the executive officer of the Board and the director of the Institution's activities.

For the increase of knowledge, the Institution aids investigators by making grants for research and exploration, supplying books, apparatus, laboratory accommodations, etc. It occasionally provides for lectures, which are published. It has initiated numerous scientific projects of national importance, some of which have been turned over to the Government and resulted in the creation of independent Government bureaus. It advises the Government in many matters of scientific importance, especially in those that have an international aspect. It co-operates with national scientific bodies, such as the National Academy of Sciences, the American Association for the Advancement of Science, the American Historical Association, etc. It issues three regular series of publications: Annual Reports, containing papers of general interest intended to keep the ordinary reader abreast of the progress of science; Contributions to Knowledge, the distinct feature of which is that each memoir constitutes an original contribution to knowledge; Miscellaneous Collections, which contain bibliographies, reports of expeditions and of various scientific researches, and standard tables. All these publications are distributed gratuitously to important libraries throughout the world.

The Institution maintains a library, in co-operation with the Library of Congress, which numbers 265,000 volumes and consists mainly of the transactions of learned societies and scientific periodicals. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the Institution. Lists, bibliographies, rules for cataloguing and library work have been published. The Institution supports a table at the Naples Zoological Station. All these and numerous other activities may be carried on solely from the income of the Smithsonian fund. The Regents are empowered to accept gifts without action of Congress, in furtherance of the purposes of the Institution, and to administer trusts in accord therewith.

The parent Institution has the administrative charge of several branches which grew out of its early activities and which are supported by Congressional appropriations. These are the National Museum, including the National Gallery of Art; the International Exchange Service, the Bureau of American Ethnology, the National Zoological Park, the Astrophysical Observatory, and the United States Regional Bureau for the International Catalogue of Scientific Literature.

THE UNITED STATES NATIONAL MUSEUM is the depository of the national collections. It is especially rich in the natural history, geology, paleontology, archaeology and ethnology of America, and has unique collections of American history, as well as many series relating to fine arts and the industrial arts. It is both an educational and a research museum, and issues numerous scientific publications. The National Gallery of Art consists largely of the collections of etchings and engravings of George P. Marsh, the collections of Charles L. Freer, containing numerous paintings and etchings by Whistler, and examples of Chinese and Japanese art; the Harriet Lane Johnston collection, including a number of the greatest English portrait painters, and the collection of William T. Evans, of one hundred and thirty-nine paintings, representing some of the best work of one hundred American artists.

THE INTERNATIONAL EXCHANGE SERVICE, carried on in accordance with the terms of treaties entered into between the United States and various foreign nations, is for the free interchange of scientific, literary and Governmental publications between the Government of the United States and foreign Governments and institutions, and investigators in the United States and foreign lands. It has correspondents in all parts of the world, and since its establishment more than 4,000,000 packages, containing many millions of publications, have been handled by it.

THE BUREAU OF AMERICAN ETHNOLOGY, for the study of the North American Indian; THE ASTROPHYSICAL OBSERVATORY, for the investigation of solar phenomena; THE NATIONAL ZOOLOGICAL PARK at Washington, containing about 1,400 animals, and the Regional Bureau of the INTERNATIONAL CATALOGUE OF SCIENTIFIC LITERATURE, for the preparation of a classified index to the current scientific literature of the United States are also branches of the work of the Institution.

Copyright Law of the United States.

DIRECTIONS FOR SECURING COPYRIGHT UNDER ACT OF CONGRESS OF MARCH 4, 1909.

THE copyright law approved March 4, 1909, which took effect on July 1, 1909, provides that the application for registration of any work "shall specify to which of the following classes the work in which copyright is claimed belongs:"

SUBJECT MATTER OF COPYRIGHT.

(a) Books, including composite and cyclopaedic works, directories, gazetteers, and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art; models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations. The Amendment of August 24, 1912, adds: (l) motion picture photo-plays; (m) motion pictures other than photo-plays.

The application for registration of any article should distinctly specify to which one of these classes the work belongs. An article is not entitled to registration unless it is reasonably possible to class it under one or the other of the designations named in the statute.

STEPS NECESSARY TO SECURE COPYRIGHT REGISTRATION.

For works reproduced in copies for sale: 1. Publish the work with the copyright notice. The notice may be in the form "Copyright, 19... (year date of publication) by ... (name of copyright proprietor)." 2. Promptly after publication, send to the Copyright Office, Library of Congress, Washington, D. C., two copies of the best edition of the work, with an application for registration. In the case of motion picture photo-plays and of motion pictures other than photo-plays a description of the work must be filed and a money order payable to the Register of Copyrights for the statutory registration fee of \$1.

In the case of books by American authors, or permanent residents of the United States, the copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing, and binding of the book have been performed within the United States. Affidavit and application forms will be supplied by the copyright office on request.

Books of foreign origin in a language or languages other than English are not required to be manufactured in the United States. In the case of a book in the English language published abroad before publication in this country, an *ad interim* copyright for 30 days from the day of the deposit of the foreign copy may be secured by depositing in the Copyright Office one complete copy of the foreign edition within 30 days after its publication abroad. If two copies of such book manufactured in this country are deposited with application for registration and fee (\$1) during the *ad interim* term, the copyright shall be extended for the full term of 28 years.

For works not reproduced in copies for sale: Copyright may also be had of certain classes of works (see a, b, c, below) of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of \$1, sending therewith: (a) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete manuscript or typewritten copy of the work. This privilege of registration, however, does not exempt the copyright proprietor from the deposit of printed copies of a dramatic or musical composition or lecture where the work is later reproduced in copies for sale. (b) In the case of photographs not intended for general circulation, one photographic print. (c) In the case of works of art (paintings, drawings, sculpture); or of drawings or plastic works of a scientific or technical character, one photograph or other identifying reproduction of the work. In the case of a motion picture photo-play, a title and description and one print taken from each scene or act. In case of a motion picture other than a photo-play, a title and description with not less than two prints to be taken from different sections of a complete motion picture. In all these cases, if the work is later reproduced in copies for sale, two copies must then be deposited.

COPYRIGHT FEES.

For registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal. But only one registration at one fee is required in the case of several volumes of the same book deposited in the Copyright Office at the same time. For every additional certificate of registration, or copy of record under seal, 50 cents. In the case of photographs the fee shall be 50 cents where a certificate is not requested. For recording and certifying an assignment of copyright, or for a certified copy of an assignment, \$1, if the instrument is not over three hundred words in length; if more than three hundred and less than one thousand words in length, \$2; if more than one thousand words in length, \$1 additional for each additional one thousand words or fraction thereof over three hundred words. For comparing a copy of an assignment with the record of such document in the Copyright Office and certifying the same under seal, \$1. For recording the transfer of the proprietorship of copyright articles, 10 cents for each title of a book or other article, in addition to the fee prescribed for recording the instrument of assignment. For recording an extension or renewal of copyright, 50 cents. Remittances should be made by money order payable to the Register of Copyrights. Forms for application for copyright registration will be furnished on request.

DURATION OF COPYRIGHT.

The original term of copyright runs for twenty-eight years. Within one year prior to the expiration of the original term, the author, if living, or the widow or widower of the author, or the children of the author if he be not living; or if none of these be living then the author's executors, or in the absence of a will, the author's next of kin may secure a renewal for a further term of twenty-eight years, making fifty-six years in all. In case of composite works, if the proprietor secured the original copyright, he may also secure the renewal.

ASSIGNMENTS.

Copyrights are assignable by any instrument of writing. Every assignment of copyright must be recorded in the Copyright Office within three calendar months after its execution in the United States or within six calendar months after its execution without the limits of the United States, "in default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, whose assignment has been duly recorded." Every assignment of copyright executed in a foreign country must be acknowledged by the assignor before a consular officer or secretary of legation of the United States authorized by law to administer oaths or perform notarial acts. The certificate of such acknowledgment under the hand and official seal of such consular officer or secretary of legation is *prima facie* evidence of the execution of the instrument.

COPYRIGHT LAW OF THE UNITED STATES—Continued.

INTERNATIONAL COPYRIGHT RELATIONS.

Copyright relations have been established with the following foreign countries by proclamation of the President: Austria, Belgium, Chile, Costa Rica, Cuba, Denmark, France, Germany, Great Britain and her possessions, Italy, Luxemburg, Mexico, Netherlands and possessions, Norway, Portugal, Spain, Sweden, Switzerland, Tunis.

Copyright treaties have also been entered into with China, Japan and Hungary (the latter in effect on October 16, 1912). The Copyright Convention of Mexico of 1902 has been ratified by the United States and is effective from July 1, 1908, as between the United States and Costa Rica, Guatemala, Honduras, Nicaragua and Salvador.

The Initiative and Referendum.

The Referendum has been defined as "the referring of legislation to the people for final rejection or acceptance"; the Initiative as "the giving to the people the right of proposing legislation to be acted upon." It has been further said that the Referendum as it is now generally advocated requires that no law save a strictly defined class of urgent measures for the public peace, health and safety, which usually must have a two-thirds or three-fourths majority to pass, shall go into effect without waiting a fixed time, say ninety days. If, during this time, a part of the voters, say ten per cent, sign a petition for the Referendum on that law, it would not go into effect till the next regular election, when the people would vote on it, and if a majority voted "no" it would not be a law. The Initiative gives the people the power to originate laws. If a certain percentage of the voters, say ten per cent., sign a petition for a law and file it with the proper official it must come before the Legislature and perhaps be referred to the people. Sometimes the law requires that legislation be referred to the people, whether they petition it or not. This is called the "Compulsory Referendum." Where the Referendum is taken only when a certain number petition for it, it is called the "Optional Referendum." The Referendum and the Initiative provide for direct legislation, that is, legislation directly by the people.

Mr. C. B. Galbreath, State Librarian and Secretary of the Board of Library Commissioners of the State of Ohio, in a pamphlet issued by the Ohio State Library in 1911, gives the following sketch of the progress of the Initiative and Referendum in the United States:

1897—Iowa applied Referendum to all franchise grants.

Nebraska made the Initiative and Referendum optional in cities.

1898—South Dakota adopted Initiative and Referendum amendment.

1900—Utah adopted amendment, for which Legislature has never passed enabling act.

1901—Illinois passed public policy law providing for Advisory Referendum.

1902—Oregon, by Constitutional amendment, secured an effective form of the Initiative and Referendum.

1903—Los Angeles, Cal., applied Initiative and Referendum in municipal affairs.

1905—Nevada, by Constitutional amendment, adopted the Referendum.

Grand Rapids, Mich., applied Initiative and Referendum to municipal affairs.

1906—Montana adopted Initiative and Referendum amendment.

Delaware, by popular vote, instructed the Legislature to provide for the Initiative and Referendum.

1907—Oklahoma placed Initiative and Referendum in the Constitution to be submitted to the people.

Maine Legislature voted to submit an Initiative and Referendum amendment.

Missouri Legislature voted to submit an Initiative and Referendum amendment.

North Dakota Legislature voted to submit an Initiative and Referendum amendment.

Delaware Legislature placed the Initiative and Referendum in the charter of Wilmington.

1908—Missouri adopted Initiative and Referendum by a vote of 177,615 to 147,290.

Maine adopted Initiative and Referendum by a vote of 53,785 to 24,513.

The Legislature of North Dakota failed to submit the Initiative and Referendum to the people.

1909—Arkansas Legislature voted to submit Initiative and Referendum amendment.

Colorado Legislature voted to submit Initiative and Referendum amendment.

1910—Arkansas adopted Initiative and Referendum amendment by a vote of 91,367 to 39,111.

Colorado adopted Initiative and Referendum amendment by a vote of 89,141 to 28,698.

Arizona placed Initiative and Referendum in Constitution to be submitted to popular vote.

New Mexico placed Initiative and Referendum in Constitution to be submitted to popular vote.

1911—People of Arizona voted approval of Constitution containing provisions for Initiative, Referendum and Recall.

The people of New Mexico voted approval of Constitution containing provisions for the Initiative and Referendum.

The California Legislature voted to submit the Initiative, Referendum and Recall amendments, and the electors later in the same year adopted them by a vote of 168,744 to 52,093.

The Legislature of Nevada for a second time voted to submit an Initiative amendment to the Constitution.

The Legislatures of the States of Washington, Wyoming, North Dakota, Nebraska, Florida, Idaho and Wisconsin voted to submit to the people Initiative and Referendum amendments to the Constitution.

The Legislature of Ohio in 1911 passed an act providing for the Initiative and Referendum in all the cities of the State; requiring thirty per cent. of the electors for the Initiative and fifteen per cent. for the Referendum.

An Initiative and Referendum system was adopted by the city of Los Angeles at a special election held on December 1, 1902. Since then Sacramento, San Bernardino, San Diego, Pasadena, Eureka, Santa Monica, Alameda, Santa Cruz, Long Beach, Santa Barbara, Palo Alto, Richmond, and Berkeley in California have adopted charters of the model of Los Angeles. The California Legislature in 1911 passed a law conferring Initiative and Referendum powers on voters in cities.

Methods of electing United States Senators by a popular vote have been adopted by the States of Oregon, Nebraska, Nevada, Minnesota, New Jersey, Ohio, Wisconsin, Kansas, and California.

The Initiative and Referendum bill was killed in the Massachusetts House of Representatives in 1911 by a vote of 125 to 75. A two-thirds vote necessary in order to amend State Constitution.

1912—The Supreme Court of the United States on February 19, 1912, handed down a decision upon the claim of the Pacific States Telephone and Telegraph Company, that a tax upon it imposed by the Initiative and Referendum method in Oregon, was unconstitutional. The Court decided that only Congress and not the Supreme Court of the United States may object to the Initiative and Referendum. Chief Justice White announced the decision of the Court. Returns on the Initiative and Referendum measures submitted to Montana's voters at the election in November, 1912, indicated that several of them were carried by heavy majorities. They provide for party nominations for State offices by direct vote, limiting the campaign expenditures of candidates to 15 per cent. of the office salary for one year, and providing for the direct election of United States Senators and for a Presidential primary.

The Library of Congress.

THE Library of Congress was established in 1800, destroyed in 1814 by the burning of the Capitol, afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, \$23,950); in 1851, 35,000 volumes destroyed by fire; in 1852, partially replenished by an appropriation of \$75,000; increased (1) by regular appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. Sixty sets of Government publications are at the disposal of the Librarian of Congress for exchange, through the Smithsonian, with foreign Governments, and this number may be increased up to 100. Other special accessions have been: The Peter Force collection (22,529 volumes, 37,000 pamphlets), purchased 1867, cost \$100,000; the Count de Rochambeau collection (manuscript), purchased 1883, cost \$20,000; the Toner collection (24,484 volumes, numerous pamphlets), gift in 1882 of Dr. Joseph M. Toner; the Hubbard collection (engravings).

The collection is now the largest in the Western Hemisphere, and third in the world. It comprised at the end of the fiscal year (June 30, 1912) about 2,012,393 printed books and pamphlets (including the law library of which, while a division of the Library of Congress, still remains at the Capitol), manuscripts, maps and charts, pieces of music, and photographs, prints, engravings, and lithographs numbering about a million.

The collection is rich in history, political science, in official documents, National, state, and foreign, and in Americana, including important files of American newspapers and original manuscripts (Colonial, Revolutionary, and formative periods). Many of the rare books and manuscripts belonging to the Library are exhibited in show cases on the second floor.

The Library is rich in special collections acquired since 1897.

In Prints—The Hubbard collection, gift in 1898 of Mrs. Gardiner G. Hubbard; Noyes works of Japanese artists; Garrett, 19,113 prints (on deposit); George Lothrop Bradley, 1,980 engravings; prints issued by the Government callographies of France, Germany, Italy, Japan and Austria-Hungary.

Manuscripts—The PAPERS OF NINE PRESIDENTS: Washington, Jefferson, Madison, Monroe, Jackson, Van Buren, Polk, Pierce, and Johnson. AMERICAN STATESMEN AND POLITICIANS: Franklin R. Morris, Hamilton, Van Buren, Deff Green, Washburne, Clayton, Chase, Crittenden, Lyman Trumbull, E. M. Stanton, John Sherman, Gideon Welles (deposited); James H. Hammond, J. L. M. Curry. MILITARY PAPERS: Pickett papers, Gen. George B. McClellan; Gen. W. T. Sherman. DIPLOMATIC: Wm. Short papers. NAVAL PAPERS: Preble; John Paul Jones. COMMERCIAL HISTORY: Ellis, 1805-1853; Bourne, 1776-1816; Galloway (early part of the eighteenth century); letters of William Taylor (the latter part of the eighteenth century); of John White, cashier of the Bank of the United States at Baltimore; Edward Dixon, merchant of Port Royal, 1743-1796. DISTRICT OF COLUMBIA: Papers of William Thornton; George Watterston. EUROPEAN ARCHIVES: Stevens Index, 1763-1783; upward of 100,000 folios of transcripts of documents relating to American Colonial history. STATE PAPERS: Continental Congress; House of Representatives. COLONIAL DOCUMENTARY HISTORY: Records of Virginia Company; Spanish papers of New Mexico and Florida; Philippine and Guam Documents. SCIENTIFIC: Maury papers. MEXICAN HISTORY: Yturbe papers; Inquisition papers, 1759. LITERARY: Louise Chandler Moulton collection of letters.

Maps—The Kohl Collection; manuscript maps of Lord Howe (and many other manuscript maps); the Lowery Collection of maps of SPANISH POSSESSIONS NOW WITHIN THE LIMITS OF THE UNITED STATES.

Printed Books—The Weber library (Sanskrit literature, 3,018 volumes, 1,002 pamphlets); Hattala (Slavic, about 1,500 volumes); Yudin (Russian, 80,000 volumes); the Huitfeldt-Kaas (Scandinavian, 5,000 volumes); the John Boyd Thacher collection of Incunabula (deposited); the Deinar collection of Hebraica, comprising upward of 10,000 titles, was given to the Library by Mr. Jacob H. Schiff in 1912.

In 1897 the main collection was removed from the Capitol to the building erected for it under the acts of Congress approved April 15, 1886, October 2, 1888, and March 2, 1889, at a cost of \$6,347,000 (limit by law, \$6,500,000), exclusive of the land, which cost \$555,000. The architects who furnished the original designs were John L. Smithmeyer and Paul J. Pelz. By the act of October 2, 1888, before the foundations were laid, Thomas L. Casey, Chief of Engineers of the Army, was placed in charge of the construction of the building, and the architectural details were worked out by Paul J. Pelz and Edward P. Casey. Upon the death of General Casey, in March, 1896, the entire charge of the construction devolved upon Bernard R. Green, General Casey's assistant, and under his superintendence the building was completed in February, 1897, opened to the public November, 1897. The building occupies three and three-quarter acres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnificent library building in the world. In the decorations some forty painters and sculptors are represented—all American citizens. The floor space is 326,195 square feet, or nearly 8 acres. The book stacks including the new stack built over the southeast interior court, contain about 100 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers.

The Library is maintained by annual appropriations by Congress for various purposes, including the purchase of books. Total appropriation for 1913—\$587,405.00. For service and contingent expenses, \$390,420.00; purchase of books, \$98,000.00; building and grounds, \$98,985.00.

Library Service.—Library proper, 340 employes; copyright, 88; distribution of cards, 27; disbursement and care of building and grounds, 123. Total, 578. By virtue of the act of 1897, employes in the Library proper are appointed by the Librarian of Congress "solely with reference to their fitness for their particular duties."

Copyright Office.—The Copyright Office is a distinct division of the Library of Congress, and is located on the ground floor, south side; open 9 to 4.30. It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direction and supervision of the Librarian of Congress," to perform all the duties relating to copyrights. Copyright registration was transferred to the Librarian of Congress by the act of July 8, 1870. Of most articles copyrighted two copies, and of some one copy, must be deposited in the Library of Congress to perfect copyright.

Entitled by statute to draw books for home use are the following: The President, the Vice-President, Senators, Representatives, and Delegates in Congress (no books may be given out upon the orders of members in favor of those who are not members); Heads of Departments, the Justices, Reporter, and Clerk of the Supreme Court; the Judges and Clerk of the Court of Claims; Judges of the Court of Appeals of the District of Columbia and Judges of the Supreme Court of the District of Columbia; representatives at Washington of foreign Governments; the Solicitor-General and Assistant

Attorney-General; the Secretary of the Senate; the Clerk of the House of Representatives, the Solicitor of the Treasury, ex-Presidents of the United States; the Chaplains of the two Houses of Congress; the Secretary and Regents of the Smithsonian Institution; the members and Secretary of the Interstate Commerce Commission, and Chief of Engineers of the Army.

Inter-Library Loans.—While not a lending Library, but a reference Library, primarily and essentially, the Library of Congress maintains an inter-library loan system by which special service is rendered to scholarship by the lending of books to other libraries for the use of investigators, engaged in serious research, which it is not within the power or duty of the Library in question to supply, and which at the time, are not needed in Washington.

Hours.—The Library building is open to the public all days in the year excepting certain legal holidays. The hours are from 9 A. M. to 10 P. M. week days, and from 2 P. M. to 10 P. M. Sundays and holidays.

The Main Reading Room, and Periodical Reading Room are open to the public from 9 A. M. to 10 P. M. week days, and from 2 P. M. to 10 P. M. Sundays and holidays.

The Librarian's Office is open for the transaction of business from 9 A. M. to 4.30 P. M. week days, and from 2 P. M. to 6 P. M. Sundays and holidays.

The other administrative divisions of the Library, including the Copyright Office, are open for the transaction of business from 9 A. M. to 4.30 P. M. all days in the year, excepting legal holidays and Sundays.

Librarians Since the Inception of the Library.—1800-1814, the Clerk of the House of Representatives (for the time being); 1815-1829, George Watterston; 1829-1861, John S. Meehan; 1861-1864, John G. Stephenson; 1864-1897 (June 30), Ainsworth R. Spofford; 1897-January 17, 1899, John Russell Young; 1899 (April 5), Herbert Putnam.

General Administration.—Librarian of Congress, Herbert Putnam; Chief Assistant Librarian, Appleton P. C. Griffin; Chief Clerk, Allen R. Boyd; Secretary, Jessica L. Farnum.

The Rhodes Scholarship at Oxford University.

CECIL RHODES, statesman, who died at Cape Town, South Africa, March 26, 1902, directed in his will dated July 1, 1899, that a part of his fortune, estimated at \$10,000,000, should be applied to the creation of a fund for the support of a certain number of scholarships covering a three-years' course at the University of Oxford. He directed that the selection of the recipients of this gift should be made from three to nine from each of the British Colonies, two from each State and Territory of the United States, or one hundred in all, and fifteen from Germany. Mr. Rhodes desired that in awarding the scholarships, account should be taken of different qualities—literary and scholastic attainments, love of outdoor sports, strong, manly qualities such as courage, generosity, kindness, etc., high moral character, and a desire to serve in public affairs.

The agencies for final selection vary a good deal. Scholars from Cape Colony are chosen by the individual schools to which the scholarships are especially assigned. In several of the Canadian provinces and in a few States of the American Union it has been decided that an appointment shall be made in rotation by the leading universities. Under this system the field of selection each year is somewhat narrowed, but it is possible to carry out more closely than otherwise the suggestions made by Mr. Rhodes, who appears to have had in his mind selection by a single institution. The five German students for whom annual provision is made are nominated, according to the terms of the will, by the Emperor himself. In the great majority of the States of the Union, in outlying colonies like Bermuda, Jamaica and Newfoundland, in four provinces of Canada, in New Zealand and the States of Australia, the final choice of the scholar is left in the hands of a Committee of Selection. Great care has been taken in the constitution of these committees, as it has been felt that on the wise and impartial exercise of their judgment depends more than upon anything else the full success of the scheme.

In most of the States the selection is made by a committee appointed by representatives of the colleges; in some the appointments are made in rotation by the leading colleges.

The conditions regulating the award of scholarships in the American States provide that the candidates shall have satisfactorily completed the work of at least two years in some college of liberal arts and sciences. The upper age limit must be twenty-four years at the time of entering upon the scholarship at Oxford. To be eligible the candidate must be a citizen of the United States, or the son of a citizen, and must be unmarried. Each student receives an allowance of £300 a year, which is equivalent to \$1,500, payable in quarterly instalments, which is just enough to enable a man to pay the expenses of vacations as well as terms. The first instalment is not payable until the student has actually gone into residence at Oxford, so he should go abroad with one or two hundred dollars in his possession.

At the beginning of Michaelmas term, October, 1904, there entered Oxford seventy-two Rhodes scholars; forty-three were Americans, twenty-four Colonials and five Germans. The full number of scholarships, when all are filled, is, at present, 189; and this number should be maintained from year to year, vacancies being filled as the men complete their three-years' course. The last examination in the United States took place in October, 1912. There will be examinations also in October, 1913, and 1915, respectively. The examinations are not competitive, but qualifying. Inquiries as to particulars by intending candidates may be addressed to any college. Information may also be obtained from The Rhodes Trust, Seymour House, Waterloo Place, London, S. W., or from F. J. Wylie, Secretary to the Rhodes trustees, Brasenose College, Oxford, England.

New York Public Library.

ASTOR, LENOX AND TILDEN FOUNDATIONS.

ESTABLISHED by consolidation of the "Trustees of the Astor Library," the "Trustees of the Lenox Library" and the "Tilden Trust," May 23, 1895, twenty-one trustees being chosen from the Trustees of these corporations; in 1902 the number of Trustees was increased to twenty-five, of which number the Mayor of the city of New York, the Comptroller and the President of the Board of Aldermen serve *ex-officio*. The agreement of consolidation provided for the establishment and maintenance of a free public library and reading room in the city of New York, with such branches as might be deemed advisable for the continued promotion of the objects and purposes of these several corporations.

The Trustees soon after consolidation in 1895, determined to pursue a liberal policy and to create a great library system that would serve the needs of scholars and of the general reading public as well. An act was passed by the Legislature and approved May 19, 1897, giving the city the necessary authority to issue bonds for the construction of a building on the present site and to contract with the New York Public Library for its occupancy. Carrère & Hastings were appointed architects of the building on December 9, 1897. The corner-stone was laid November 10, 1902, and the building was opened to the public on May 23, 1911.

The building is in the form of a rectangle 390 feet long and 270 feet deep, built around two inner courts, each about 80 feet square; it has a cellar, basement and three upper floors. The area covered is about 115,000 square feet, the cubic contents 10,380,000 cubic feet. The material is largely Vermont marble (375,000 cubic feet), bonded in brick walls. There are seats for 768 readers in the main reading room and seats in other public rooms bring the total capacity up to 1,760. In the main stack room are 334,530 feet (63.3 miles) of shelving, with capacity for about 2,500,000 volumes. Book stacks in the special reading rooms amount to about 70,000 feet, with capacity for about 500,000 volumes.

The building fronts on Fifth Avenue, looking East. On the basement floor, with entrance from Forty-second Street, are the rooms for circulation of books, for children's reading, for newspapers, a Library School and its offices, and public telephones; on this basement floor with entrance on Fortieth Street, are the shipping rooms and the printing and binding offices. On the first floor are the business offices of the circulation department, the offices of the Bursar, a reception room, an exhibition room, and reading rooms for current periodicals, technology, patents. On the second floor are the offices of the Director and Assistant Director, a lecture room, the ordering and cataloguing rooms, and reading rooms for Jewish literature, Oriental literature, Slavonic literature, science, economics and sociology and public documents. On the third floor are the public catalogue room and the main reading room, the latter occupying nearly the whole of the west front of the building, in size about 300 feet long by 80 feet wide, with seats for 768 readers. Along the south side of the third floor are special reading rooms devoted to American history, maps and engravings. Along the Fifth Avenue front are the art and architecture reading room, the Stuart room, and the picture galleries. Along the north front of the third floor are reading rooms for music and for genealogy and local history.

On March 12, 1901, Mr. Andrew Carnegie offered to give \$5,200,000 to the city for the construction and equipment of free circulating libraries, upon condition that the city should provide the land and agree to maintain the libraries when built. This communication was submitted to the Mayor on March 15, and on April 26 an act was passed authorizing acceptance of the gift by the city upon the terms imposed by Mr. Carnegie. An agreement with the city was executed on July 17, the Library acting as agent for Mr. Carnegie, under which forty-two buildings are to be erected in Manhattan, the Bronx, and Richmond (later increased to fifty), on sites to be selected and purchased by the city with the approval of the Library, the buildings to be leased to the Library and to be under its control. The city agrees to provide adequate yearly maintenance, 10 per cent. of the cost of each building being agreed upon as a minimum.

On November 7, 1901, an agreement was made with three firms of architects in New York to prepare plans and specifications for these branch libraries. On June 6, 1902, an issue of bonds for \$250,000 was authorized for purchase of sites. The first Carnegie building, known as the Yorkville branch, was opened December 13, 1902, at 222 East Seventy-ninth Street; the second, providing a new home for the Chatham Square branch, was opened November 2, 1903, at 33 East Broadway. By the end of 1911 thirty-two branches had been opened under this contract. The Trustees of the Library are:

"The object of this organization is to study the whole problem of labor in prisons and correctional institutions, with a view to securing legislation among the States of the Union, to the end that all prisoners may be so employed as to promote their welfare and at the same time to reimburse the institutions for expense of maintenance, while preventing unfair competition between prison-made goods and the products of free labor, and securing to their dependent families a fair proportion of the rightful earnings of prisoners."

Literature of 1912.

BY FREMONT RIDER.

THE book production of the United States continues its steady increase in volume. In quality, however, if we refer to single big books of enduring worth, 1912 must be said to have fallen below 1911. On the other hand, there has been a notable production of excellent books at cheaper prices, covering in the aggregate almost all branches of knowledge—a manifestly desirable tendency.

FICTION with a few exceptions, was commonplace in 1912, perhaps by contrast with 1911. Books in pure SCIENCE were few, and HISTORY seems to have been temporarily abandoned for BIOGRAPHY. A new science, EUGENICS, has sprung up in public interest, with an accompanying crop of new books. There has been something of a renaissance in POETRY, and the return to country living is reflected in the many good offerings in BUILDING and AGRICULTURE.

The following 400 odd titles, out of some 11,000 published in 1912, aim to include the most important, not only in the sense of having more or less enduring value, but also because of their popularity, possibly transient, but no less significant, as evidenced by sales or repute. Where choice was necessary, emphasis has been laid on the popular and practical rather than the scholarly and theoretical.

The Dickens Fellowship.

The Dickens Fellowship is a worldwide league of English-speaking men and women whose purpose is to exemplify the teachings of Charles Dickens and to cultivate and diffuse the spirit which pervades his writings—the spirit of innocent festivity and mirth, of religion without bigotry, of charity without coldness, of universal philanthropy and human kinship. The society began its existence in London in October, 1902. The object and aims of the Fellowship are:

"To knit together in a common bond of friendship lovers of that great master of humor and pathos, Charles Dickens. To spread the love of humanity, which is the keynote of all his work. To take such measures as may be expedient to remedy or ameliorate those existing social evils which would have appealed so strongly to the heart of Charles Dickens, and to help in every possible direction the cause of the poor and the oppressed. To assist in the preservation and purchase of buildings and objects associated with his name and mentioned in his works. To do all such things as are incidental or conducive to the attainment of the above objects or any of them."

The Fellowship is open to all, without restriction as to class, creed or nationality. Headquarters, Whitcomb House, London. Branches of the Fellowship have been formed not only throughout Great Britain but in the United States and Canada, India, Australia and New Zealand, 15,000 members in all. It is estimated that there are 24,000,000 copies of Dicken's works extant.

Grand Nest, Milwaukee National Bank Building, Milwaukee, Wis.

National Model License League.

President—T. M. Gilmore, Louisville, Ky. *Vice-President*—George G. Brown, Louisville, Ky. *Treasurer*—O. H. Wathen, Louisville, Ky. *Secretary*—G. R. Washburne, Louisville, Ky.

The purpose of the organization is to conduct a national educational campaign in favor of legislation intended to take the liquor question out of politics and to put law-breakers out of the liquor business. It advocates limitation of licenses in proportion to population, thus preventing undue competition; mandatory penalties suspending and cancelling licenses of law-breakers; moderate license fees enabling the license holder to make a legitimate profit, and the renewal of a license so long as the holder obeys the law, and so long as the business is not outlawed by vote of the people, thereby relieving the liquor dealer of the domination of politicians.

The League's legislative plan has been adopted as a whole by Indiana, and in part by Texas, Ohio, Alabama, Arkansas, Michigan, Louisiana, Iowa, Connecticut and Oregon. The League was organized in October, 1907. Its membership comprises leading distillers, brewers, wholesalers and retailers throughout the country, and includes numerous professional and business men.

The School of Journalism.

(From a Statement prepared by Dr. Talcott Williams, Director.)

THE School of Journalism in Columbia University, New York City, on the Pulitzer foundation; opened September 30, 1912. It had in all—November 1, 1912—104 students, of whom 11 are women. Divided by classes there are 61 in the first year class, 15 in the second year class, 14 in the third year class and 14 in the fourth year class. Of the women who will take their degree in the School of Journalism, 9 are in Barnard, and 23 of the men are at present registered in Columbia College, but will later be transferred to the School of Journalism. Of the entering or first year class, 38 were admitted on the usual college examination and 23 under the provision laid down by the late Mr. Joseph Pulitzer in his gift that students of maturity, experience and marked fitness should be admitted without an examination. This has enabled, as Mr. Pulitzer expected, a number of journalists to enter the school. Some twenty States and three foreign countries—China, Turkey and New Zealand—are represented among those attending the course of the School of Journalism. The school offers a four years' course, leading to the degree of Bachelor of Literature in Journalism. This degree will be conferred on graduates in course for the first time at the Commencement of Columbia University, June 4, 1913.

Besides those admitted to the first year class by examination and for special fitness, particularly as shown in journalism, those in the three upper classes, 43 in number, come from other colleges, and the fourth year class is wholly composed of college graduates who enter for a year of professional study. This attendance is far larger than was expected and establishes the position of the school. The number attending is greater in proportion to the number of journalists in the country than the number attending the law and medical courses in Columbia University is in proportion to the number of those practising law or medicine. Taking the number entering for the first year as a gauge and the attendance four years hence should reach 200 or more. At the opening of the next College year in September, 1913, the school will be housed in the new building, costing \$550,000, provided by Mr. Pulitzer's bequest.

No step in professional education has attracted wider public attention or awakened a more general approval in the American press. When Mr. Pulitzer proposed the school 12 years ago, its plan, purpose and need were all challenged. From the announcement of the appointment in February, 1912, of its Director, Talcott Williams, one of the NEW YORK WORLD staff and for 38 years in active journalism, to its successful opening and full operation, the school has commanded the confidence of newspapers and journalists. One-third of its teaching staff of 26 have been in active service in journalism.

The plan of the school and its course of study were approved and at many points directed by an advisory board of twelve journalists, including Mr. John Langdon Heaton, of the editorial staff of the NEW YORK WORLD, Mr. Ralph Pulitzer, President of The Press Publishing Company (The NEW YORK WORLD) and Mr. George S. Johns, editor of the St. Louis *Post-Dispatch*. The other journalists on this Advisory Board, of which President Butler of Columbia University is a member, are: Samuel Bowles, *Springfield Republican*; Victor Fremont Lawson, *Chicago Daily News*; St. Clair McKelway, *Brooklyn Eagle*; Charles Ransom Miller, *New York Times*; Edward Page Mitchell, *The Sun*, New York; Whitelaw Reid (chairman), 451 Madison Avenue, New York; Melville Ellish Stone, Associated Press, New York; Charles H. Taylor, *Boston Globe* and Samuel Calvin Wells, *Philadelphia Press*.

The administrative work of the school is conducted by an administrative board, composed of President Butler; the Director, Talcott Williams; the Associate Director, Prof. John W. Cunliffe; Frederick P. Keppel, Dean of Columbia College; William P. Trent, Professor of English Literature; Henry R. Seager, Professor of Political Economy; James T. Shotwell, Professor of History; Ashley H. Thorndike, Professor of English, and Charles A. Beard, Associate Professor of Politics.

While there are over 20 universities and colleges which give courses in various phases of journalism and several which have schools of journalism, no other school has an endowment so large, reaching \$1,000,000 at present, with other gifts in prospect from the Pulitzer estate; none a course giving so much time to the solid study needed for the training of the journalist, and this has also the crowning advantage of a metropolis like New York in which to train its students in reporting by sending them to see and to write upon events as they come in the life of a great city. The visit of the battleship fleet and the Becker trial were two occurrences used in this way by the school. The City Hall, the departments and the regular newspaper assignments have all been used to train men in getting news as well as in writing it. Attendance on first night performances is employed in training for dramatic criticism. From the second year on, the students are under direction and correction, writing articles on financial and business subjects, editorials, special articles, and other fields of newspaper work. The headquarters of the political parties in New York City have given opportunity for training in National and State politics.

This practical training in the work of the journalist in the greatest news centre of the country comes in the last two years, but of the four years' course four-fifths are devoted to the study of history, constitutional law, political science, economics, statistics, etc.; a mastery of either French or German. These studies follow the lines laid down by Mr. Joseph Pulitzer in his plan for the school. They are taught with the comprehensive thoroughness only possible in a great university. The work and study required is on a professional standard. Taking the technical work of reporting and their studies, the students of the school are working as hard as in a newspaper office, covering the same range of subjects and writing under close supervision and correction from men trained as journalists.

The American Federation of Arts.

The American Federation of Arts is an association of organizations and individuals. It was formed at a convention held in Washington in May, 1909, which was called by the Regents of the National Academy of Art. In May, 1910, a second convention was held, and by then the American Federation of Arts had 100 chapters (affiliated organizations) and about 1,000 associate members, scattered throughout the United States.

The objects of the Federation are to unite in closer fellowship all who are striving for the development of art in America, either through production or the cultivation of appreciation; to encourage and foster endeavor; to prevent, as far as possible, duplication of effort, and to furnish a channel through which public opinion, instrumental in securing better legislation, may find expression.

American Academy of Arts and Letters.

The first seven members of the American Academy of Arts and Letters were selected by the National Institute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells, Augustus St. Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters. This society was organized at a meeting of the American Social Science Association in 1898. The qualification for membership is stated in the constitution, "It shall be notable achievement in art, music or literature." The number in the Institute is limited to 250, and the election is by ballot.

The American Academy of Arts and Letters numbers fifty members, and the officers are William Dean Howells, President; William Milligan Sloane, Chancellor; Robert Underwood Johnson, 33 E. 17th St., Permanent Secretary.

The following are the present members of the Academy, there being two vacancies:

William Dean Howells
 Henry James
 Henry Adams
 Thomas Raynesford Lounsbury
 Theodore Roosevelt
 John Singer Sargent
 Alfred Thayer Mahan
 Daniel Chester French
 John Burroughs
 James Ford Rhodes
 Horatio William Parker
 William Milligan Sloane
 Robert Underwood Johnson
 George Washington Cable
 Andrew Dickson White
 Henry van Dyke

William Crary Brownell
 Basil Lanneau Gildersleeve
 Woodrow Wilson
 Arthur Twining Hadley
 Henry Cabot Lodge
 Francis Hopkinson Smith
 Edwin Howland Blashfield
 William Merritt Chase
 Thomas Hastings
 Hamilton Wright Mable
 Brander Matthews
 Thomas Nelson Page
 Elihu Vedder
 George Edward Woodberry
 Kenyon Cox
 George Whitefield Chadwick

Abbott Handerson Thayer
 John Muir
 Charles Francis Adams
 Henry Mills Alden
 George deForest Brush
 William Rutherford Mead
 John W. Alexander
 Bliss Perry
 Abbot Lawrence Lowell
 James Whitcomb Riley
 Nicholas Murray Butler
 Paul Wayland Bartlett
 George Brown Post
 Owen Wister
 Herbert Adams
 Augustus Thomas

The following now deceased, were members of the American Academy of Arts and Letters: Augustus St. Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay, Edward MacDowell, Charles Follen McKim, Charles Elliot Norton, John Quincy Adams Ward, Thomas Bailey Aldrich, Joseph Jefferson, Richard Watson Gilder, Winslow Homer, Carl Schurz, Joel Chandler Harris, Daniel Coll Gilman, Donald Grant Mitchell, Julia Ward Howe, Francis Marion Crawford, Henry Charles Lea, Bronson Howard, Edwin Austin Abbey, Thomas Wentworth Higginson, William Vaughn Moody, Frank Davis Millet, Horace Howard Furness, John Bigelow and Edward Everett Hale.

* The French Academy is one of five academies, and the most eminent, constituting the Institute of France. It was founded in 1635 by Cardinal Richelieu, and reorganized in 1816. It is composed of 40 members, elected for life, after personal application and the submission of their nomination to the head of the state. It meets twice weekly, at the Palace Mazarin, 23 Quai Conti, Paris, and is "the highest authority on everything appertaining to the niceties of the French language, to grammar, rhetoric, and poetry, and the publication of the French classics." The chief officer is the secretary, who has a life tenure of his position. The present permanent secretary is Thureau-Daugin (No. 8), who was elected an Academician in 1893. A chair in the Academy is the highest ambition of most literary Frenchmen.

The other academies of the Institute of France are: The Academy of Inscriptions and Belles-Lettres, with 40 members; Academy of Sciences, with 68 members; Academy of Fine Arts, with 40 members (as follows: Painting, 14; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6), and Academy of Moral and Political Science, with 40 members. All members are elected for life.

The Commission of Fine Arts.

HEADQUARTERS, WASHINGTON, D. C.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a permanent Commission of Fine Arts is hereby created to be composed of seven well-qualified judges of the fine arts, who shall be appointed by the President, and shall serve for a period of four years each, and until their successors are appointed and qualified. The President shall have authority to fill all vacancies. It shall be the duty of such commission to advise upon the location of statues, fountains, and monuments in the public squares, streets, and parks in the District of Columbia, and upon the selection of models for statues, fountains, and monuments erected under the authority of the United States and upon the selection of artists for the execution of the same. It shall be the duty of the officers charged by law to determine such questions in each case to call for such advice. The foregoing provisions of this act shall not apply to the Capitol building of the United States and the building of the Library of Congress. The commission shall also advise generally upon questions of art when required to do so by the President, or by any committee of either House of Congress. Said commission shall have a secretary and such other assistance as the commission may authorize, and the members of the commission shall each be paid actual expenses in going to and returning from Washington to attend the meetings of said commission and while attending the same.

Sec. 2. That to meet the expenses made necessary by this act an expenditure of not exceeding ten thousand dollars a year is hereby authorized.

Approved, May 17, 1910. Headquarters, 1729 New York Avenue, N. W., Washington, D. C.

Art Progress in the United States.

BY HENRY TYRRELL.

In gauging the art progress of the United States year by year, at the present stage of development, it is necessary to take note not only of the opening of new museums and galleries, the increasing number of organizations, the evidences of growing popular interest in art and the augmented commercial value of the product of American artists living and dead; but also the rapidly accumulating riches of our public and private collections through the acquisition of foreign masterpieces, particularly the "old masters," by wealthy connoisseurs such as Messrs. Morgan, Frick, Kahn, Huntington, Widener, Altman, Clark, Johnson and others, against whose competition the resources of European conservators are usually unavailing.

It is a matter of official record that during the year ending June 1, 1912, the aggregate value of art importations alone reached the unprecedented figure of \$40,000,000. Never before has so much been spent for art works by the United States—the nearest approach being in the last preceding year, when the value of imports of this character was \$22,500,000.

The above figures take no account of the vast and priceless collections of Mr. J. Pierpont Morgan in London, now destined for removal to New York, and of which several installments already have been brought over. Estimates of the value of these Morgan collections range all the way from \$20,000,000 to \$50,000,000—the latter figure being that arrived at by the official assessor sent to England from the United States to make an approximate appraisal. Three single items among these treasures, valued according to the present rising scale are: Raffaello's "Colonna" Madonna, \$500,000; set of Gothic tapestries, \$500,000; set of Fragonard panels, \$325,000.

The sum of \$10,000,000, approximately, represents the yearly expenditures of American collectors for Old World masterpieces. This competition, while enormously inflating the prices of pictures, even as modern as those of the Barbizon school, has secured to America a large and increasing representation of the best work of Rembrandt, Rubens, Velasquez, Van Dyck, Gainsborough and Reynolds, besides Italian primitives and Renaissance and French landscapists and romanticists of the first half of the nineteenth century. For the two famous Velasquez portraits of King Philip IV. and his minister Olivares Mr. Benjamin Altman is said to have paid a round million. Corot's "Lake Nemi," which at the Mary Jane Morgan sale twenty-five years ago brought what was then thought a record price of \$17,000, sold recently at public auction in New York for \$85,000. At a Fifth Avenue dealer's a Rembrandt etching of Jan Lutma was lately sold for \$10,000. Two years ago an authoritative list was published of 86 Rembrandts owned in the United States. Since then there have been several notable additions to the number, including the noble "Mill."

Side by side with this phenomenal acquisition of world-masterpieces, the growth of American art institutions has gone on steadily, with marked advance of patronage and prestige of the work of American artists at home and abroad.

In the past year several important new art museums have been dedicated, including the Sweat Memorial, at Portland, Me.; the Toledo (Ohio) Museum; the Rice Institute, at Houston, Tex.; the Hackley Art Gallery at Muskegon, Mich.; and art institutions and schools of design at New Orleans, Detroit, Minneapolis, and Los Angeles.

The new art societies organized during the past year include: the Association of American Painters and Sculptors, with Arthur B. Davies President, and Gutzon Borglum Vice-President; the National Association of Portrait Painters, including J. W. Alexander and W. M. Chase; the Society of Women Painters; and the French Institute and Museum of New York, which plans to exhibit in America representative art treasures selected from the State museums and manufactories of France.

Announcement is made of the endowment and establishment at Harvard University of a Chair of Prints—the first of the kind to be formally established in any of the world's great universities—under the professorship of FitzRoy Carrington, of New York, editor of the Print Collectors' Quarterly, and who will in conjunction with his Harvard lectures assume the position of curator of the print department of the Boston Museum.

The accessions of the Metropolitan Museum of Art during the past year reached a total of 2,524 objects—1,131 by gift and 1,393 by purchase—of which 53 are paintings and 40 sculptures. The Museum has also acquired the indefinite loan of the Holden collection of Italian primitive paintings—a part of the important group of old masters assembled half a century ago by Consul James Jackson Jarves at Florence.

The Museum of the Brooklyn Institute of Arts and Sciences has issued a sumptuous illustrated catalogue of its celebrated Avery collection of ancient Chinese cloisonnés, by John Getz, with a preface by Prof. William H. Goodyear. The Fine Arts (Albright) Academy of Buffalo, celebrated in November the fiftieth anniversary of its founding, with an impressive retrospective exhibition. At the sixteenth annual art exhibition at the Carnegie Institute, Pittsburgh, the 348 paintings shown were viewed by 30,000 persons. Eleven paintings by foreign artists and ten by Americans (including J. Alden Welr and J. Francis Murphy) were sold, at prices ranging from \$1,500 to \$5,000.

The rapidly increasing values in American paintings and sculptures form a topic of perennial interest among connoisseurs and dealers generally. Not only have the Innesses, Martins, Wyants and Homers risen in the last few years to something like the commercial level of the Barbizon masters, but such living contemporaries as Chase, Alexander, Welr, Hassam, Tarbell, Benson, Metcalf, Murphy, Crane, Foster, Henri, Thayer, Dewing, Carlsen, Volk, Melchers, Hawthorne, Brush, Walker, Redfield, Symons and Schofield fetch thousands of dollars to-day where they did hundreds a decade ago.

A well known Academician, in pointing out the fact that a ten year investment in American pictures pays better than stocks and bonds, quotes William T. Evans as saying: "Tarbell's 'Girl Crocheting,' catalogued in an exhibition of the Ten at \$1,500, is now valued at \$5,000. La Farge's 'Visit of Nicodemus to Christ,' which I bought from the artist in 1899 for less than \$2,000, and gave to the National Gallery, is now worth \$20,000. * * * I recommended a friend to buy a Wyant in the sale of 1894 at \$500. I saw the same picture at Cottler's last Winter, and the price was \$20,000. Wyant's 'No Man's Land,' sold in the Clarke sale for \$550, brought \$6,500 in the recent Bonner sale, and with a less desolate title it might have sold for \$12,000."

The organizing and distribution of Travelling Art Exhibitions, under the auspices of the Federation of Fine Arts, have accomplished important work in practically transporting the Fifth Avenue sales galleries to towns remote from the great commercial centres, yet where there are increasingly large numbers of discriminating small buyers ready to pay moderate prices for many pictures painted by young artists of promise, rather than high figures for a few prize selections with notable names attached.

In sculpture, mural painting and applied art in its various branches, the activity and recognition are impressively manifested in such public buildings as the Pennsylvania State Capitol at Harrisburg, and the new Museum Building of the Brooklyn Institute, with their extensive use of statuary; the commissions to American artists for mural paintings in capitols, court houses and municipal buildings throughout the country; and in the movement centred in the Art and Trades Club, an organization of the leaders in the art trades in New York, with the purpose of stimulating practical interest in decorative art.

Music.

BY MAZIE E. CLEMENS.

In the season of twenty-two weeks of opera—1911-12—there were 155 performances, in which thirty-four different operas were heard. Of these Wagner led in the number of works and presentations. Puccini was second, with four works, and twenty-five representations; Verdi came next with five music dramas and twenty-two performances. In addition, there were seven performances of works by the Chicago Company. The novelties mounted were "Lobetanz," a German opera by Ludwig Thuille (see 1912 ALMANAC for story), "Le Donne Curiose," "Versiegelt," "Mona," and "La Vita Nuova." The Chicago Company introduced two novelties into the repertoire, "The Jewels of the Madonna" and "Cendrillon." Forty operas were produced altogether; seventeen were Italian, ten German, eleven French and two English. German opera was the favorite in New York, in point of operas performed. French works took first place in the repertoire of Chicago.

Mme. Luisa Tetrazzini made her first appearance at the Metropolitan Opera House on December 27, 1911, as the heroine of Donizetti's "Luca di Lammermoor." While Tetrazzini had sung better on former occasions, she showed that her voice had gained in fullness and power. In the sextet, which won applause and had to be repeated, she was at her best. To support Mme. Tetrazzini, Florento Constantino was brought from Boston to sing the part of Edgardo, which part he sang very well. Pasquale Amato impersonated Lord Enrico Ashton, Herbert Witherspoon was Raimondo and Sturani conducted.

A work of unusual worth and originality in the line of lyric drama was disclosed when Ermanno Wolf-Ferrari's opera, "Le Donne Curiose" ("The Inquisitive Women"), was sung on January 3. This delightful piece is in three acts and is composed to the Italian libretto by Luigi Sugana after Carlo Goldoni, the Italian comic dramatist of the eighteenth century. The music has spirit and sparkle and abounds in touches of wit, laughter and humorous characterization. There is frequent use of vocal ensemble and the quartet in the second act is especially attractive. The comedy is laid in Venice. A group of Venetian gentlemen establish a club, one of the principles of which is the exclusion of women. A silence about the doings of this organization by the members to their wives and sweethearts causes curiosity and jealousy. Rosaura, one of the members, loves Florindo, who through strategy obtains a key and, after some difficulty, effects an entrance to the club, accompanied by the other women. By looking through a keyhole the women see, much to their surprise, the men quietly enjoying a sumptuous dinner. While they are watching, their weight causes the door to give way and they are discovered by the revellers, who upbraid them for their adventure. But all is forgiven, and a dance in which all join ends the performance.

Leo Blech's (1871) one-act opera, "Versiegelt," had its American premier at the matinee of January 20. It was just fifty minutes long, was first performed in Hamburg in 1908 and has been heard in many other German cities. The text is by Richard Baska and Fordes-Milo after Raupach. The score, which is very well written, is melodious, descriptive and frequently humorous. Except for a short love duet, the general theme is one of comedy. The action takes place in a German village in 1830. Widow Gertrud's neighbor, Widow Willmer, is sold out for taxes unpaid and among her possessions is a wardrobe which she persuades Gertrud to hold for her. Bertel, Mrs. Willmer's son, and Elsie, the Mayor's daughter, are in love but Elsie's father, who is in love with Widow Gertrud, is opposed to the marriage. The young people tell Gertrud that the Mayor is in love with her and she is pleased. Lampe, a busybody and the only town constable, discovers the wardrobe in Gertrud's house and comes in as the Mayor is visiting Gertrud. She hides the Mayor in the wardrobe, which Lampe seals up. The young people come in and promise to release him after he signs a paper, through a small opening in the wardrobe, giving his consent to their marriage and the promise of a large dowry. Meantime Gertrud and the neighbors are coming to find the Mayor. He makes the young lovers take his place and he hides in another room. The door of the wardrobe is opened and the pair are disclosed, much to the disappointment of the constable, who is forced into the wardrobe and carried off to Widow Willmer's house. Johanna Gadski as the Widow Gertrud showed her fine skill in comedy and sang well, and Marie Mattfeld was effective as the Widow Willmer. Bella Alten was Elsie, Otto Gortiz was the constable, Hermann Jadowker was Bertel, Hermann Well was the Mayor and Alfred Hertz conducted in a masterly and effective manner.

On Sunday evening, January 28, Wolf-Ferrari's "La Vita Nuova" (1901), set to Dante's text, was given under the composer's direction. Pasquale Amato sang the baritone solos in the part of Dante skilfully, but hoarseness prevented him doing full justice to the rôle. Alma Gluck sang beautifully the part allotted to her, that of Beatrice. This piece was performed for the first time in Munich in 1903 and sung for the first time in New York in 1907.

"Cendrillon," Massenet's work, was given in French on February 20 by the Chicago Company. Maggie Teyte made a dainty and attractive Cinderella and she sang sweetly. Mary Garden was the Prince Charming, Jannie Dufau, a newcomer, disclosed a charming voice and personality in the rôle of the Fairy; Louise Berat was Mme. De la Haltiere and Mabel Riegelman and Marie Cavan were the daughters. The Chicago Opera Company acquainted New York with Wolf-Ferrari's "Le Gjojelli della Madonna" ("The Jewels of the Madonna") on March 5, and it made an immediate success. It was first heard in Berlin in December, 1911, and shows a new side of the musical talents of its author. In his two other works which we have heard there were humor and mirth, while in this one there are sadness and gloom. It depicts the lowly side of the life of the Neapolitan people. The story is as follows: It is the Fiesta of the Madonna. Maniella, a beautiful girl, is the foster sister of Gennaro, a blacksmith, who is in love with her. She disdains him and rushes from the house followed by his mother, Carmela, who entreats her to return; but she turns savagely on them and refuses. Voices of the Camorristi are heard and Maniella begins to sing and dance. The leader of the band, Rafaele, attempts to make love to her but she repulses him. He persists in his attentions and whispers to her that he will bring her the jewels which gleam on the Madonna, if she wishes them. Gennaro finds them together, overhears the conversation, and tells Maniella of the wickedness of her companion. She does not heed him. The second act is laid in the garden of Carmela's house on the same evening. Maniella tells Gennaro that she wishes to be free and to live her own life. As she departs he pleads with her and tells of his love. She mocks him and says that she loves only one man and he would steal even the jewels of the Madonna for her. As she attempts to pass through the gate, Gennaro stops her, locks the gate and takes the key with him. He goes to his shop, selects certain tools which he puts in his pockets, and disappears in the darkness. Meanwhile Rafaele and the Camorristi come to serenade Maniella and she appears in the garden, promising to follow him to his home. He goes away to await her. Gennaro returns carrying in his hand a bundle which he places on the table and opens. It contains the jewels and Maniella takes them, puts them on her neck and cries that she wishes Rafaele were there to see her. Gennaro, enraged, grasps her in his arms and the curtain drops.

The next scene is in the abode of the Camorristi. Rafaele is drinking to the maiden left behind and his companions are dancing and singing. Suddenly the voice of Maniella is heard calling him to save her from Gennaro and she enters in a weak and dishevelled condition. As the shawl falls from her shoulders the jewels are seen by the crowd. She tears them off, tramples on them and tells Rafaele she loves only him. The Camorristi depart awestricken at the sight of the jewels, and leave

Gennaro alone. Making his way to the altar of the Madonna, he replaces the jewels and stabs himself to death with a knife, just as the crowd enters with weapons to kill him. The honors of the evening went to Carolina White, who as Manilla excelled dramatically and vocally; Mario Sammarco, who ably impersonated the leader of the Camorristi, Rafeale; Amadeo Bassi in the rôle of the blacksmith, Gennaro; Louise Berat as Carmela, and to Mr. Campanini, whose masterly reading of the score deserved the highest praise.

Leo Slezak returned to the Metropolitan Opera House in a revival of "Tannhauser." His magnificent voice showed to good advantage. There was a new Wolfram in the person of Mr. Wolf and Putnam Griswold was a new Landgrave.

"Mona," the \$10,000 prize opera by Prof. H. W. Parker, of Yale University, and Brian Hooker, was heard on March 14. The story concerns the efforts of Mona, Princess of Britain, at the time of Roman rule, to free her country from the domination of the invaders. Mona learns that Gwynn, whom she loves, is Quintus, son of the Roman Governor, but she does not know that he has been working through his Roman connections for peace and that he had saved her life. When Mona, not knowing his devotion to Britain, discovers that Gwynn is a Roman, she kills him.

The performance of "Mona" has not advanced, to any material degree, the cause of opera in English, although there was an improvement in the singing in the vernacular over last year's performance when the "Pipe of Desire" was put on. From a literary point of view the book has distinction and the characters are evolved with a strong imagination but it is not adapted for music. The music is largely made up of leit motifs, in the Wagnerian sense, and the composer associates his characters with certain keys. But there are no lyric moments, no chance for the development of an emotional climax. One characteristic of the work, however, is its originality of musical style. The opera was well rendered and Mr. Hertz conducted with enthusiasm and understanding. Mme. Louise Homer's impersonation of the heroine was one of her best achievements. She sang with expression and beauty. Mr. Hinshaw, as Gloom, displayed his fine voice to advantage; Riccardo Martin, as Gwynn, a difficult part to sing, did admirably, and Putnam Griswold as the Roman Governor was striking in appearance and in excellent voice. Others who took part were Rita Fornia as Enya, Herbert Witherspoon as Arth, Albert Reiss as Nial, Lambert Murphy as Caradoc and Basil Ruyshael as an Old Man.

Mme. Charles-Cahler, an American singer, made her initial bow on April 3, as Azucena in "Trovatore," but she did not gain the measure of success expected.

The following is a review of the opera for season 1912-13, up to time of the ALMANAC going to press:

New Yorkers had an opportunity to hear a new soprano on the opening night of the Metropolitan Opera House for the season, on November 11. Puccini's "Manon Lescaut" was the work in which Lucrezia Bori made her very successful début, disclosing a voice of beauty and freshness. Caruso, as Des Grieux, delighted the audience with the golden notes that make him stand out as the greatest tenor. In addition there was a new conductor, Giorgio Polacco, who made a favorable impression. Scotti made a fascinating Lescaut and Andrea de Segurola was the old suitor, Gerone. Much enthusiasm was manifested at the second night's performance. "Tannhauser" was the attraction and a superb performance was given. Olive Fremstad was Venus, Emmy Destinn sang Elizabeth, Leo Slezak was Tannhauser, Herman Weil was Wolfram and Herbert Witherspoon was Landgraf. On November 14 "La Gioconda," by Ponchelli, was sung with an entirely familiar cast, including Caruso, who sang "Cielo e Mar" particularly well. Louise Homer appeared for the first time this season as Laura. Mr. Polacco conducted. Geraldine Farrar received a warm welcome on November 15 in Puccini's "Madama Butterfly." Martin sang Pinkerton and Scotti was Consul Sharpless. Two works rarely heard and the début of Titta Ruffo gave an especial attraction to the second week of opera. He appeared in Ambrose Thomas's (1811-1896) "Hamlet" (1868), which was given here before in April, 1892, with La Salle as Hamlet and Marie Van Zandt as Ophelia, and again in 1896, with Calve as Ophelia. On the evening of the 19th, Titta Ruffo received an ovation. While his acting did not come up to expectations, his voice revealed its power and clearness. It was fresh and vibrant, showing to best advantage in the drinking song. Mme. Zepilli made a charming Ophelia and Gustav Huberdeau was an imposing Claudius. Others who effectively sang their parts were Henri Scott as the Ghost, Mme. de Cisneros as Gertrude, Frank Preisch as Polonius and Nicolay as Horatio. Mr. Campanini received a warm welcome and conducted with spirit and skill.

Pasquale Amato sang, to an enthusiastic audience, on November 20, the prologue to "Pagliacci," which was followed by "Cavalleria Rusticana." In "Pagliacci," there was a new Nedda in the person of Lucrezia Bori and Caruso sang the music of Canio.

"Il Trovatore" was selected for the evening of November 27. Marie Rappold was heard as Leonora, Louise Homer was Azucena, Leo Slezak was Manrico, and Pasquale Amato was the Count.

The first novelty to be brought out during the season was Mozart's "Magic Flute" ("Die

Zauberfloete") at the matinee of November 23. The last time this work was heard in New York was in 1903 with Sembrich, Gadski, Goritz, Reiss, Plancon and Dippel. Mr. Gatti-Casazza's presentation was a praiseworthy one and the careful planning and execution of the production was revealed in the charming and artistic result. Ethel Parks made her first appearance as Queen of the Night, disclosing a pleasing voice. Another initial bow on the Metropolitan's stage was made by Edward Lankow, who sang the arias of Sarastro. Two survivors of the former production were Goritz and Reiss. The former sang and played Papageno in a delightful manner and the latter humorously portrayed the rôle of the negro, Monastotos. Leo Slezak made an imposing figure as Tamino and sang with his usual polish of style. Others in the cast were Mme. Destinn, who sang beautifully the music of Pamino, Bella Alten as Papagena, Putnam Griswold as the Speaker, Vera Curtis, Florence Mulford, Louise Homer, Lambert Murphy and Anna Case. Hertz conducted in his usual masterly manner.

"Parsifal" was sung for the holiday matinee of November 28 and "La Bohème" was given in the evening.

During the second week of December, Caruso appeared three times. He revived "Aida" on Monday night, with Destinn; "La Bohème on Wednesday night, in which Frances Alda sang for the first time during the season, and "Pagliacci" on Friday. The latter was followed by Wolf-Ferrari's opera, "The Secret of Suzanne," sung for the first time by a New York cast, which included Farrar, Scotti and Bade.

The newcomers in the company are: Lucrezia Bori, Louise Cox, Vera Curtis, Frieda Hempel, Stella de Mette, Lila Robeson, Paul Althouse, Umberto Maenez, Jacques Urieu, Willy Buers, Edward Erhard, Carl Braun. The conductors are: Alfred Hertz, Giorgio Polacco, Arturo Toscanini, Giuseppe Stuarani, Adolf Rothmeyer. The regular Corps de Ballet consists of forty dancers. The premiere danseuses are Mlle. Lucia Fornaroli, Mlle. Maria Pezzatini and Miss Eva Swain. The last named is the first graduate of the ballet school and the first American girl to become a premiere danseuse of the Metropolitan Opera Co. The librarian is Mr. Lionel Mapleson.

In addition to opera given at the Metropolitan, the French Opera Co. of New Orleans visited New York in April, 1912, and gave opera at the Lyric Theatre. Among the works they sung were "Il Trovatore" in French, "Mignon" and "La Favorite."

Philadelphia—The repertoire for opera in this city consisted of "Aida," "Louise," "Quo Vadis," "The Jewels of the Madonna," "Tales of Hoffmann," "Cendrillon" and "Traviata." "Versiegelt," by Blech, pleased its hearers. Mme. Gadski was the susceptible widow Gertrud, Goritz portrayed Lampe, the constable; Herman Weil was the Mayor; Herman Jadowker was Bertel; Marie Mattfeld was Widow Willmers. Caruso appeared in "Pagliacci," and Dinh Gilly delivered the prologue. "Quo Vadis" was not received with much enthusiasm, but quite the reverse was the reception given to the performance of "The Jewels of the Madonna" on February 14. Amadeo Bassi was Gennaro, Carolina White was Maniella, and Mario Sammarco was Rafeale.

Another novelty was Attilio Parelli's one-act opera "A Lovers' Quarrel," which had its first performance on any stage on March 6. It is a catchy, tuneful little work and was well received. The libretto is by E. Comitti. A pair of country lovers, Florindo and Rosaura, were betrothed when children by their parents. Florindo loves Rosaura, but knowing that she disdains him, he pretends to be indifferent. This state of affairs causes a quarrel, much to the distress of the anxious parents, but it is patched up and the lovers express their mutual happiness. The music is charming and melodious and expresses the action of the play. In the cast were Amadeo Bassi as the young lover. His voice fitted the part and he sang well; Alice Zepplini was Rosaura, and the parents were Mario Sammarco and Louise Berat, as Don Fullenzio and Donna Angelica respectively.

The Philadelphia-Chicago Grand Opera Co. commenced the season of 1912-13 on October 31, on which occasion "Aida" was performed. Dickens's tale, "Cricket on the Hearth," set to music by Carl Goldmark, was first produced in English at the matinee of November 13. Maggie Teyte was Dot, and Mabel Riegelman was Cricket, Hector Dufranne was John, and Arnold Wintertvitz conducted. On November 4 Titta Ruffo, the Italian baritone, made his bow in America, in the Quaker City, in "Rigoletto," and was warmly received. He proved himself a great singer. Others who sang were Orville Harrold as the Duke, and Alma Gluck as Gilda. Mr. Ruffo made his second appearance as Renato in "The Masked Ball." On November 13 he was heard in the title rôle of Ambrose Thomas's "Hamlet," and on November 19 he appeared at the Metropolitan Opera House, in New York, in the same opera, and met with immense success. Thomas's "Mignon" was sung on November 18, with a cast including Maggie Teyte and Edmond Clement. Mr. Charlier conducted.

Chicago—Ten weeks of opera was given under the direction of Andreas Dippel. Nearly all the novelties met with success. Among them were "Natoma," "Cendrillon," "The Secret of Suzanne," "Le Jongleur de Notre Dame" and "The Jewels of the Madonna." There were seventy performances of twenty-five different operas. Other works rendered were Wagner's "Die Walküre," with Jane Osborn-Hannah as Sieglinde and Heinrich Hensel as Siegmund; "Carmen" on the afternoon of January 24, with Mary Garden. In the evening of the same date "The Jewels of the Madonna" was given, and Carolina White took advantage of all the opportunities which the work afforded and scored a triumph as Maniella. Bassi excelled as Gennaro.

The receipts were reported to be \$452,536, and in addition, \$42,040 for performances in Milwaukee. This sum is \$70,168 in excess of the amount of the previous season. The season of 1912-13 commenced on November 25, with "Manon Lescaut."

Boston—There were seventy-two subscription performances and six special ones. "The Girl of the Golden West" (4), was heard for the first time on January 17, with Carmen Melis as the Girl, Zenatello as Johnson, Giovanni Polèse as the Sheriff, Luigi Cilla as Nick and Edward Lankow as Ashby.

During the week beginning January 31 there were rendered "Pélléas et Mélisande" (5), "Rigoletto" (4), with Maurice Renaud; "Faust" (7), with Zenatello in the title rôle, Zina Brozia as Marguerite and Vanni Marcoux as Méphistophéles, and on January 27, "Hänsel und Gretel" (4), with Jeska Swartz, Bernice Fisher, and Florence de Courcy.

Revolutions of Rossini's "Barber of Seville" (1), on January 29, and Massenet's "Manon" (2), on February 2, were given. In the former Mme. Tetrazzini appeared as Rosina, Constantino as Almaviva, Rodolfo Fornari as the Barber and Vanni Marcoux as Basilio. In the latter performance, Zina Brozia was Manon, Edmond Clement was Des Grieux, Fornari was Lescaut, José Mardone was the Count, and Jeska Swartz was Madeleine. On January 31, Mme. Gay took the part of Suzuki in "Madam Butterfly" (3), and Zenatello was Pinkerton. A dramatic and musical little opera, "La Habañera" (2), by Laparra, was revived on March 22. The cast included Mme. Gay as Pilar, Jean Rildez as Ramon, Fernand de Potter as Pedro. Other works heard were "Aida" (6), "Cavalleria Rusticana" (2), "Germania" (3), "Lucia di Lammermoor" (3), "Otello" (2), "I Pagliacci" (4), "Il Trovatore" (1), "La Traviata" (2), "Tosca" (5), "Carmen" (7), "L'Enfant Prodigue" (2), "Mignon" (2), "Samson et Dalila" (6), "Thais" (8), "Werther" (2), and "Tristan und Isolde" (4). The season closed on March 30, with Debussy's music to D'Annunzio's "Martyrdom of St. Sebastian," followed by "Hänsel und Gretel" in the afternoon, and "Pélléas et Mélisande," with Mary Garden, in the evening.

During the opening week of the season of 1912-13, beginning November 25, there were heard Offenbach's "Tales of Hoffmann," "La Bohème," "Madama Butterfly" and "Il Trovatore."

Pittsburgh—Victor Herbert's "Natoma" was enjoyed by its hearers on February 9, at the Nixon Theatre. Mr. Herbert, who was present, received an ovation and addressed the audience. Mary Garden was Natoma; Carolina White was Barbara; Hector Dufranne made an effective Father Peralta; George Hamlin was the Lieutenant; Henri Scott was Don Francisco, and Mario Sammarco was Alvarado. "The Secret of Suzanne" was sung on the afternoon of February 10, and "Hänsel und Gretel" in the evening.

Denver—On October 21 "The Secret of Suzanne" was presented by the Philadelphia-Chicago Opera Co. In the cast were Alfredo Costa, Alice Zeppilli and Francisco Daddi.

Los Angeles—Grazi's French Opera Co., at the Auditorium, gave "Madama Butterfly." In this well staged performance were Mme. Fregoleska as Cio-Cio-San. Another work heard was "La Bohème" with Mme. Chambellan as Mimì, "Carmen" and "Lucia" were also offered. The company presented as a novelty "La Navarraise." It was followed by "Cavalleria Rusticana," On another occasion "Tosca" was sung and later in the season "Rigoletto" and "Herodiade," the latter displaying the voices of the tenor, Affre, and the soprano, Mme. Richardson, to advantage.

On October 31 "Conchita" was produced by the Lombardi Opera Co.

New Orleans—The French Opera Co. gave among their several performances "Madama Butterfly" and "Tosca." These works were very popular with the audience. Mlle. Lavarenne sang the principal rôles in these operas.

St. Paul—"Tristan and Isolde" received its first production in this city on January 29. Mme. Saltzman Stevens was Isolde; Charles Dalmores was Tristan; Mme. Gerville-Reache was Brangäne and Mary Garden was White; the faithful Kurwenal. The second opera heard was "Le Jongleur de Notre Dame," with Mary Garden as Jean, Hector Dufranne as Boniface, and Gustav Huberdeau as the Prior. The following offering was "The Jewels of the Madonna" by Wolf-Ferrari, with Carolina White as Maniella, Amadeo Bassi as Gennaro, and Mario Sammarco as Rafael.

"Die Walküre" brought out a large crowd to hear it at the Auditorium, and Mme. Fremstad came in for a great deal of applause. The last work heard and which closed the season was Victor Herbert's "Natoma." The heralding of this work's California setting, American composer, and excellent cast, caused the house to be filled. The audience showed its appreciation of Campanini's masterful conducting of the score, and Mary Garden's beautiful interpretation of the Indian maiden by much applause. It was reported that the receipts for the season amounted to \$40,000, which jacked \$6,000 of meeting expenses.

San Francisco—San Francisco is the first American city that can boast of a municipal opera house. An especially musical week was given in the middle of March, when good programmes were offered by Erem Zimbalist, Harold Bauer, Luisa Tetrazzini and Myrtle Elvyn. The opera season began with "La Bohème" on September 21, at the Cort Theatre. Zandonati's "Conchita" had its first performance on the Pacific coast on September 28. On October 11, Strauss's "Salome" was rendered. Other works heard were "Carmen" and "Madama Butterfly," the latter with Amini Matini as Cio-Cio-San.

Baltimore—Opera in Baltimore was not a financial success, though it lacked nothing in the way of artistic merit. "Mignon" was given by the Aborn Opera Co., at Ford's Opera House, with Mrs. Mabel G. Stemann as Filina.

Milwaukee—"Samson et Dalila" and "Carmen" were heard at the Pabst Theatre, and "Die Walküre" was sung in the Auditorium by the Chicago Grand Opera Co.

Three performances of opera were given in New Haven, two in Portland, two in Springfield, one in Hartford.

Montreal—The Montreal Opera Co., for the first time rendered Charpentier's "Louise" in January. Louise was sung by Fely Dereyne; Huberty had the rôle of the father; Course was the mother, and Darial sang the part of the artist-lover. Two weeks of opera were given in the latter part of February by the Montreal Opera Co. The deficit in the receipts amounted to about \$75,000. "Aida" served to open the season in November, 1912. Other works heard were "Herodiade," "La Bohème," "Faust."

London—Mr. Hammerstein produced at his London Opera House fifteen weeks of grand opera. Felice Lyne, who made a sensational success in "Rigoletto," also appeared in "Lucia." Massenet's "Herodiade" introduced the Peruvian concerto. Mme. d'Alvarez, who was Herodias, and Lina Cavalleri made her reappearance in London as Salome. On January 24, Oscar Hammerstein gave a production of Cha. pentier's "Louise," with Aline Vallandri as Louise. He produced "Travata," with Mme. Victoria Fer and Mr. Orville Harrold in the principal rôles. Massenet's "Jongleur de Notre Dame" was sung on January 10, before a large audience. Interest centred chiefly around the fact that the part of Jean, written for a tenor, was sung for the first time in London by a woman. Victoria Fer as the Juggler showed that her singing and acting were of the highest. The only American in the cast was Arthur Phillips, who was the monk musician. On March 2 the curtain was rung down on the close of the winter season. During the season twelve different operas were performed, "Rigoletto" and the "Tales of Hoffmann" being the favorites, with eleven performances each. "Norma" was the last work heard and had only one performance. Among the artists who appeared were Frank Pollock, of Galesburg, Ill.; Henry Weldon, who has a magnificent bass voice, and Maurice Renaud, whose great voice and artistic singing were much appreciated. Mr. Hammerstein began his second season on April 22, with "Romeo et Juliette." Orville Harrold and Felice Lyne had leading rôles. During the first fortnight of the season there were three new stars provided—Tura, as Manrico, revived "Il Trovatore" after an eclipse of a quarter of a century; M. Lafont, a French basso, who was the Mephistopheles in "Faust," and Mme. Augusta Doria, an American, who sang Carmen. At the second night's performance "Mignon" was given. A novelty was given to London opera-goers on May 17, when Massenet's "Don Quixote," which was produced at Monte Carlo some years ago, was presented. Lafont, a new singer, had the title rôle.

Leoncavallo's new short opera, "The Gypsies," written especially for the London Hippodrome, was produced on September 16, and was warmly received. It is of lighter texture than the author's "I Pagliacci." Leoncavallo conducted the opera and was greeted with an ovation.

Covent Garden opened for the season on April 20, with Mlle. Tarquinia in "Carmen." In the same month a performance of "The Ring" was given. Wolf-Ferrari's "Jewels of the Madonna" was produced for the first time in England, on May 30, and met with great success. Mario Sammarco was Rafael. Mme. Edvina was Maniella, and Martinelli was Gennaro. The first performance of Riccardo Zandonati's opera "Conchita" was presented in July. The previous month "Il Barbiere di Siviglia" was heard, with Tetrazzini in the title rôle.

Berlin—Miss Geraldine Farrar and Herman Tildowker had their first appearance abroad in Humperdinck's "KönigsKinder." The artists were in brilliant form and were given an enthusiastic reception. The Komische Oper mounted "The Vampire," the plot of which is laid in Scotland, with Max Werner as the conductor and Franz von Egeuleff in the leading part.

Emmy Destinn appeared at the Kurfürsten Oper as Marta in "Tiefiland." She also was heard in "Die verkaufte Braut" and "La Tosca." At the same house two works of Erik Meyer-Helmuud,

"Traumbilder" and "Taglioni," were heard. Berlin audiences did not care especially for "Quo Vadis," which was well staged and sung. Adam's "Village Barber" closed the season.

At the performance of "Rosenkavalier" on February 2, Florence Easton was Sophie, Margarete Ober had the principal music to sing and Dr. Mueck conducted. "Il Matrimonio Segreto" was staged at the Königliche Hochschule. This work was first produced in Vienna in 1793 and was again heard in Milan in 1911.

The Berlin Royal Opera season of 1911-12 closed on June 23, and the new season began on August 20. Caruso and Marguerite Sylva appeared in "Carmen" on October 7.

Paris—Puccini's "Tosca" was given at the Toulouose Opera House with Mme. Compte in the title rôle. On March 22, Miss Alys Lorraine, a young soprano of California, sang the rôle of Elsa in "Lohengrin" at the National Opera. The début of Mary Garden in "La Tosca" at the Opéra Comique caused quite a stir and she came in for a storm of praise and condemnation on the part of critics, but at her third performance on September 18 she achieved a triumph with her audience.

Because of the startling character of the plot, which deals with leprosy, praise and adverse criticism was given when "La Lepruse," an opera by Henry Bataille and Sylvio Lazzari, was heard at the Opéra Comique. It is a brilliant piece of work and the music, which is Wagnerian in character, is considered to interpret ably the morbid horror of the story. Mme. Marguerite Carri sang the part of Ailette. Mme. Delna was Tili, and Mr. Beyle sang the music of Ervoank.

A drama of Bulgarian peasant life, the plot of which is something similar to that of "Cavalleria," is "The Colzar Mine," which was presented at the National Opera House on March 28. The title part was taken by M. Muratore. Augusta Doria won success in Donizetti's "La Favorita" and in Massenet's "Herodiade," which were given at La Galette.

Another novelty to Paris opera-goers was "Le Cobzar," a lyric drama in two acts, by Helene Vacaresco and Paul Milliet, music by Gabrielle Ferrari. The story of the opera is laid in a quaint little village in Roumania. It was given at the Paris Opéra and M. Muratore sang the part of Stan. Another new work heard was "La Sorcière" by Camille Erlanger, at the Opéra Comique. Marthe Chenal created the title rôle.

An opera to have its first performance in Paris was "Nail," a lyric drama in three acts by Jules Bois, music by Isidore de Lara, given at La Galette, in April. It is a love story of the Algerian desert and the scenes are laid on the border of Algeria and Morocco. Marguerite Merentie impersonated the dancing girl of the Arabian tribe, Nail. Massenet's "Roma" was heard at the Grand Opéra with a cast including Mmes. Kousnetzoff, Campredon and Arbell and MM. Muratore and Delmas. On May 16, Puccini's "Grl of the Golden West" received its first performance in the French capital at the same house. Caruso was Johnson and Carmen Meis was Minnie. "Helen of Sparta," a four-act tragedy with music, by Emile Verhaeren, was received with favor. Ida Rubinstein portrayed the heroine.

Rome—In the beginning of 1912, at the Costanzi, "La Wally" was produced. This work is set to music by Alfredo Catalani (1854-1893) and the libretto is by Luigi illica. It was first given at Milan in 1891 and was much admired. At the production here, Ersilia Caroli sang the music of Wally. On January 10 Puccini's "Bohème" was presented, with Ersilia Caroli as Mimì. Marius made his first bow to an audience in Rome as Rudolfo. Strauss's "Electra" was well received on February 7. It was new to Rome, though it had been heard at Milan in 1909. The Italian libretto is by Ottone Schanzer. Emma Carelli interpreted the title part. There were performances also given of Meyerbeer's "L'Africaine," Don Giocondo Fino's "La Festa de Grono," "Traviata" and "Il Trovatore." In the latter a newcomer appeared, Juanita Capella, "Conchita," the work of a promising young composer, Zandonai, was brought forth on March 23. The story is taken from the novel of Pierre Louy's "La Femme et le Paintin." Ersilia Caroli was the heroine, Tacani was Matteo, the lover, and Virali conducted. Another new work to be heard was Franz Lehár's "Amor di Zingaro" ("Gypsy Love"), which was rendered in May, but it did not receive the success expected. At the Nazionale "La Casta Susanna," a comic opera whose theme is taken from the French, was given, with Vanni Galliana. The music is by G. Gilbert and the libretto by G. Okoukowsky. Safonoff, the conductor, put the symphonic poem "Salome," by Henry Hadley of San Francisco, in his repertory when he played at the Augustium. Signorina Storchio appeared in revivals of Italian opera of the old romantic school, which fitted her pure soprano voice. As Violetta in "La Traviata" she gave her best impersonation and was warmly applauded.

Favorable comments were given by the critics of Leoncavallo's new comic opera, "La Regietta delle Rose," which was mounted at the Costanzi.

Nice—A new opera called "Sangre y Sol" was written by Maria Star and Henri Cain, music by Alexander Georges, and mounted on March 1. In the same city "Gina," a lyric poem in four acts, by Michael Carré, music by Jacques Larinaujat, was produced at the Municipal Opera House.

Rouen—A very picturesque work of Nougues's "L'Algie" was given at the Theatre des Arts. The librettists, Henri Cain and Louis Payen, have taken Napoleon I. for the central figure in the book and around him are woven various stages of his career. Like the author's "Quo Vadis," it is spectacular and abounds in novelty. The Paris tragedian, M. de Max, appeared as the Spectre of Defeat.

Marselles—A. Saugry produced the two operas, "Charlemagne" and "Les Trois Masques," during February. The latter is by Isidore de Lara, and the libretto by Colanti, and is taken from a one-act drama by Charles Mere.

Vienna—At the Vienna Opera House on March 16 "Aphrodite" was produced. It is a new one-act work. The book is by Hans Liebsteockel, and the music by Max Oberleithner, a composer of the modern school. The music, while lacking in rhythm and melody, is characterized by extraordinary orchestral effects.

Siegfried Wagner's "Banadrieh" was brought out at the Hofoper and the composer was present at its performance. In November, Eugen d'Albert's "Liebesketten" was produced at the Volks Oper.

Stuttgart—Mr. Richard Strauss's new thirty-five minute opera, "Ariadne auf Naxos," had its première on October 25. In the orchestration of this work Strauss has made a radical departure from his usual bombastic methods and with thirty-three players united an ensemble not unlike the chamber music style.

Ariadne was sung by Fraulein Jeriska and Zerbinetta by Fraulein Siems. Bacchus was assigned to Herman Jadowka and the tailor's apprentice was impersonated by Fraulein Greta Wiesenthal.

Hamburg—The first opera of Feruccio Busoni, "Die Brautwahl," was mounted for the first time anywhere at the Stadttheater on April 13.

Milan—Gluck's "Armide" served to open the grand opera season at La Scala with Serafin as conductor and Eugene Burzio in the principal rôle. The second opera of the season was Humperdinck's "Figli di Re" ("Königskinder"), which won favor, with Lucrezia Bori. The "Merry Wives," the German composer Nicolai's three-act opera, written sixty-three years ago, based upon Shakespeare's "Merry Wives of Windsor," was revived. Mascagni's "Isabeau," which was highly successful in South America, had its première at the same house. Mme. Agostinelli had the principal part, De Muro had the tenor music to sing and Mme. Verger was Giglietta. A typically Russian

work was presented, "La Pskovitana" ("Ivan the Terrible"), by Rimsky-Korsakow, in April. On April 17 Cimara's "Matrimonio Segreto" was revived. On October 17, "Cingallegra," by Lepilli, was heard for the first time at the Lyric, and on October 27 "Radda" was given by Orefice.

Concerts—THE WORLD made possible, by a gift of \$10,000, a series of sixty-one concerts that were given during the Winter, in order that the very best music could be heard by the masses. The first concert was given December 31, in the auditorium of Normal College. Prof. Henry T. Fleck directed. Mme. Schumann-Heink was the soloist and her singing of the great airs from "Samson and Delilah" delighted the audience. On January 7 Mme. Chalia volunteered her services and sang, besides an aria from "La Gioconda," Massenet's "Pensee d'Antoine," and Seccia's "Lungi dal caro bene." The series included, besides those mentioned, recitals in which the following artists appeared: Claude Cunningham, Miss Ricci, Mme. Frances Alda, Albert von Doenhoff, Virginia Foot, Harriet Barkley, Signor Prati, Edward Dethier, Signor Alessandrini, Miss Rubner, Mrs. Edith Chapman Gould, Miss Carrie Hirschman, Ernestine Schumann, Miss Bridewell and Mile. Borschneck. All the boroughs of Greater New York shared in the advantages arising from these concerts. At all the performances there were record-breaking crowds and more than 20,000 people were turned away from the sixty-one concerts given. The series closed on February 11. Prof. Henry T. Fleck, who developed the idea and carried out the artistic work, deserves high praise. Able assistance was given by Dr. Frank Damosch, Prof. Cornelius Rubner and Prof. Samuel Baldwin.

On November 19 Eugen Ysaye received a warm welcome when he appeared in Carnegie Hall, after eight years absence. Among the selections on the programme were his own "Reve d'Enfant" and "Old Mute," Saint-Saens's "Rondo Capriccioso," and Mozart's G Major Concerto.

Titta Ruffo, the Italian baritone, drew a very large audience when he appeared in concert at Carnegie Hall November 25. "Largo al factotum" from "The Barber of Seville," was the first selection. It was followed by an aria from "Don Giovanni."

The Drama.

In the following summary the season is reckoned from the opening of the theatres in the Autumn of 1911, to their closing in the Spring of 1912. It does not include performances at the Irving Place Theatre and stock company houses.

The plays that were mentioned in the 1912 ALMANAC, and that were still running when the book went to press, with the number of their performances, are as follows: "Around the World," 445; "Bought and Paid For," 400; "Disraeli," 332; "The Red Widow," 300; "The Woman," 254; "Maggie Pepper," 298; "The Quaker Girl," 320; "The Garden of Allah," 248; "The Little Millionaire," 250; "The Return of Peter Grimm," 234; "The Price," 196; "The Witness for the Defense," 137; "First Lady of the Land," 102; "The Enchantress," 114; "Little Boy Blue," 160; "The Million," 130; "Senator Keeps House," 76. The Irish players in repertoire of plays, 50.

The following is a review of the principal theatrical events from January 1, 1912, up to the time of the ALMANAC going to press:

There were many successful plays during the year and most of them deserved their good fortune. It is also true that there were quite a number of disastrous productions.

Of theatres, there were several additions to an already oversupply, and the folly of building so many theatres is likely to be brought home to the managers in the shape of financial losses. These houses must be kept filled in order to pay; works that will attract must be produced, and the question is whether there are enough people who care to attend theatrical performances and by their presence enable the box offices of all these houses to have profitable receipts.

Among the foreign visitors to this country was Mme. Simone, who, in "The Thief," was rather disappointing. When she appeared later in Maurice Donnay's racial drama, "The Return from Jerusalem," and later in "Frou Frou," she divulged her great talents. Lewis Waller remained in America, after his engagement in the "Garden of Allah," and appeared in several plays. Paul Orlenef and his Russian company were seen in "Czar Paul I.," an historical drama by Dmitri Mereshkovsky, which was forbidden to be produced in his native country. Others were the Berlin actors who gave Max Reinhardt's wordless play, "Sumurun," at the Casino.

The plays that met with but little success were the English productions "Preserving Mr. Panmure," by Piner; "Lady Patricia," with Mrs. Fiske, by Rudolf Bestler, and Mr. Jones's "Lydia Gilmore," "The Fatted Calf," by Arthur Hopkins, at Daly's, with Cyril Scott, was a complete fiasco.

The second week in January brought forth seven new plays. Among them, on January 8, at Daly's, was "The Bird of Paradise," a play in three acts by Richard Watson Tully, with Laurette Taylor, Lewis Stone, Guy Bates Post, Theodore Roberts, Pamela Gaythorne, Albert Perry, Ida Waterman (Oliver Morosco, 114 times).

At the Gaiety, on January 29, "Officer 666" furnished genuine mirth. It was a melodramatic farce in three acts by Augustin McHugh and told the story of a well to do young man, Travers Gladwin, an art collector. He learns that some one has assumed the name of Gladwin, is planning to steal his best pictures and to elope with Helen Burton. She thinks the burglar is the real Gladwin. She is willing to go with him because of all the lovely things she had heard about him and also because her aunt wishes her to marry a Mr. Hogg, whom she dislikes. Gladwin is determined to prevent the mistake, so he borrows for \$500 a uniform from officer 666 and disguises himself as a policeman. Confronting the thief, who discovers who he is, he is compelled to submit to mental tasks, even taking his own pictures down from the wall and wrapping them up. He is finally arrested and has difficulty in explaining that he is not the thief. However, the thief is foiled, the girl is rescued and all ends well. George Nash as the Burglar and Wallace Eddinger as Gladwin furnished thrill

of melodrama and amusing situations. Ruth Maycliffe was Helen Burton (Cohan & Harris, 300 times).

The Little Theatre was launched on its career on March 11 with John Galsworthy's comedy "The Pigeon." It had literary worth but lacked dramatic substance. Frank Relcher as Ferrand, carried off the honors of the performance. Miss Pamela Gaythorne, as the flower girl, acted delightfully, and Sidney Valentine ably portrayed the drunken cabman. At the same house were seen "The Terrible Meek," by Charles Rann Kennedy, and "The Flower of the Palace of Han," the latter a Chinese drama in five scenes and chiefly attractive because of its pictorial beauty. Both plays were tiresome and uninteresting. The second season at this house opened on October 14, with "The Affairs of Anatol," by Arthur Schnitzler, paraphrased in English by Granville Barker. Miss Marguerite Clark was Hilda, Anatol's first love, and she was a charming and pliant character. Then came Blanca, a circus lady, in the person of Miss Gail Kane. The third affair was with Mimi of the opera, who was Doris Keane, who played the rôle with distinction. Katherine Emmet was Gabrielle, and Isabelle Lee was Lona, who succeeded each other in his affections. Anatol's confidential friend Max was in the capable hands of Oswald Yorke and John Barrymore made the hero, Anatol, quite a popular chap and did full justice to the rôle (Winthrop Ames*).

Interest was shown in "The Typhoon," at the Fulton, on March 12. This unusual play by Menybert Lengyel, translated by Emmell Nytray and Baron Ongley, dealt with its subject in an entirely new way. It was a mingling of the Orient and the Occident in a remarkably clever manner. The scenes were laid in Berlin and the characters were Tokeramio in the person of Walker Whiteside, who gave a fine performance; Ilona, played by Florence Reed, who did splendid work; Jashikwa, excellently performed by Henry Bergman, and Ernest Lindner, which Malcolm Williams portrayed intelligently.

W. A. Brady's Forty-eighth Street Theatre opened on August 12 with "Just Like John," a farce in three acts by George Broadhurst. It would not be very difficult to find a play of better timber than the one which Mr. Brady selected. The cast made the best of the parts allotted to them. Among them were William Courtenay, Joseph Kilgour, Ben Johnson, Scott Cooper and Margaret Green, 16 times.

The Messrs. Shubert opened the Hippodrome for the season on August 31, with a gorgeous new spectacle entitled "Under Many Flags." The entire production was conceived and invented by Arthur Voegtlin; musical numbers staged by Wm. J. Wilson; drama written by Carroll Fleming; music and lyrics by Manuel Klein (*).

Another new theatre, the Eltinge, was dedicated on September 1, with Bayard Veiller's melodrama of psychology and character, "Within the Law." The story is based on the life and practices of the criminal class who operate in New York. The leader is a young woman, Mary Turner, who was sent to prison on a false charge of stealing goods in a department store where she worked. In revenge she determines to make society pay its debt for the undeserved imprisonment by blackmail. She is particularly bitter against her former employer, Gilder. She plans to marry his son and as he loves her it is a simple matter. The rôle of Mary Turner was splendidly acted by Jane Cowl. Florence Nash was amusing as Agnes Lynch, a slangy young person; Orme Caldara played the part of the young lover cleverly, and Dodson Mitchell gave a splendid portrayal of the elder Gilder (*).

The new Pinerò comedy, "The 'Mind the Paint' Girl," with Billie Burke, appeared at the Lyceum, September 9. It caused quite a fire of discussion when seen at the Duke of York's Theatre, London. It derives its title from a musical comedy song, and it is a dissection of theatrical life. Lily Parradell, whose parents keep a fish store, has become a star at the Pandara Theatre. She has two admirers, Captain Jeyes and Viscount Farncombe, the latter a member of the nobility. Jeyes, who has ruined his career because of Lily, cannot afford to marry her. He is jealous of the Viscount, whom she tells her origin and refuses to marry. After Jeyes and Lily exchange recriminations in the presence of Farncombe, who does not heed them, Jeyes finally leaves her to the Viscount and she becomes Lady Farncombe (Chas. Frohman*).

The first play from the pen of Miss Alice Bradley, "The Governor's Lady," was staged by David Belasco at the Republic on September 10, and won the heart of the audience immediately. It tells the story of a man and woman married thirty years who have risen from poverty to riches. While Daniel Slade, the husband, has progressed, his wife, Mary, has stood still. He has a chance to run for Governor, but instead of being in sympathy with his ambition and helping him, she stays at home, wears old clothes, darns his socks and is altogether commonplace. He determines to divorce her and marry a younger woman. After two years of separation husband and wife meet again in a child's restaurant, a scene follows in which she triumphs, and they begin life anew. A finer piece of acting has not been seen in many moons than that of the wife by Emma Dunn, whose portrayal was sincere and natural. Emmett Corrigan gave an impressive and thoroughly human performance of the husband. The other woman was ably impersonated by Gladys Hanson, and Robert McWade, Jr., was Wesley Merritt (*).

George Bernard Shaw's "Fanny's First Play," a comedy in prologue, three acts and epilogue, was given under Granville Barker's direction at the Comedy on September 16. In the cast, which was brought from London, were Elizabeth Risdon, Kate Carlyon, Eva Leonard Boyne, Mary Barton, Tim Ryley and Walter Kingsford (*).

A novel and enjoyable play, "Milestones," came to the Liberty on September 17. It is the work of Arnold Bennett, the novelist, and Edward Knoblauch. While it has its humorous and quaint side, it is not lacking in pathos. The story is laid in the mid-Victorian age of 1860. A firm of ship-builders made a fortune building wooden vessels. When the era of iron ships made its appearance, John Rhead, son of the founder of Rhead & Sibley, takes eagerly to the new method, much to the disgust of old Sibley, who refuses to have him as a son-in-law. Twenty-five years later the characters who refused to take up the new ideas have paid the penalty in ruined fortunes. John Rhead has now fallen behind the times and is blind to the advantage of steel ships instead of iron ones. So he scoffs at new methods and drives away from his house a young inventor who would marry his daughter. Rhead has forgotten his own early manhood and experience. He chooses for his daughter a man of his own ideas and this causes her much unhappiness. The next scene is in 1912. John Rhead, who grasped the new ideas in 1860, who was the conservative in 1885, is at this period ancient in ideas. He now scoffs at the ambitions of his grandchildren. But, unlike the past generations, they have learned to assert their independence and in defiance of his wishes, Murial Rhead and Richard Sibley marry. Leslie Faber gave an excellent portrayal of John Rhead; Miss Gillian Scafe won favorable comment as Rose Sibley and Aurlio Lee was Gertrude Rhead (Klaw & Erlanger*).

John Mason appeared at the Garrick on September 20, in Henry Bernstein's latest play, "The Attack." It revolves around a Senator who is surprised at an attack made on his character by a newspaper. It brings up a mistake which he made in his early life. Having been successful and honest, he realizes that he is likely to be cast down by those who believed in him. He is a widower with three children and wants to retain their love as well as that of the woman whom he intends to marry. He fights the attack and forces his enemy to retreat. Mr. Mason in the rôle of Alexander Merital gave an excellent performance and proved himself a finished artist. Martha Hedman, &

new leading woman, acted with charm and distinction; Sidney Herbert gave a creditable performance of the hypocritical editor and Frank Hollins was the statesman's son (Chas. Frohman, 100 times).

George M. Cohan scored a genuine success when he appeared in his own theatre and in his own play, "Broadway Jones," on September 23. It is a comedy in 4 acts and without music. With him are his father and mother, Jerry J. and Helen F. Cohan, George Parsons, Russell Pincus, Ada Gilman and Myrtle Tannehill (*).

Graham Moffat, author of "Bunty Pulls the Strings," had an addition to his laurels on September 26, when "A Scrape o' the Pen," a Scotch comedy, was presented at Weber's. Two of the scenes are laid on the farm of Matta Ingls in Honeycuk, and another shows the village cross in Minnieheve on New Year's Eve in 1874. The Scotch company included Agnes Bartholomew, Helen Hamilton, Carl Lyle, W. G. Robb, Roy Cochrane and J. Crichton Russell (77 times).

The story of a dual personality in the person of Dorothy, a victim of malicious influence, and the struggles of the doctor who would cure her of her malady, and control the mind of Balzamo, the charlatan hypnotist, whose influence is the cause of Dorothy's mental condition are the basic ideas of the remarkable new work of Edward Locke, "The Case of Becky," given at the Belasco on October 1. Miss Frances Starr, as Dorothy, surpassed anything she has yet undertaken and she scored a triumph. Albert Bruning, as Dr. Emerson, played splendidly throughout, and Charles Dalton portrayed the bold Balzamo with admirable effect.

Liebler & Company brought out at the Century, on October 12, "The Daughter of Heaven." It is a grand spectacle but is lacking in dramatic merit. It is by Pierre Loti and Judith Gautier, English adaptation by George Egerton. The climax of the brilliant display is the battle scene near the Wall of Nankin, with the Empress of China in armor leading against the invading Manchus. Viola Allen was the Ming princess and Basil Gil, an Englishman, the Manchu Emperor (*).

With a company from the Royalty Theatre, London, "The New Sin," a play in four acts by A. MacDonald Hastings, was well received on October 15, at Wallack's. The play is unique in the fact that there were no women in the cast, which consisted of Cyril Keightley, Julian L'Estrange, O. P. Heggle, A. P. Poulton, Roland Rushton, Arthur Bowyer and Harry Braban (Liebler & Co., 23 times).

A lovely, fresh and wholesome little play, "Little Women," in four acts, dramatized by Marlon de Forest from Louisa M. Alcott's story, came to the stage of the Playhouse on October 16. The acting was in keeping with the naturalness and charm of the story. Particularly good was the Prof. Bhaer of Carl Sauerman and the Meg of Alice Brady. Howard Estabrook had in Laurie a rôle which fitted him splendidly, and Marie Pavey as Joe was pleasing and effective. Gladys Huletite was Beth, Beverly West was Amy, Gertrude Berkeley was Mrs. March and Lynn Hammond made a capital Mr. March (Wm. A. Brady*).

William Collier came to town on November 2 at the Forty-eighth Street in "Never Say Die," and scored a hit. It was written by himself and W. H. Post and is an amusing little comedy. Mr. Collier proved his ability as a laugh provoker and Willie Junior added his quota of assistance. Paula Marr was Violet, Emily Fitzroy was the mother-in-law, John Chulow and Charles Dow Clark were the physicians (Lew Fields*).

James Bernard Fagan's comedy romance, "Hawthorne, U. S. A." scored a success at the Astor on November 4. It is a breezy little play that tells the story of an American, Anthony Hamilton Hawthorne, who is touring abroad. With his friend, Rodney Blake, he visits Oberon, the capital of Borrowina, and finds the place on the eve of a revolution. He falls in love with Princess Overitch, daughter of the king, but is in ignorance of her rank. He disposes of the villainous prince who wanted to wed her, prevents a revolution, changes traditional court etiquette and introduces American business methods. Borrowina becomes a republic and Irma, the Princess and Hawthorne can marry. Douglas Fairbanks plays the rôle of the American with rollicking success. Ivan Simpson was an admirable Minister of Police; Sam B. Hardy was Rodney Blake, the friend of Hawthorne (Cohan & Harris*).

A distinctive novelty, "The Yellow Jacket," was mounted at the Fulton on November 4. It is a Chinese play in three parts, by George C. Hazelton and J. Harry Benrimo. The play tells the story of Wu Sin Yin, who has designs on the lives of his wife, Chee Moo, and his son because he prefers his other wife, Due Jung Fah. They plot to kill them. The executioner is the father of the favored woman and he picks a farmer, Lee Sin, to kill them. But Lee Sin loved Chee Moo, so he saves her life and that of her son by killing a maid, Tso, and putting her in place of the dead body of Chee Moo. Taking the son to his home he rears him. When the boy Wu Hoo Git grows to manhood he claims his rights and achieves the "yellow jacket," which is the insignia of civil and spiritual power. The work is beautifully staged and had a thoroughly Chinese atmosphere. In the cast were George Rapply, who made a handsome and attractive Wu Sin Yin; Miss Saxone Moreland, who was an appealing Chee Moo; Arthur Young as the loyal farmer, Lee Sin; Grace Valentine, as Due Jung Fah and Antoinette Walker as the maid, Tso (Harris & Selwyn*).

Henry W. Savage offered a farce by Rupert Hughes, "What Ails You," on November 18, at the Criterion. It is a laugh provoking play, the first act of which reveals a fashionable restaurant at midnight; the second, the gymnasium of Medfills; and the third, the humorous things which occur in a 12-mile cross-country walk. William Courtleigh met all the requirements of the rôle of Medfill. Shelly Hull did some excellent acting as Bayard Duclos, an intoxicated young man; Edward Howard was the chef and Desmond Kelley and Marguerite Skirwin indulged in calisthenics in Medfills gymnasium (*).

Mrs. Flske began an engagement at the Hudson, on November 19, in "The High Road," a story of a woman's life, by Edward Sheldon. It has for its background sociological, political and moral conditions. Mrs. Flske's acting was skillful and effective. Arthur Byron gave a particularly good performance of John Maddock; Frederick Perry ably acted the part of Winfield Barnes, who becomes a Presidential candidate, and Charles Waldron was Alan Wilson (Harrison Grey Flske*).

"The Whip," which occupied the Drury Lane Theatre, in London, for two years, was presented at the Manhattan Opera House on November 22 and was a big success. It is a melodrama, in four acts and 13 scenes, by Cecil Raleigh and Henry Hamilton. Among the scenes are the Chamber of Horrors at Madam Tussaud's, where a man disguises himself as Dr. Chippen and stands in Murderer's Box; a railroad wreck from which The Whip was saved and a racing scene. Marie Illington scored the hit of the performance as the Hon. Mrs. Beamish; John L. Shline gave a capital performance of Joe Kelly, Leonore Harris was the villainess, and Lumsden Hare was the Rev. Verner Haslam. On a whole the production was a splendid spectacle, well staged and well acted.*

Charles Frohman presented at the Empire Mme. Alla Nazimova in the four-act play "Bella Donna," on November 11. This piece was adapted from Robert Hichens's novel of the same name by James Bernard Fagan. It ran for nearly a year at the St. James Theatre in London and was a success here as well. Mme. Nazimova assumed the title rôle and did full justice to the character; Charles Bryant was excellent as the London physician, Dr. Isaacson; Frank Gilmore gave an intelligent portrayal of the husband; Robert Whitworth was Mahmoud Baroudo, and Mrs. Leslie Faber was Mrs. Marchmont (*).

The Adolph Philipp Theatre was added to the list of playhouses in the city on November 23. "Auction Pinochle" was the play performed. Mr. Philipp assumed the rôle of the principal comedian

In this work, which is an adaptation of Paul Herve's, "Une Partie de Cartes," a French farce with music, by Jean Briquet. In the company are the German players: Miss Grete Meyer, Emil Berla and Miss Dora Bregowska, a Russian actress.

Mme. Simone, the French actress, returned to the New York stage at Wallack's on November 25 in "The Paper Chase," a comedy by Louis N. Parker. Historic Versailles furnished the scenes and the story is of the court intrigues during the reign of Louis XVI. It is founded upon the novel by Henry Mountjoy, "The Minister of Police." Mme. Simone did some clever pieces of acting and was ably supported by a cast including Julian L'Estrange, Pauline Frederic, Dallas Anderson, Pedro de Cordoba and others. (Lieber & Co.)*

J. Hartley Manners took Wilkie Collins's novel, "Man and Wife," as the basis of his comedy, "The Indiscretion of Truth," which was brought out at the Harris on December 3. Walter Hampden was seen in the character of Bruce Darrell, with whom Truth Coleridge eloped. Anne Meredith, in the rôle of Truth Coleridge, did remarkably well. Frank Kempie Cooper was the guardian, Sir George Stirling*.)

An English play, "Hindle Wakes," by Stanley Houghton, was staged on December 9 at the Maxine Elliott. It is a drama dealing with a rich millionaire's son and a girl weaver in his father's factory. The English company that made up the cast included Dulcie Conry, Kathleen MacPherson, Alice O'Dea, Alice Chaplin, Emelie Pollni, Herbert Lomas, James C. Taylor, Charles F. Lloyd and Roland Young.

MUSICAL PIECES.

In the line of musical comedy there were several clever productions, including "The Rose Maid," which was mounted at the Globe on April 22. It was a Viennese operetta by Bruno Granichstaedten. English book by Harry B. and Robert B. Smith. The piece was in two acts and four scenes. The story concerned the adventures of a Duke of Barchester and several American heiresses who are in search of titles (Werba & Luescher, 202 times). At the Park on September 12 was "My Best Girl," with Clifton Crawford; it was in three acts, book and lyrics by Channing Pollock and Rennold Wolf; music by Clifton Crawford and Augustus Barratt (H. B. Harris, 77 times). A musical romance which proved popular was "Count of Luxembourg," in two acts, at the New Amsterdam on September 16. Music by Franz Lehár; lyrics by Adrian Ross and Basil Hood. American libretto by Gien MacDonough. The Count to save his friend, who has helped him financially several times, from imprisonment for debt, accepts the offer of the Grand Duke Rutzinov of Russia of 120,000 francs to marry under certain conditions. These conditions are, namely, that he will not see his bride or ask questions about her, to leave Paris and three months later to get a divorce. They are married with a screen between them. The bride is a celebrated singer who owes her success to the Grand Duke and in return has promised to marry him, but he can only wed a titled lady, hence the plan to have her marry first the Count of Luxembourg. However, quite unexpectedly just before the divorce, the Count and his bride meet and fall in love and she gives up the Duke. Ann Swinburne sang and danced the part of Angele Didier delightfully (Klaw & Erlanger*). A work from the pen of the author of the "Pink Lady," which had such a successful run here and abroad, was "Oh! Oh! Delphine," at the Knickerbocker on September 16, in three acts, by C. M. S. McLellan, music by Ivan Caryll, founded on the French farce "Villa Primrose," by Georges Berr and Marcel Guillemant. In the cast besides Frank McIntyre, who caused continual laughter by his humorous impersonation of Alphonse Bouchotte, were Miss Grace Edmond, who made a very charming Delphine; Frank Doane, who was a capital Col. Pomponet, and Scott Welsh, who capably sang and danced the rôle of Victor Jolbeau. Another in the cast who deserves special mention was Octavia Broske, who as Pimboula, a Persian woman, acquitted herself remarkably well, especially in the "Venus Waltz" number. There are some pleasing selections among the fifteen musical numbers, and taking the production all together, it is a huge success (Klaw & Erlanger*). A piece with pretty music and a very poor libretto came to the Astor on October 7 in the name of "The Woman Haters," in three acts. American book and lyrics by George V. Hobart; music by Edmond Eysler. Besides captivating waltz numbers, there was a revival of the polka. Joseph Stanley danced remarkably well and Sally Fisher sang prettily. A new comer, Dally Castle, sang and danced charmingly (A. H. Woods, 32 times). Montgomery and Stone and Elsie Janis made their appearance in "The Lady of the Slipper" on October 28 at the Globe. It is a musical fantasy in three acts, by Anna Caldwell and Lawrence McCarthy, lyrics by James O'Dea, music by Victor Herbert. It is an attractive little piece containing catchy music. Besides the three stars, there are in the cast Lydia Lopoukova, the Russian dancer; Queenie Vassar, Douglas Stevenson, Vernon Castle and others (Chas. Dillingham*). On August 20, the Casino opened up with "The Merry Countess," by Gladys Unger, music by Johann Strauss with lyrics by Arthur Anderson (137 times). The new Weber and Fields Music Hall opened its doors on November 21, with the Weber and Fields all-star stock company in "Roly-Poly," and a burlesque "Without the Law," by Edgar Smith; lyrics by E. Ray Goetz and music by A. Baldwin Sloane. In the company were Marie Dressler, Nora Bayes and Jack Norworth, Frank Daniels, Bessie Clayton, Helena Collier Garrick, Arthur Aylesworth, Thomas Beauregard and eighty chorus girls*.) "The Sun Dodgers," at the Broadway on November 31, contained a number of entertaining songs and dances. It was by Edgar Smith; music by E. Ray Goetz and A. Baldwin Sloane, and had in the cast George W. Monroe, Bessie Wynn, Madeline Harrison, Ann Tasker, Nan Brennan and Harry Fisher (Lew Fields*).

Under the direction of Arthur Hammerstein, Emma Trentlin returned to town on December 2, at the Lyric in "The Firefly," a comic opera by Otto Hauerbach; music by Rudolf Friml. "The Firefly" concerns the fortunes of a street singer. While she sings near a pier in New York one of the men of a yachting party about to sail falls in love with her and displeases the young lady to whom he is engaged. Disguised as a boy, the singer sails with the party and is not discovered until they reach Bermuda. Sent back to New York, she meets an old German musician who recognizes talent in her singing and sends her abroad to study. She has become a great opera singer and on her return to New York meets, at a Fifth Avenue mansion where she is taken to sing, the man who learned to love her in her street-singing days. Supporting Trentlin, who displays to advantage her ability as a singer and actress, were Roy Atwell, Melville Stewart, Henry Vogel, Craig Campbell, Sammy Lee, Audrey Maple, Evelyn Carter and Ruby Norton*.)

At Daly's was seen on November 13 "The Red Petticoat," in three acts, book and lyrics by Rida Johnson Young and Paul West, music by Jerome Kern. Helen Lowell was Sophie Brush, around whom the story of the book is woven (Shuberts*).

A Shakespearian Table.

PROFESSOR ROLFE, the Shakespearian scholar, has counted the lines which the principal characters in Shakespeare's plays have to speak. His rule was to consider parts of lines, beginnings and endings of speeches as full lines. This is the result:

	Lines to Speak.		Lines to Speak.		Lines to Speak.
Hamlet.....	1,569	Macbeth.....	705	Mistress Page.....	361
Richard III.....	1,161	Cleopatra.....	670	Viola.....	353
Iago.....	1,117	Prospero.....	665	Julia ("Two Gentlemen")..	323
Othello.....	888	Romeo.....	618	Volumnia.....	315
Coriolanus.....	886	Petruchio.....	585	Beatrice.....	309
Timon.....	863	Touchstone.....	516	Lady Macbeth.....	261
Anthony (Cleopatra's).....	829	Imogen.....	541	Katherine (in "The Shrew")	220
Lea.....	770	Helen ("All's Well").....	479	Miranda ("Tempest").....	142
Richard II.....	755	Isabella.....	426	Perdita.....	128
Brutus.....	727	Desdemona.....	389	Cordelia.....	115

Henry V. as king and prince (in "Henry IV." and "Henry V.") has 1,987 lines to speak, and Falstaff, in both parts of "Henry IV." and "Henry V." and in the "Merry Wives," has 1,895.

Organizations for the Promotion of Education.

CHAUTAQUA INSTITUTION.

Chancellor—John H. Vincent. *President*—George E. Vincent. *President of Trustees*—Clement Studebaker, Jr. *Secretary*—Arthur M. Bestor. *Treasurer*—Fred W. Hyde. *Director*—Arthur E. Bestor. The Chautauqua Assembly, now Chautauqua Institution, was organized in 1874 as a result of the joint plan of Lewis Miller and John H. Vincent. The annual Assembly during July and August at Chautauqua, N. Y. (attendance 50,000), is a sixty-day program of lectures, addresses, concerts, recitals, and various forms of platform entertainment, out-of-door recreation, and highly organized social group life. Local assemblies patterned after the mother Chautauqua in the United States number over one thousand.

The Chautauqua Summer Schools (Percy H. Boynton, Secretary of Instruction) are annually conducted during six weeks of the Assembly season. The work is that of the highest class of summer normal schools. Faculty, 102; courses over 200, in fourteen departments; six in academic subjects usually pursued in academies and colleges, eight in special professional work in Library Training, Domestic Science, Music, Physical Education, Arts and Crafts, etc. Over 3,000 students annually.

The Chautauqua Literary and Scientific Circle (Frank Chapin Bray, Managing Editor), organized at Chautauqua in 1878, continues the educational influence of the Assembly throughout the year. More than 350,000 members have been enrolled. The circle aims to promote the habit of reading and study in history, literature, science, and art, in connection with the routine of daily life. The essentials of the plan are: A definite course covering four years, each year complete in itself; specified volumes approved by the counsellors, allotment of time by the week and month, a monthly magazine with additional readings and notes, review outlines, and other aids. Individual readers may pursue the course alone, or local circles may be formed. The time required is about one-half hour daily for nine months. Diplomas are granted to those who complete the course. Any one may become a member of the C. L. S. C. by sending \$5 for the unit (four books, membership book and magazine for one year), to Chautauqua Institution, Chautauqua, N. Y.

NATIONAL SOCIETY FOR BROADER EDUCATION.

National Society for Broader Education of New York was organized in December, 1909. Its purpose is: "Through the education of the adult to aid in the normal development of national life; in removing the causes of distrust and antagonism between classes and in promoting the interests of the whole people."

The society carries on its work through the lecture platform, the pulpit and the newspapers. In 1912 its speakers delivered 504 lectures, its singers gave 130 concert lectures, several hundred sermons and conducted 524 discussions. *President*—George Edward Reed, S. T. D., L. L. D., Wilmington, Del. *Managing Director*—Guy Carleton Lee, Ph. D., 55 W. 44th St., New York City. *Secretary and Treasurer*—Dr. H. H. Langsdorf, Carlisle, Pa.

NORTHFIELD CONFERENCES.

Northfield Conferences and Summer Schools were established by D. L. Moody. The season is from May 1 to Oct. 1. Headquarters, East Northfield, Mass. Northfield Seminary and Mount Hermon Boys' School constitute what are commonly known as the Northfield Schools. *Director*—W. R. Moody; *Clerk*—A. G. Moody.

THE JOHN F. SLATER FUND.

In 1882 Mr. John F. Slater, of Connecticut, placed in the hands of trustees the sum of \$1,000,000, for the purpose of "uplifting the lately emancipated population of the Southern States and their posterity." For this patriotic and munificent gift the thanks of Congress were voted, and a medal was presented. The board consists of William A. Slater, President; Richard H. Williams, Vice-President, John A. Stewart, Alexander E. Orr, Cleveland H. Dodge, Seth Low, Wickliffe Rose, David F. Houston, Walter H. Page, William Lawrence, James H. Dillard, Charles E. Hughes. The Treasurer is the Metropolitan Trust Company of New York. Director, Jas. H. Dillard, 571 Audubon Street, New Orleans, La. Field Agents, W. T. B. Williams, Hampton, Va., and B. C. Caldwell, New Orleans, La. The fund has grown through judicious investment, and the trustees have now an annual income of about \$80,000, which is used in encouraging industrial training in institutions for the colored race in the South.

THE GENERAL EDUCATION BOARD.

The General Education Board was organized in New York February 27, 1902, and incorporated by act of Congress, signed January 12, 1903. The following are members of the Board: Frederick T. Gates, Chairman; L. G. Myers, Treasurer; Wallace Buttrick, Secretary; E. C. Sage, Assistant Secretary; Charles W. Eliot, Andrew Carnegie, Robert C. Ogden, Walter H. Page, J. D. Rockefeller, Jr., Albert Shaw, George Foster Peabody, Wallace Buttrick, Starr J. Murphy, Jerome D. Greene, Anson Phelps Stokes, Jr., Edwin A. Alderman, Hollis B. Frissell, Harry Pratt Judson, Edgar L. Marston, and Wickliffe Rose. The purposes of the board are to promote education in the United States, without distinction of race, sex, or creed, and especially to promote, systematize, and make effective various forms of educational beneficence. Office, 17 Battery Place, New York City.

THE SOUTHERN EDUCATION BOARD.

The Southern Education Board, the outcome of the Capon Springs and Winston-Salem Conferences, has been organized with these officers and members: *Chairman*, Robert C. Ogden, New York; *Treasurer*, George Foster Peabody, New York; *Executive Secretary*, Wickliffe Rose, 725 Southern Building, Washington, D. C. The purpose of this board is to co-operate with State and local authorities in building up State systems of public schools.

CONFERENCE FOR EDUCATION IN THE SOUTH.

President, Robert C. Ogden; *Vice President*, Walter H. Page; *Treasurer*, Wm. A. Blair; *Executive Secretary*, A. P. Bourland, 725 Southern Building, Washington, D. C.

The purpose of the Conference is to bring together men of every calling to further educational development in the South.

Illiteracy.

(Statistics supplied by the Bureau of the Census for THE WORLD ALMANAC.)

The term illiterate, as here used, includes all persons unable to write their own language, except in the case of countries marked with an asterisk (*), which base illiteracy on inability to read.

HONORARY FRATERNITIES.

United Chapters of Phi Beta Kappa.—The Phi Beta Kappa Society was founded at William and Mary College, Williamsburg, Va., December 5, 1776, and now consists of 77 chapters located in as many of the leading colleges and universities in the land. The total living membership is about 17,000. Until 1883 the growth of the Society was comparatively slow, but since the organization of the United Chapters the development has been rapid, 47 chapters having been organized. Women were first admitted in 1875, and the first charter to a woman's college, Vassar, was granted in 1898. Since then Smith, Wellesley, Mt. Holyoke and Goucher College of Baltimore have received charters. The first woman to be honored by election to the Senate was President Mary E. Woolley of Mt. Holyoke College. The present officers are: *President*, Prof. Edwin A. Grosvenor, LL. D., Amherst, Mass.; *Secretary and Treasurer*, Rev. Oscar M. Voorhees, A. M., 350 East 146th Street, New York City. "The Phi Beta Kappa Key" is the new official publication of the United Chapters which was authorized by the tenth National Council. The next triennial council will be held probably in September, 1913, at which time the vacancy in the vice-presidency occasioned by the death of Hon. John J. McCook, will be filled. It is an interesting fact that all three candidates in 1912 for election to the Presidency of the United States, viz: Woodrow Wilson, William H. Taft and Theodore Roosevelt, were Phi Beta Kappa men.

Sigma Xi.—An honorary scientific society founded at Cornell University in 1886, and having twenty odd chapters in the principal colleges and universities of the country. It is not secret. The performance of creditable scientific research in the natural and applied sciences, together with a high standard of scholarship, constitutes the basis of membership. Women are admitted as well as men.

Sigma Tau.—An honorary engineering fraternity for Juniors and Seniors with three requirements, viz., scholarship, practicality and sociability. It was founded February 22, 1904, at University of Nebraska and now has 328 members and four chapters. L. W. Chase, 1245 N. 33d St., Lincoln, Neb., is National Secretary.

Tau Beta Pi.—An engineering honorary society founded at Lehigh University in 1885. It now has 27 chapters and about 5,000 members. R. C. Matthews, University of Tennessee, at Knoxville, is the National Secretary.

Alpha Omega Alpha.—An honorary medical society in which scholarship is the membership qualification, and which admits women on the same basis as men. It was founded by Dr. William W. Root at College of Physicians and Surgeons at Chicago in 1902. It now has 17 chapters and 1,400 members. Dr. William W. Root, Slatersville Springs, N. Y., is the National Secretary.

Acacia Fraternity.—An intercollegiate organization for Master Masons founded at the University of Michigan in 1904, now has a membership of 2,179 and 24 active chapters. The National Secretary is Harry E. Klimer, Centerville, Mo.

Theta Nu Epsilon.—Is the only Greek letter inter-fraternal class society. It was founded at Wesleyan University in 1870, was badly disorganized for several years and was reorganized in 1907. The society is incorporated under New York laws and is represented in fifty-five colleges of the United States, the membership being large. Prof. Thomas J. Smull, of Ohio-Northern University, is President and John F. Finnegan, of Jamaica Plain, Mass., Secretary.

The Professional Fraternities now number over 50, with a membership exceeding 40,000. They are located in both technical and professional schools. With the exception of Theta Xi (Engineering Scientific), members of professional fraternities may also belong to the general college fraternities.

Local or "One-College" Fraternities exist in nearly all colleges, and some date back as early as 1825. There are about 75, with a membership approximating 10,000. The women's local fraternities number about 50, with a total membership of about 3,500.
